Planning for Tourism Nigel D Morpeth 2015-05-01 This text provides an innovative approach to the pedagogy of contemporary planning processes within different cultural contexts globally. It adopts an innovative multi-disciplinary social science approach and through the inclusion of international case studies, considers the extent to which intelligent design has enabled the needs of disabled residents and visitors to have universal access to social spaces and facilities. In incorporating the consideration into the fabric of the book it will encourage the mainstreaming of universal design and accessible tourism, as keystones of planning processes within the C21st.

Volunteer Tourism in the Global South Wanda Vrasti 2013 This work explores the increasingly popular phenomenon of volunteer tourism in the Global South, paying particular attention to the governmental rationalities and socio-economic conditions that valorise it as a noble and necessary cultural practice. Combining theoretical research with primary data gathered during volunteering

programs in Guatemala and Ghana, the author argues that although volunteer tourism may not trigger social change, provide meaningful encounters with difference, or offer professional expertise, as the brochure discourse and the scholarly literature on tourism and hospitality often promises, the formula remains a useful strategy for producing the subjects and social relations neoliberalism requires. Vrasti suggests that the value of volunteer tourism should not to be assessed in terms of the goods and services it delivers to the global poor, but in terms of how well the practice disseminates entrepreneurial styles of feeling and action. Analysing the key effects of volunteer tourism, it is demonstrated that far from being a selfless and history-less rescue act, volunteer tourism is in fact a strategy of power that extends economic rationality, particularly its emphasis on entrepreneurship and competition, to the realm of political subjectivity. Volunteer Tourism in the Global South provides a unique and innovative analysis of the relationship between the political and personal dimensions of volunteer tourism and will be of great interest to scholars and students of international relations, cultural geography, tourism, and development studies.

Cultures and Globalization Helmut K Anheier 2012-03-31 Today is a new metropolitan age and for the first time ever more people live in cities than they do anywhere else. As cities strengthen their international and cultural influence, the global world is acted out most articulately in the world's urban hubs - through its diverse cultures, broad networks and innovative styles of governance. Looking at the city through its internal dynamics, the book examines how governance and cultural policy play out in a national and international framework. Making a truly global contribution to the literature, the editors bring together a truly international and highly-respected bevy of scholars. In doing so, they skilfully steer debates beyond the city as an economic powerhouse, to cover issues that fully comprehend a city's cultural dynamics and its impact on policy including alternative economies, creativity, migration, diversity, sustainability, education and urban planning. Innovative in its approach and content, this book is ideal for students, scholars and researchers interested in sociology, urban studies, cultural studies, and public policy.

Changes in Contemporary Ireland Catherine Rees 2014-09-26 This volume explores the cultural, literary, theatrical, and political changes in Irish society from 1980. The so-called 'Celtic Tiger' brought about cultural and economic rejuvenation in Ireland but this new found confidence and prosperity was destabilised by other events, such as the scandals in the Catholic Church, bringing into question the role of traditional institutions in contemporary Irish life. The ending of the Troubles and signing of the Good Friday Agreement similarly heralded a new era in terms of positive political change, but recent paramilitary activity threatens to undermine the progress made in the 1990s, as waves of new violence hit the North. Equally, recent economic recession has halted the radical growth seen in the Republic over recent decades. This book therefore problematises the concept of change and progress by juxtaposing these events, and asking what real changes can be traced in modern Ireland. The contributors frequently reflect on the changes and upheavals this period of dramatic economic, political and cultural change has prompted. The volume includes contributions from the fields of politics, cultural studies, sport, history, geography, media and film studies, and theatre and literature. As such it is a decidedly interdisciplinary study, exploring wide-ranging topics and issues relevant to contemporary Irish Studies.

This edited volume takes the dark tourism discussion to another level by reinforcing the critical intersecting domains of dark tourism and place identity and, in particular, highlighting the importance of understanding this connection for visitors and destination managers.

Tourism Management, Marketing, and Development Marcello M. Mariani 2016-04-29 Companies and destinations in the tourism sector are confronted with increasing managerial challenges and have to deal with a competitive, turbulent, and fast-changing environment. The understanding that both tourism companies and destinations endowed with the best assets (natural and cultural) cannot survive the escalating international competition without good managerial practices, has provided significant momentum for the development of the disciplinary field of tourism management in the last three decades. This volume recognizes the relevance of travel, tourism, and tourism activities as major economic drivers in the contemporary global economy, with a specific focus on performance, strategies, and sustainability. It is the collective intellectual effort of a number of international scholars, who cultivate original research on tourism management from a variety of theoretical perspectives. Together, they outline the importance for tourism companies and destinations to achieve and maintain a sustained competitive advantage by embracing sustainability and a Triple Bottom Line (TBL) approach to performance.

Sustaining Cultural Development Biljana Mickov 2016-04-01 In *Sustaining Cultural Development*, Biljana Mickov and James Doyle argue that effective programmes to promote greater participation in cultural life require substantial investment in research and strategic planning. Using studies from contributors throughout Europe, they look at ways to promote cultural life as the centre of the broader sustainable development of society. These studies illustrate how combining cultural identity, cultural diversity and creativity with increased participation of citizens in cultural life improves harmonized cultural development and promotes democracy. They indicate a shift from traditional governance of the cultural sector to a new, more horizontal, approach that links cultural workers at different levels in different sectors and different locations. This book will stimulate debate amongst cultural leaders, city managers and other policy makers, as well as serving as a resource for researchers and those teaching and learning on a range of post-graduate courses and programmes.

environmental impacts of various types of adventure tourism and how these can be best managed. This volume follows on from the authors previous textbook - 'Outdoor Recreation: Environmental Impacts and Management' and continues the aim of developing a deeper understanding of how tourist numbers impact the environment and to provide practical solutions to these problems. Combining their own first-hand experience and research with extensive literature review the authors' present several popular adventure tourism destinations from across the globe, including the Arctic, the Himalayas, Africa, Australia and Scotland as case studies.
