State of The Global Workplace Gallup 2017-12-19 Only 15% of employees worldwide are engaged at work. This represents a major barrier to productivity for organizations everywhere – and suggests a staggering waste of human potential. Why is this engagement number so low? There are many reasons – but resistance to rapid change is a big one, Gallup's research and experience have discovered.

In particular, organizations have been slow to adapt to breakneck changes produced by information technology, globalization of markets for products and labor, the rise of the gig economy, and younger workers' unique demands. Gallup's 2017 State of the Global Workplace offers analytics and advice for organizational leaders in countries and regions around the globe who are trying to manage amid this rapid change. Grounded in decades of Gallup research and consulting worldwide -- and millions of interviews -- the report advises that leaders improve productivity by becoming far more employee-centered; build strengths-based organizations to unleash workers' potential; and hire great managers to implement the positive change their organizations need not only to survive – but to thrive.

Epic Bike Rides of the World Lonely Planet 2016-08-01 Lonely Planet: The world's leading travel guide publisher Discover 200 of the best places to ride a bike in this beautifully illustrated hardback. From family-friendly, sightseeing urban rides to epic adventures off the beaten track. Destinations range from France and Italy, for the world's great bike races, to the wilds of Mongolia and Patagonia. These journeys will inspire - whether you are an experienced cyclist or just getting started. The book is organised by continent. In the Americas we join a family bikepacking trip in Ecuador; we pedal the Natchez Trace Parkway and stop at legendary music spots; we ride the Pacific Coast Highway in Oregon and California; go mountain biking in Moab and Canada; and explore the cities of Buenos Aires and New York by bicycle. European rides include easy-going trips around Lake Constance, along the Danube and the Loire, and coast-to-coast routes; routes in Tuscany, Spain and Corsica; and professional journeys up Mt Ventoux and around the Tour of Flanders. In Asia, we venture through Vietnam's valleys; complete the Mae Hong Son circuit in northern Thailand; cross the Indian Himalayas; and pedal through Bhutan. And in Australia and New Zealand we take in Tasmania and Queensland by mountain bike; cycle into Victoria's high country and around Adelaide on road bikes; and try some of New Zealand's celebrated cycle trails. Each ride is illustrated with stunning photography and a map. A toolkit of practical details - where to start and finish, how to get there, where to stay and more - helps riders plan their own trips. There are also suggestions for three more similar rides around the world for each story. Each piece shows how cycling is a fantastic way to get to know a place, a people and their culture. Overtourism Claudio Milano 2019-06-07 This book examines the evolution of the phenomenon and explores the genesis of overtourism and the system dynamics underlining it. The 'overtourism' phenomenon is defined as the excessive growth of visitors leading to overcrowding and the consequential suffering of residents, due to temporary and often seasonal tourism peaks, that lead to permanent changes in lifestyles, amenities and well-being. Enormous tensions in overtourism affected destinations have driven the intensification of policy making and scholarly attention toward seeking antidotes to an issue that is considered paradoxical and problematic. Moving beyond the 'top 10 things you can do about overtourism', this book examines the evolution of the phenomenon and explores the genesis of overtourism as well as the system dynamics underpinning it. With a rigorous scientific approach, the book uses systems-thinking and contemporary paradigms around sustainable development, resilience planning and degrowth; while considering global economic, socio-political, environmental discourses. Researchers, analysts, policy makers and industry stakeholders working within tourism as well as those within the private sector, community groups, civil society groups and NGOs will find this book an essential source of information.

Uluru iMinds 2014-05-14 Learn about the history of Uluru, also known as Ayres Rock, in Australia with iMinds Travel's insightful fast knowledge series. Uluru is the indigenous Australian name for an enormous rock formation found in central Australia. Made from sandstone, Uluru is a rock monolith or an 'island mountain', a formation that geologists refer to as a monadnock. It stands 318 m (986 ft) high and has a circumference of 8 km (5 miles). It is located 335 km (208 mi) south west of the nearest rural centre, the large town of Alice Springs. The site was first mapped by Europeans in 1872 during the construction of the Australian Overland Telegraph Line that linked the northern settlement of Darwin to Port Augusta in South Australia. Uluru was originally named Mount Olga by Ernest Giles. On a separate expedition in 1870, the explorer William Gosse renamed the formation Ayers Rock in honour of the Chief Secretary of South Australia, Sir Henry Ayers. The name was made official until 1992, when it was renamed Uluru/Ayers Rock as an official dual title, honouring both the European and Aboriginal names. Uluru is, as Ernest Giles referred to it in 1872, the world's "most remarkable pebble." iMinds will tell you the story behind the place with its innovative travel series, transporting the armchair

traveller or getting you in the mood for discover on route to your destination. iMinds brings targeted knowledge to your eReading device with short information segments to whet your mental appetite and broaden your mind.

Night Noise Guidelines for Europe World Health Organization. Regional Office for Europe 2009 The WHO Regional Office for Europe set up a working group of experts to provide scientific advice to the Member States for the development of future legislation and policy action in the area of assessment and control of night noise exposure. The working group reviewed available scientific evidence on the health effects of night noise, and derived health-based guideline values. In December 2006, the working group and stakeholders from industry, government and nongovernmental organizations reviewed and reached general agreement on the guideline values and key texts for the final document of the "Night noise guidelines for Europe". Considering the scientific evidence on the thresholds of night noise exposure indicated by "Lnight,outside" [L suffix night,outside] as defined in the Environmental Noise Directive (2002/49/EC), an Lnight, outside of 40 dB should be the target of the night noise guideline (NNG) to protect the public, including the most vulnerable groups such as children, the chronically ill and the elderly. "Lnight,outside" value of 55 dB is recommended as an interim target for the countries where the NNG cannot be achieved in the short term for various reasons, and where policy-makers choose to adopt a stepwise approach. These guidelines are applicable to the Member States of the European Region, and may be considered as an extension to, as well as an update of, the previous WHO "Guidelines for community noise" (1999).
