Vanishing Fleece Clara Parkes 2019-10-01 The renowned knitter shares her year-long adventure through America's colorful, fascinating—and slowly disappearing—wool industry. Join Clara Parkes as she ventures across the country to meet the shepherds, dyers, and countless workers without whom our knitting needles would be empty, our mills idle, and our feet woefully cold. Along the way, she encounters a flock of Saxon Merino sheep in upstate New York, tours a scouring plant in Texas, visits a steamy Maine dyehouse, helps sort freshly shorn wool on a working farm, and learns how wool fleece is measured, baled, shipped, and turned into skeins. In pursuit of the perfect yarn, Parkes describes a brush with the dangers of opening a bale (they can explode), and her adventures from Maine to Wisconsin ("the most knitterly state") and back again. By the end of the book, you'll be ready to set aside the backyard chickens and add a flock of sheep instead.

*Life Skills Gained Through the 4-H Sheep Skillathon* Terra Rose Kimes 2015 The primary purpose of this study was to determine Tennessee youths' perception of their youth leadership life skills development. The study also determined why youth participated in the sheep skillathon. This study utilized a quantitative research approach. The research design for this descriptive study was a one shot case study. One instrument was used during this study for data collection, the Skillathon Life Skills Questionnaire. The Skillathon Life Skills Questionnaire is a researcher-developed instrument with three demographic questions which included age, grade, and gender, the 30 item Youth Leadership Life Skills Development Scale (Dormody, Seevers & Clason, 1993), 11 items that assessed possible reasons for participating in the skillathon, and an open-ended question that allowed youth to state any other reasons they participated in the skillathon. Tennessee youth completed the Skillathon Life Skills Questionnaire at the Tennessee State Sheep Expo. Data were analyzed used SPSS version 22 for Windows. Frequencies, percentages, means, and standard deviations were calculated to summarize demographics, youth leadership life skills development, and why students participate in the skillathon. Additionally, a frequency table was produced based on the open-ended question which asked participants to list other reasons for participating in the skillathon not listed in the 11 reasons for participating items. The study found sheep skillathon participants perceived the sheep skillathon to have a positive impact or moderate gain in their youth leadership life skill development. The study also found a majority of youth agreed the following reasons are why they participated in the skillathon: (a) 4-H Agent or Ag Teacher; (b) I wanted to be Premier Exhibitor; (c) I thought it would be fun; (d) I wanted to see how much I knew about my project; (e) to achieve a goal; (f) build self-confidence; (g) challenge myself to try new things; (h) competition; and (i) interested in animal science career. Based on these findings, recommendations for practice and future research were given.

Tops & Bottoms Janet Stevens 1995-03-29 Hare solves his family's problems by tricking rich and lazy Bear in this funny, energetic version of an old slave story. With roots in American slave tales, *Tops & Bottoms* celebrates the trickster tradition of using one's wits to overcome hardship. "As usual, Stevens' animal characters, bold and colorful, are delightful. . . . It's all wonderful fun, and the book opens, fittingly, from top to bottom instead of from side to side, making it perfect for story-time sharing."--

*National Safety Tractor and Machinery Operation Program Student Manual* Ohio State University 2006-06-30 The need for current and better quality training materials was cited by both certification program instructors and coordinators. In recognition of these shortcomings, the U. S. Department of Agriculture (USDA) funded a major project with Penn State University, The Ohio State University, and the National Safety Council to develop a National Safe Tractor and Machinery Operation Program (NSTMOP). The result is the NSTMOP Student Manual. This manual, including the task sheets, is the primary curriculum resource developed and designed to be used in a variety of instructional settings. The task sheets are divided into 6 sections: introduction; safety basics; agricultural hazards; the tractor; connecting and using implements with the tractor; and material handling (skid steers, ATV, and utility vehicles). There are a total of 77 task sheets, 48 are identified as core topics. Also included are a skills and driving test layout map and evaluation forms.

*Goose Production* Food and Agriculture Organization of the United Nations 2002 This publication aims to provide guidance on sustainable goose production systems that are based on the natural physiological and behavioural advantages of the goose. These advantages include the fact that: they can consume and digest large amounts of high fibre and low-quality feed; they are easy to manage; and their rapid growth renders them one of the most efficient sources for meat production. In addition, feathers/down and fatty liver are valuable by-products, while their strong territorial instinct makes them very effective guards. As selective feeders, geese have been used for weed control in a wide range of crops. All aspects of goose production are discussed in this book, including feeding and nutrition, housing, general husbandry, flock health and breeding. Regional differences in production practices are also described.

*Approaches to Positive Youth Development* Rainer K Silbereisen 2007-08-21 Scientific research and science-guided practice based on the promotion of an individual's strengths constitutes a radical shift in

a new and growing area of study within the field of human development. Its trademark term is 'positive youth development'. This approach to human development is based on the idea that, in addition to preventing problems, science and practice should promote the development of competencies, skills, and motivation in order to enhance individuals' developmental pathways. Approaches to Positive Youth Development, is based on this concept and brings together authors from across Europe and America who are leaders in their respective fields. The main focus of the book, beyond a clarification of the paradigmatic foundations, concerns the major contexts of adolescents and young adults, namely, neighbourhoods and leisure locales, school and family, and the major themes of healthy psychosocial development, namely, competences and knowledge, prosocial behaviour, transcending problems of delinquency, civic engagement, identity, agency, and spirituality.
