Mountain Risks: From Prediction to Management and Governance Theo Van Asch 2016-09-18
This book offers a cross disciplinary treatment of the rapidly growing field of integrated approaches in risk assessment in mountainous areas. All major aspects related to hazard and risk assessment, risk management, and governance are illustrated with a wide range of case studies. The first part of the book focuses on new techniques for assessing the natural hazards of different types of mass movements. State-of-the-art techniques for morphological characterization and monitoring of displacements are described. Computational advances are covered to explain the process systems and to quantify the hazards of fast and slow-moving landslides. In the second part of the book methodologies are included for assessing the impact of these natural hazards on the society in terms of risks. In this part, methodologies for defining the vulnerability of the elements at risk are shown and the use of run-out models for risk assessment of the dangerous rapid mass movements are evaluated. The third part of the book focuses on the response of society towards the problems of hazard and risk. It highlights the role of spatial planning, early warning systems and evacuation plans for risk management. It establishes practical thresholds for acceptable and tolerable risks and emphasizes the importance of education and communication to society. Audience The book is of interest to a wide range of experts from related disciplines, practitioners and stakeholders to demonstrate the importance of an integrated approach for all aspects of risks in mountainous areas.

Archaeology of the Unconscious Alessandra Aloisi 2019-07-01 In reconstructing the birth and development of the notion of 'unconscious', historians of ideas have heavily relied on the Freudian concept of Unbewussten, retroactively projecting the psychoanalytic unconscious over a constellation of diverse cultural experiences taking place in the eighteenth and nineteenth centuries between France and Germany. *Archaeology of the Unconscious* aims to challenge this perspective by adopting an unusual and thought-provoking viewpoint as the one offered by the Italian case from the 1770s to the immediate aftermath of WWI, when Italo Svevo's *La coscienza di Zeno* provides Italy with the first example of a 'psychoanalytic novel'. Italy's vibrant culture of the long nineteenth century, characterised by the sedimentation, circulation, intersection, and synergy of different cultural, philosophical, and literary traditions, proves itself to be a privileged object of inquiry for an archaeological study of the unconscious; a study whose object is not the alleged 'origin' of a pre-made theoretical construct, but rather the stratifications by which that specific construct was assembled. In line with Michel Foucault's *Archéologie du savoir* (1969), this volume will analyze the formation and the circulation, across different authors and texts, of a network of ideas and discourses on interconnected themes, including dreams, memory, recollection, desire, imagination, fantasy, madness, creativity, inspiration, magnetism, and somnambulism. Alongside questioning pre-given narratives of the 'history of the unconscious', this book will employ the Italian 'difference' as a powerful perspective from whence to address the undeveloped potentialities of the pre-Freudian unconscious, beyond uniquely psychoanalytical viewpoints.

Atlante degli anfibi e dei rettili d'Italia Roberto Sindaco 2006 The Atlas of Italian Amphibians and Reptiles presents the distribution, ecology and conservation status of the 37 species of amphibians and the 50 species of reptiles found in Italy. A 10x10 km UTM grid map is supplied for each species, on the basis of more than 70.000 records contributed by 900 collaborators during the Societas Herpetologica Italica survey project, started in 1994. Entries, illustrated with photos, are subdivided into the following headings: taxonomy, general distribution, comments on the distribution map, habitat, altitudinal distribution, annual activity cycle, reproduction and status of the Italian populations. General sections on biogeography, history of herpetology in Italy, paleoherpetology and herpetological fauna of the small Italian islands are also included. Italian and English text.

Decadent Genealogies Barbara Spackman 2018-03-15 Barbara Spackman here examines the ways in which decadent writers adopted the language of physiological illness and alteration as a figure for psychic otherness. By means of an ideological and rhetorical analysis of scientific as well as literary texts, she shows how the rhetoric of sickness provided the male decadent writer with an alibi for the occupation and appropriation of the female body.

Generalized Additive Models T.J. Hastie 2017-10-19 This book describes an array of power tools for data analysis that are based on nonparametric regression and smoothing techniques. These methods relax the linear assumption of many standard models and allow analysts to uncover structure in the data that

might otherwise have been missed. While McCullagh and Nelder's *Generalized Linear Models* shows how to extend the usual linear methodology to cover analysis of a range of data types, *Generalized Additive Models* enhances this methodology even further by incorporating the flexibility of nonparametric regression. Clear prose, exercises in each chapter, and case studies enhance this popular text.

Reading Lucretius in the Renaissance Ada Palmer 2014-10-13 Ada Palmer explores how Renaissance poets and philologists, not scientists, rescued Lucretius and his atomism theory. This heterodoxy circulated in the premodern world, not on the conspicuous stage of heresy trials and public debates but in the classrooms, libraries, studies, and bookshops where quiet scholars met transformative ideas.

Essentials of Exercise & Sport Nutrition: Science to Practice Richard B. Kreider PhD FACSM FISSN FNAK 2019-07-09 We all want to look and feel good. We also want to perform well whether it's in the weight room, in sports, or at work. Research has shown exercise, proper nutrition, and adequate recovery affect health and human performance. However, there's a lot of conflicting and confusing information regarding exercise and nutrition. In *Essentials of Exercise and Sport Nutrition*, author Dr. Richard B. Kreider offers an up-to-date assessment of the science and practice of exercise and sport nutrition. Kreider, who has conducted extensive research on the subject and has consulted with numerous teams, coaches, and athletes for more than thirty years, brings a scientific and applied perspective to discussing the latest research and how it can be used to optimize performance. He also provides summary recommendations, training programs, and meal plans for beginners through athletes, as well as for individuals who want to lose and/or manage their weight.

Twelve Years a Slave Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

The Iwakura Mission to America and Europe Ian Nish 2008-10-23 Driven by the need to identify, classify and assess western technology and culture together with a desire to advance a dialogue for reviewing the so-called 'unequal treaties' - the new Meiji government of 1868 despatched a top-level ministerial team to the west which, in 1872, arrived in the United States. In all, they spent 205 days in America, 122 days in Britain and two months in France, as well as visiting other countries including Belgium, Germany, Russia, Sweden and Italy. Drawing on the papers given at the triennial conference of the European Association of Japanese Studies, held in Budapest in August 1997 (the year also marking the 125th anniversary of Iwakura's arrival), this volume presents a valuable new overview of the mission as a whole, with the significance and impact of the visit to each country being separately assessed. A supplement to the book looks at several 'post-Iwakura' topics, including a review of the mission's chief chronicler, Kume Kunitake.

In Defiance of Painting Christine Poggi 1992-01-01 The invention of collage by Picasso and Braque in 1912 proved to be a dramatic turning point in the development of Cubism and Futurism and ultimately one of the most significant innovations in twentieth-century art. Collage has traditionally been viewed as a new expression of modernism, one allied with modernism's search for purity of means, anti-illusionism, unity, and autonomy of form. This book - the first comprehensive study of collage and its relation to modernism - challenges this view. Christine Poggi argues that collage did not become a new language of modernism but a new language with which to critique modernism. She focuses on the ways Cubist collage - and the Futurist multimedia work that was inspired by it - undermined prevailing notions of material and stylistic unity, subverted the role of the frame and pictorial ground, and brought the languages of high and low culture into a new relationship of exchange.

Lucretius Poet and Philosopher Philip R. Hardie 2020-07-06 Six hundred years after Poggio's retrieval of the *De rerum natura*, and with the recent surge of interest in Lucretius and his influence, there has never been a better time to fully assess and recognize the shaping force of his thought and poetry over European culture from antiquity to modern times. This volume offers a multidisciplinary and updated overview of Lucretius as philosopher and as poet, with special attention to how these two aspects interact. The volume includes 18 contributions by established as well as early career scholars working on Lucretius' philosophical and poetic work, and his reception both in ancient and early modern times. All the chapters present new and original research. Section I explores core issues of Epicurean-Lucretian epistemology and ethics. Section II expounds much new material on ancient response to and reception of Lucretius. Section III presents new material and analysis on the immediate, fraught early modern reception of the poem. Section IV offers a wide collection of new and original papers on Lucretius' fortunes in the period from Machiavelli up to Victorian times. Section V explores little known aspects of the iconographical and biographical motifs related to the *De rerum natura*.

Atoms in the Family Laura Fermi 2014-10-24 In this absorbing account of life with the great atomic scientist Enrico Fermi, Laura Fermi tells the story of their emigration to the United States in the 1930s—part of the widespread movement of scientists from Europe to the New World that was so important to the development of the first atomic bomb. Combining intellectual biography and social history, Laura Fermi traces her husband's career from his childhood, when he taught himself physics, through his rise in the Italian university system concurrent with the rise of fascism, to his receipt of the Nobel Prize, which offered a perfect opportunity to flee the country without arousing official suspicion, and his odyssey to the United States.

Workbook for Wheelock's Latin, 3rd Edition, Revised Paul T. Comeau 2000-05-30 WHEELLOCK'S LATIN: AUDIO FILES When Professor Frederic M. Wheelock's Latin first appeared in 1956, the reviews extolled its thoroughness, organization, and conciseness; at least one reviewer predicted that the book "might well become the standard text" for introducing students to elementary Latin. Now, five decades later, that prediction has certainly proved accurate. Workbook for Wheelock's Latin is an essential companion to the classic introductory textbook. Designed to supplement the course of study in Wheelock's Latin, 6th Edition, Revised, each of the forty chapters in this newly updated edition features: Transformation drills, word and phrase translations, and other exercises to test and sharpen the student's skills "Word Power" sections that focus on vocabulary and derivatives Reading comprehension questions and sentences for translation practice Perforated pages for hand-in homework assignments and space for the student's name and date
