Skills of Clinical Supervision for Nurses Meg Bond 2011-01-16 "I have eagerly awaited the follow up to Bond & Holland's ground breaking first edition published some 12 years ago. This second edition is completely revisited, retaining the readable chapter structure, but tackling the key questions head on pertinent to clinical supervision development for nursing in the 21st century. Once again the authors do not pull any punches critically reviewing the nature of and challenges posed for its full implementation in practice. The strengths of this book as I expected are its practical application in and for practice. The continued emphasis on skills development in the clinical supervision relationship is evident, embroidered within the emotional work of everyday nursing practice. This is an essential read for all those still wrestling with full implementation in practice and presents a treasure trove of ideas for those actively engaging in the process. John Driscoll, CONTINUING PROFESSIONAL Development (CPD) Consultant (Healthcare) This perennial

bestseller provides a practical and accessible, skills-based text on how to implement and engage in clinical supervision. It provides clear frameworks to guide learning, with real-life examples from across the range of nursing specialisms. Offering grounded perspectives on supervision for nurses, it has been thoroughly updated to reflect changes and developments in the profession. The book includes: Exploration of the theory and development of clinical supervision An analysis of the process and skills of in-depth reflection Guidelines on developing key skills for both supervisors and supervisees A critique of group supervision and ways to make it more effective New ideas for developing organizational frameworks for supervision The authors' wealth of experience is reflected in their outline for a code of ethics that addresses self-disclosure and accountability issues in clinical supervision. This book is key reading for nurses, midwives and health visitors and their managers as well as professional support workers and educators who have an interest in the practical implementation of clinical supervision.

Ophthalmic Echography 13 P. Till 2012-12-06 This Volume of the Documenta Ophthalmologica Proceeding Series presents the scientific papers read during the 13th Congress of SIDUO, the International Society for Ultrasonic Diagnosis in Ophthalmology, held in Vienna in the Summer of 1990. It was the second time that SIDUO had selected Vienna as a site for its biennial congresses in the 28 years of its existence. Previously, the 3rd SIDUO Meeting had taken place as part of the 1st World Congress for Ultrasonic Diagnosis in Medicine organized by Karl C. Ossoinig in 1969. Ossoinig, the pioneer of Standardized Echography opened the scientific sessions of SIDUO 13 with the First Jules Fran~ois Memorial Lecture on the Optic Nerve reviewing the modern examination techniques for precise measurements of the orbital optic nerve and its various sheaths and for an accurate diagnosis and differential diagnosis of diseases affecting the optic nerve, highlighting the new field of prophylactic recognition of early optic nerve compression (e. g. , in Graves' orbitopathy) and the important confirmation of CON in the presence of other conditions affecting the optic nerve functions. The first scientific session then dealt with a variety of interesting conditions of the optic nerve and of the extraocular muscles ranging from inflammatory diseases such as optic neuritis and orbital myositis to congenital anomalies, from glaucomatous changes to IIH, and from normal anatomical (dynamic) findings to malignant tumors such as lymphomas and leucemic meningeosis.

Epidemiology Of Eye Disease, The (Third Edition) Johnson Gordon J 2012-03-13
This unique book is a comprehensive coverage of the epidemiology of the world's major blinding eye diseases, written by internationally acclaimed experts in each field. Edited by world-renowned epidemiologists and ophthalmologists, the chapters on each leading cause of blindness describe its biology, epidemiology, risk factors, clinical trials, possibilities for prevention, and new research avenues. New chapters include Research Synthesis, Epidemiology of Dry Eye Disease, and Epidemiology of Uveitis, as well as programme issues for reaching the goal of eliminating avoidable blindness by 2020. This book is essential for any eye care practitioner interested in the causation or prevention of disease, and should be part of any public health discipline's library with a focus on improving eye health worldwide.

Quo Vadis, Medicus? Ida Laudanska-Krzeminska 2015-12 This book discusses the health condition of Polish current and future health professionals. The study was conducted on around 800 medical staff members (in-training and professional). The author analyses nutrition behaviour, physical activity, smoking, drinking alcohol and their psycho-social determinants (health self-assessment, value of health, health locus of control, health related self-efficacy).

Fundamentals of Research Methodology for Healthcare Professionals Hilla Brink 2012 Completely revised and updated to incorporate the latest trends in research methodology and evidence-based practice, this third edition of a valuable industry resource examines the vital role research plays in the improvement of health sciences practices. It details the steps involved in planning and undertaking a research project, from identifying and formulating the problem to reporting findings, and underscores the importance of a clear understanding of research methodology and terminology. This volume is certain to stimulate awareness of the myriad researchable and research-requiring questions encountered daily in health practice.

Mapungubwe Sian Tiley 2004 Mapungubwe was discovered 75 years ago and has remained one of South Africa's best-kept secrets. The Hill of the Jackal was the centre of a thriving civilisation around 800AD-1200AD. Extensive trade with Arab and Chinese merchants took place here, as did the making of exquisite gold ornaments. Eventually the people moved on to what is now great Zimbabwe leaving behind a wealth of gold artefacts (3,000 to date), pottery and beadwork in the burial plots on Mapungubwe hill. Was this the site of the legendary King Solomon's mines? Who knows? But there are 20,000 Iron Age goldmines in the surrounding areas. Here then is a feast of images of the gold artefacts, the pottery and the beadwork - together with a brief history of the civilisation - Mapungubwe is now to become a Heritage site -- and there is a permanent exhibition of artefacts at the University of Pretoria. The Creation of Tribalism in Southern Africa Leroy Vail 1991-01-07 Despite a quarter century of "nation building," most African states are still driven by ethnic particularism—commonly known as "tribalism." The stubborn persistence of tribal ideologies despite the profound changes associated with modernization has puzzled scholars and African leaders alike. The bloody hostilities between the tribally-oriented Zulu Inkhata movement and supporters of the African National Congress are but the most recent example of tribalism's tenacity. The studies in this volume offer a new historical model for the growth and endurance of such ideologies in southern Africa.

Finding Voice Kim Berman 2017-12-22 In *Finding Voice*, Kim Berman demonstrates how she was able to use visual arts training in disenfranchised communities as a tool for political and social transformation in South Africa. Using her own fieldwork as a case study, Berman shows how hands-on work in the arts with learners of all ages and backgrounds can contribute to economic stability by developing new skills, as well as enhancing public health and gender justice within communities. Berman's work, and the community artwork her book documents, present the visual arts as a crucial channel for citizens to find their individual voices and to become agents for change in the arenas of human rights and democracy.

Mapungubwe Thomas Huffmann 2005-02-01 An illustrated book about a 1000 year old civilization Between AD 900 and 1300, the Shashe-Limpopo basin in Limpopo Province witnessed the development of an ancient civilization. Like civilizations everywhere, it consisted of a complex social organization supported by intensive agriculture and long-distance trade. The Mapungubwe Cultural Landscape, as it is now known, was the forerunner of the famous town of Great Zimbabwe, situated about 200 kilometers to the north, and its cultural connection to Great Zimbabwe and the Venda people allows archaeologists to reconstruct its evolution. This generously illustrated book tells the story of an African civilization that began more than 1000 years ago. It is the first in a series of accessible books written by specialists for visitors to South Africa's World Heritage Sites.

Beyond Memory Max Mojapelo 2008 "South Africa possesses one of the richest popular music traditions in the world - from marabi to mbaqanga, from boeremusiek to bubblegum, from kwela to kwaito. Yet the risk that future generations of South Africans will not know their musical roots is very real. Of all the recordings made here since the 1930s, thousands have been lost for ever, for the powers-that-be never deemed them worthy of preservation. If one peruses the books that exist on South African popular music, one still finds that their authors have on occasion jumped to conclusions that were not as foregone as they had assumed. Yet the fault lies not with them, rather in the fact that there has been precious little documentation in South Africa of who played what, or who recorded what, with whom, and when. This is true of all music-making in this country, though it is most striking in the music of the black communities. Beyond memory: recording the history, moments and memories of South African music is an invaluable publication because it offers a first-hand account of the South African music scene of the past decades from the pen of Max Thamagana Mojapelo, who was situated in the very thick of things, thanks to his job as a DJ at the South African Broadcasting Corporation. This book - astonishing for the breadth of its coverage - is based on his diaries, on interviews he conducted and on numerous other sources, and we find in it not only the well-known names of recent South African music but a countless host of others whose contribution must be recorded if we and future generations are to gain an accurate picture of South African music history of the late 20th and early 21st centuries"--Publisher's description.

Humanistic Nursing Josephine Paterson 2016-05-14 Concisely, humanistic nursing practice theory proposes that nurses consciously and deliberately approach nursing as an existential experience. Then, they reflect on the experience and phenomenologically describe the calls they receive, their responses, and what they come to know from their presence in the nursing situation. It is believed

TRANSFORMATION AND DEVELOPMENT OF HUMAN SOCIETY: Robert Munthali 2014-10-31 In this book, the promovendus investigates the critical role a preacher and his/her homilies have in bringing transformation, development and healing in the human society. The investigation shows how a preacher has been sidelined on issues of progress, when from time immemorial he/she has been a critical and pivotal component in the phenomenon. The study is an attempt to reclaim a preacher's role in bringing progress and healing in underdeveloped communities through homilies, particularly, in Venda, rural South Africa. This book proposes a preacher as the transformer, developer and healer of the people.

Population Health: Behavioral and Social Science Insights Robert M. Kaplan 2015-07-24 The purpose of this book is to gain a better understanding of the multitude of factors that determine longer life and improved quality of life in the years a person is alive. While the emphasis is primarily on the social and behavioral determinants that have an effect on the health and well-being of individuals, this publication also addresses quality of life factors and determinants more broadly. Each chapter in this book considers an area of investigation and ends with suggestions for future research and implications of current research for policy and practice. The introductory chapter summarizes the state of Americans' health and well-being in comparison to our international peers and presents background information concerning the limitations of current approaches to improving health and well-being. Following the introduction, there are 21 chapters that examine the effects of various behavioral risk factors on population health, identify trends in life expectancy and quality of life, and suggest avenues for research in the behavioral and social science arenas to address problems affecting the U.S. population and populations in other developed and developing countries around the world. Undergraduate and graduate students pursuing coursework in health statistics, health population demographics, behavioral and social science, and health policy may be interested in this content. Additionally, policymakers, legislators, health educators, and scientific organizations around the world may also have an interest in this resource.
