

Likely Bece Questions 2014

Eventually, you will entirely discover a further experience and attainment by spending more cash. still when? reach you tolerate that you require to acquire those every needs considering having significantly cash? Why dont you try to acquire something basic in the beginning? Thats something that will lead you to comprehend even more in this area the globe, experience, some places, subsequent to history, amusement, and a lot more?

It is your no question own grow old to pretense reviewing habit. in the midst of guides you could enjoy now is **likely bece questions 2014** below.

Beyond Growth Herman E. Daly 2014-09-30 "Daly is turning economics inside out by putting the earth and its diminishing natural resources at the center of the field . . . a kind of reverse Copernican revolution in economics." --Utne Reader "Considered by most to be the dean of ecological economics, Herman E. Daly elegantly topples many shibboleths in Beyond Growth. Daly challenges the conventional notion that growth is always good, and he bucks environmentalist orthodoxy, arguing that the current focus on 'sustainable development' is misguided and that the phrase itself has become meaningless." --Mother Jones "In Beyond Growth, . . . [Daly] derides the concept of 'sustainable growth' as an oxymoron. . . . Calling Mr. Daly 'an unsung hero,' Robert Goodland, the World Bank's top environmental adviser, says, 'He has been a voice crying in the wilderness.'" --G. Pascal Zachary, The Wall Street Journal "A new book by that most far-seeing and heretical of economists, Herman Daly. For 25 years now, Daly has been thinking through a new economics that accounts for the wealth of nature, the value of community and the necessity for morality." --Donella H. Meadows, Los Angeles Times "For clarity of vision and ecological wisdom Herman Daly has no peer among contemporary economists. . . . Beyond Growth is essential reading." --David W. Orr, Oberlin College "There is no more basic ethical question than the one Herman Daly is asking." --Hal Kahn, The San Jose Mercury News "Daly's critiques of economic orthodoxy . . . deliver a powerful and much-needed jolt to conventional thinking." --Karen Pennar, Business Week Named one of a hundred "visionaries who could change your life" by the Utne Reader, Herman Daly is the recipient of many awards, including a Grawemeyer Award, the Heineken Prize for environmental science, and the "Alternative Nobel Prize," the Right Livelihood Award. He is professor at the University of Maryland's School of Public Affairs, and coauthor with John Cobb, Jr., of For the Common Good.

Indigenist African Development and Related Issues Akwasi Asabere-Ameyaw 2014-07-11 There is no term so heavily contested in social science literature/nomenclature than 'Development'. This book brings Indigenous perspectives to African development. It is argued that contrary to development as we know it not working, a greater part of the problem is that conventional development approaches that work have in fact not truly been followed to the letter and hence the quagmire. All this is ironic since everything we do about our world is development. So, how come there is "difficult knowledge" when it comes to learning from what we know, i.e., what local peoples do and have done for centuries as a starting point to reconstructing and reframing 'development'? In getting our heads around this paradox, we are tempted to ask more questions. How do we as African scholars and

researchers begin to develop “home-grown solutions” to our problems? How do we pioneer new analytical systems for understanding our communities and offer a pathway to genuine African development, i.e., Indigenist African development? (see also Yankah, 2004). How do we speak of Indigenist development mindful of global developments and entanglements around us? Can we afford to pursue development still mired in a “catch up” scenario? Are we in a race with the development world and where do we see this race ending or where do we define as the ‘finishing line’? A Publication of the Centre for School and Community Science and Technology Studies [SACOST], University of Education, Winneba, Ghana

Community Participation in School Management Kazuro Shibuya 2022-09-12 Nobody denies that trust in schools is key to success in generating any educational outcomes. However, trust is often eroded, resulting in conflicts, alienation, and differentiation among school-level stakeholders. This book analyses school-based management (SBM) of education through the lens of relational trust in the context of Ghana, revealing how community participation in school management leads to educational outcomes. Conducting quantitative analysis of headteacher questionnaires from public basic schools and qualitative analysis of case study schools in the Akatsi South District of Ghana, Shibuya offers critical insights into building sustainable relationships between individual households and geographical/school communities. He argues it is critical to highlight relational trust as an analytical tool to examine relationships between actors and factors in school management. The research finds that trust in schools is a two-way mechanism, and the mutuality of expectations and obligations among stakeholders is essential if children’s learning outcomes are to improve. With its mixed-methods approach, this book will be a valuable resource for scholars in comparative education, those in educational development, and those interested in African contexts.

The Dilemma of a Ghost ; Anowa Ama Ata Aidoo 1987 Dilemma of a Ghost When Ato returns to Ghana from his studies in North America he brings with him a sophisticated black American wife. But their hopes of a happy marriage and of combining 'the sweetness and loveliest things in Africa and America' are soon shown to have been built on an unstable foundation.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

The Impacts of Language and Literacy Policy on Teaching Practices in Ghana

Philomena Osseo-Asare 2021-03-16 This text critically examines changes in Ghanaian language and literacy policy following independence in 1957 to consider its impacts on early literacy teaching. By adopting a postcolonial theoretical perspective, the text interrogates the logic behind policy changes which have prioritised English, local language, or biliteracy. It draws on data from interviews with teachers and researcher observation to demonstrate how policies have influenced teaching and learning. Dr Osseo-Asare's findings inform the development of a conceptual framework which highlights the socio-cultural factors that impact the literacy and biliteracy of young children in Ghana, offering solutions to help teachers combat the challenges of frequent policy changes. This timely monograph will prove to be an essential resource not only for researchers working on education policies, teacher education, and English-language learning in postcolonial Ghana but also for those looking to identify the thematic and methodological nuances of studying literacy and education in postcolonial contexts.

War, Women and Post-conflict Empowerment Josephine Beoku-Betts 2022-01-13 Since the 1991-2002 civil conflict ended in Sierra Leone, the country has failed to translate the accomplishments of women's involvement in bringing the war to an end into meaningful political empowerment. This is in marked contrast to other post-conflict countries, which have increased the political participation of women in elected and appointed office, increased the representation of women in leadership positions, and enacted constitutional reforms promoting women's rights. Written by Sierra Leonean and Africanist scholars and experts from a broad range of disciplines, this unique volume analyses the historical and contextual factors influencing women's political, economic and social development in the country. In drawing on a diverse array of case studies - from health to education, refugees to international donors - the contradictions, successes and challenges of women's lives in a post-conflict environment are revealed, making this an essential book for anyone involved in women and development.

Children, Childhood, and the Future Andrea Kleeberg-Niepage 2020-01-10 Although most of the world's children live in the Global South, much of the corpus of scientific knowledge which forms the basis of the current notion of "good childhood" worldwide is drawn from research on Western, middle-class children. Even cross-cultural research often applies the Western model of childhood as the standard to which others must correspond. This volume serves to bridge this gap by both bringing up significant features of the development and socialisation of children in African countries and presenting cross-cultural procedures which help to discuss and develop differentiated and joint ideas about childhood, instead of implementing one-sided standards which are disconnected from most children's lives.

Tradition and Change in Ghana G. K. Nukunya 2003

Teacher Education at the Edge Tonya Huber 2019-12-01 International Education Inquiries is a book series dedicated to realizing the global vision of Education 2030. This vision involves “ensuring inclusive and equitable quality education and promoting lifelong learning opportunities for all.” The founding editors seek to provide a forum for the diverse voices of scholars and practitioners from across the globe asking questions about transforming the vision of Education 2030 into a reality. Published chapters will reflect a variety of formats, free of methodological restrictions, involving disciplinary as well as interdisciplinary inquiries. We expect the series will be a leading forum for pioneers redefining the global discussion about the people, places and perspectives shaping Education 2030 outcomes. Education 2030 topics of interest include, but are not limited to, • Improving access to quality early childhood development, care, and pre-primary education; • Ensuring equal access for all women and men to affordable and quality education; • Increasing the number of youth and adults who have skills relevant for sustainable living and livelihoods; • Ensuring equal access for the vulnerable, including persons with disabilities, indigenous peoples and children in vulnerable situations; • Achieving levels of literacy and numeracy required to engage in communities and employment; • Acquiring the knowledge and skills needed to promote sustainable development, including: * Human right * Gender equality, * Promotion of a culture of peace and non-violence, * Global citizenship education, * The appreciation of cultural diversity and of culture’s contributions to sustainable development, • Providing safe, non-violent, inclusive and effective learning environments for all; • Recruiting, preparing, supporting, and retaining quality teachers.

Mathematics for Junior High Schools in West Africa Robert Akumbobe 2015-08-31 Exam Revision from the year 2015 in the subject Mathematics For Pre-University Students, , language: English, abstract: Preparing for exams in Mathematics has been a thorny issue especially for students at the lower levels. This is a question and answer book for students preparing for Basic School Certificate Examinations in West Africa. Every exercise is explained in order to guide the reader.

Factors contributing to academic performance of students in a Junior High School Anthony Abaidoo 2018-11-22 Bachelor Thesis from the year 2018 in the subject Pedagogy - School System, Educational and School Politics, grade: 5 (GHA-System), University of Education (Distance Learning), course: Post Graduate Diploma in Education, language: English, abstract: Students’ academic performance is a key feature in education. This study was therefore conducted primarily to assess the factors contributing to improvement in academic performance of Junior High Students (JHS) in a Basic School which is in the Gomo-East District in the Central Region of Ghana. The mixed and descriptive research design was used and a sample size of 87 respondents (79 students and 8 teachers) were selected through random sampling technique. The findings revealed that the average academic performance (47.0%) of the JHS students in the Basic School is weak and their performance in Mathematics (average score of 31.48%) and English Language (average score of 39.99%) is a fail. It was noticed that student factors that contribute to an improvement in academic performance include; regular studying, self-motivation, punctuality and regular class attendance, hard-work and interest in a subject. The teacher factors were completion of syllabus, use of TLM’s, frequent feedback to students and given students special attention. Per the findings, parent factors which was very key was parent showing concern in their children’s academics and providing them their academic needs. School factors that were significant included availability of text books and TLM’s. The study also found that parent

level of education and gender has a positive relationship with academic performance but it's insignificant. However, age has a positive significant (5% significance level) relationship with academic performance. Based on findings, the study recommends that there should be strict monitoring on teachers to vary their teaching methods to suit their needs of the students and also to provide the students with constant feedback on their academic performance. Again, the students should be motivated and orientated to take ownership of their studies by having regular studies and attending school during school days.
