Local Flap Reconstruction Anthony Penington 2010-06-29 400 color photos and a case study approach provide procedural skills for all aspects of flap surgery Endorsed by the Skin and Cancer Foundation of Victoria! Praise for the first edition: "This book uses a case study approach that is comprehensive and easy to follow with lots of colour photographs. I enjoyed reading this book: it's logical, easy on the eye and mind and it's easy to tell the author is a very experienced facial surgeon. I think it is an extremely valuable book to have and to use regularly as it will help in managing a wide variety of patients."--"High Commendation" in the Surgery Category of the 2008 British Medical Association Medical Book Awards This new edition presents 78 photographic case studies that illustrate the techniques of local flap repair for the reconstruction of skin defects. From basic explanation of the principles of reconstructive surgery to some of the more advanced and cutting-edge procedural skills, like island flaps, the book covers all aspects of flap surgery in a concise and visual manner. More than 400 color illustrations take the reader through individual case studies in the pre, intra, and post operative stages of flap reconstructive surgery. This includes valuable 3 month followups that highlight realistic patient outcomes. Features: Maintains engaging writing style of the first edition Unlike competing titles, covers all regional anatomical parts for flap reconstruction, not just head and neck Flexible structure starts with simpler flaps and progresses to more advanced techniques for ease of use with practitioners with different levels of expertise

**Atlas of Regional and Free Flaps for Head and Neck Reconstruction** Mark L. Urken 2012-01-05 This Atlas depicts in a clear manner the use of regional skin, muscle and musculocutaneous flaps as well as donor sites from distant regions of the body where vascularized skin, muscle, bone, and nerves can be harvested and transferred to the head and neck. Otolaryngologists, plastic surgeons and general surgeons use both regional and free flaps to reconstruct damage to the head and neck caused by cancer and trauma. This Atlas provides the surgeon with techniques for mastering different donor sites needed to find solutions to virtually every reconstruction problem. It provides detailed descriptions of the anatomy and harvesting techniques of the major regional and free-flap donor sites currently employed in head and neck reconstruction.

**Local Flaps in Head and Neck Reconstruction** Ian T. Jackson 2007-06-30 This book is truly a classic, beloved by plastic surgeons throughout the world. Its strength lies in its simple, elegant approach to solving common reconstructive problems encountered by plastic surgeons at all levels of training. Its appeal transcends specialty interests, with aesthetic and reconstructive surgeons alike finding this book to be an invaluable resource for daily practice. Its comprehensive coverage makes it an essential addition to any surgeon's library. Totally revised and updated with color throughout, this new edition has been totally revised and updated with over 150 additional pages, two new chapters, and numerous new cases, flaps, and problems. Additionally, there are color illustrations, summary tables highlighting the best flaps for various clinical situations, annotated bibliographies, and much, much more. Throughout these pages, the reader benefits from Dr. Jackson's enormous experience and wisdom as he makes note of special tips, critical maneuvers, and important principles that warrant emphasis. Each flap is accompanied by a description of potential problems, and each anatomic area for

reconstruction ends with a technique of choice so that the reader can understand the decision-making process that is involved in flap selection. The book begins with a chapter on basic principles, which reviews the important oncologic concerns that must precede any reconstructive-surgery procedure. Principles of tissue movement and flap design are accompanied by drawings that aid the reader in planning. The next seven chapters address each anatomic region. Alternate methods for closing defects in each region are presented. Both simple and complex solutions are detailed. Each reconstructive option is presented in great detail with operative photos as well as beautiful illustrations to depict flap design, elevation, and closure, and to more clearly explicate complex flap reconstructions for difficult problems. Common mistakes and the limitations of each flap are clearly delineated. Chapters on each anatomic region conclude with new summary tables that help the reader quickly identify the best reconstructive options for specific problems. Two Totally New Chapters The final two chapters are new to this edition-Tissue Expansion and Problems and Complication. The chapter on tissue expansion fully details the advantages to be gained from tissue expansion and the applications in each area of the head and neck when local flaps are planned. The Problems and Complications chapter covers common problems encountered in head and neck reconstruction as well as avoidance and treatment of complications should they occur. It concludes with a section on tricks and innovations, which discusses diverse topics such as the use of scarlet red for wound healing, the aesthetic repair of torn earlobes, and the repair of cocaine-induced palatal fistula. There is clearly a wealth of information and much to be learned and applied by surgeons at all levels of expertise.

Facial Reconstruction After Mohs Surgery James F. Thornton 2018-02-21 The growing worldwide incidence of melanoma and nonmelanoma skin cancers has driven the development of effective treatment methodologies. Mohs is the gold standard surgical treatment for excision of skin cancers on the head and neck. While Mohs surgery has a 99% effectiveness rate for new cancers and 95% for recurrences, more than 90% of reconstructed patients desire some improvement in their operative scars. Facial Reconstruction after Mohs Surgery by James Thornton and Jourdan Carboy summarizes 15 years and 12,000 cases in a surgical practice devoted to post-Mohs facial reconstruction. Step-by-step guidance is provided on efficacious, aesthetically pleasing, and functionally complete repairs, respective of a patient's age, anesthesia considerations, and available resources. In addition to succinct chapters on lip, ear, cheek, scalp, and nasal reconstruction, subspecialty chapters cover anesthesia, Mohs surgery, oculoplastic surgery, and microvascular reconstruction. Throughout the text, complete and concise clinical algorithms serve as a framework to help simplify difficult clinical concepts. Key Highlights General techniques including wound care, skin and cartilage grafts; and local and pedicled flaps The management of intraoperative, acute, and late healing stage complications; scar optimization and revision surgeries Additional procedural guidance provided in 20 high quality video clips posted in the Thieme MediaCenter Nearly 500 full-color photos and precise drawings add a rich visual dimension and show stepwise operative sequences This book is comprehensive resource on tried and true techniques for soft tissue reconstruction after Mohs cancer resection. It is essential reading for plastic surgery, facial plastic surgery and dermatology residents and clinicians with practices devoted to facial plastic surgery.

*Local Flaps in Facial Reconstruction E-Book* Shan R. Baker 2021-04-03 New clinical cases, enlarged photographs, new abstracts and algorithms, and more make the 4th Edition of Local Flaps in Facial Reconstruction your state-of-the-art resource for achieving optimal results for the full range of facial flap procedures. It offers detailed visual guidance and unmatched expertise from prominent surgeons in facial plastic surgery, ophthalmology, and dermatology, reflecting the multi-specialty nature of this dynamic field. Full-color clinical photographs and line drawings, along with high-quality surgical video clips, capture the latest, most effective facial reconstruction practices and methods. Clearly demonstrates practical and effective methods of reconstruction of skin defects in a variety of sizes, configurations, and locations on the head and neck. Covers the basic concepts of flap physiology, design, and mechanics of flap transfer, including multiple clinical examples for each flap; the second section describes the use of local flaps in reconstruction of individual facial structures including the auricles, lips, eyelids, cheeks, forehead, and nose. Contains many new clinical cases, new abstracts preceding each chapter, new algorithms for selecting the preferred local flap, an updated and expanded bibliography, newer approaches to facial reconstruction, and enlarged photographs to better view flap design, planes of dissection, and methods of flap transfer. Offers new, more complex clinical cases of nasal reconstruction, as well as updated coverage of new wound closure techniques and materials. Includes an outstanding video library demonstrating the design, dissection, and transfer of the majority of local flaps and grafts currently in use today, accompanied by expert commentary. Features more than 2,300 superb illustrations and photographs of rotation flaps, transposition flaps, advancement flaps, bilobe flaps, melolabial flaps, paramedian forehead flaps, rhombic flaps, and mucosal flaps.

**Local and Regional Flaps in Head and Neck Reconstruction** Rui Fernandes 2014-10-15 Local and Regional Flaps in Head & Neck Reconstruction: A Practical Approach provides comprehensive, step-by-step instruction for flap raising and inseting for the head and neck region. Ideal for oral and maxillofacial surgeons, facial plastic surgeons, and head and neck surgeons, the book serves as a useful guide to planning reconstructive cases and an easily accessible reference prior to operation. Local and Regional Flaps in Head & Neck Reconstruction is logically organized into 24 chapters, each focusing on a local or regional flap, or a special site reconstruction. Chapters focused on a particular flap will begin with a detailed description of the relevant anatomy and discuss potential applications of the flap before moving into a detailed step-by-step description of how to elevated and transfer the flap to the defect site. Potential complications will also be addressed. Well-illustrated with more than 800 clinical photographs and with a website featuring surgical procedures, this book is an ideal reference for those new to practice and experts alike.

Decrease mortality from massive burns by applying the latest advances in resuscitation, infection control, early coverage of the burn, and management of smoke inhalation and injury. Enhance burn patients' reintegration into society through expanded sections on reconstructive surgery (with an emphasis on early reconstruction), rehabilitation, occupational and physical therapy, respiratory therapy, and ventilator management.

Multidisciplinary Head and Neck Reconstruction Mark L. Urken 2012-10-09 Illustrated with over 3,400 drawings and full-color photographs, this volume presents a unique multidisciplinary approach to head and neck reconstruction, combining input from otolaryngologists, plastic surgeons, oral and maxillofacial surgeons, maxillofacial prosthodontists, oculoplastic surgeons, speech and swallowing therapists, and metabolic support and nutrition specialists. For each anatomic region of the head and neck, the book defines the various defects from the reconstructive surgeon's point of view and presents actual cases demonstrating how each defect was reconstructed. In-depth discussions by leaders in the field allow the reader to appreciate the basic principles as well as the nuances of restoring each defect to an optimal level using regional flaps, free flaps, and prosthetic rehabilitation. The detailed case presentations show flap design and inset to achieve the final result. One of the key advances emphasized is the combination of implant technology and free tissue transfer to achieve the highest level of functional restoration. The reconstruction of patients following failure of radiation therapy is also extensively discussed.

**Atlas of Head and Neck Surgery E-Book** James I. Cohen 2011-06-06 Atlas of Head and Neck Surgery, by Drs. James I. Cohen and Gary L.
