Looking Forward to the Bright Side Laila Faridoon 2018-04-15 We grow up in this life and live according to the rules of others around us. Most of us leave it to those others to determine how we live, while a lucky few recognize the need for the inner self to be in

control, rather than the outside world. We have seen and heard about many legends who went against the norm to prove themselves in this way. Fortunately, this is a path that we can all take to create the life we want! Each of us writes her/his own script for life without much awareness of who is truly in control - the mind or the person! From my own journey to know myself, I will share a roadmap that can help you know yourself on a much deeper basis. Looking Forward to the Bright Side has been written as a practical guide to look for the bright side in your life and learn how to master it, allowing you to create your own reality, manage it, and eventually reach your divine self...

The Autumn of the Middle Ages Johan Huizinga 2020-04-25 "Here is the first full translation into English of one of the 20th century's few undoubted classics of history." —Washington Post Book World The Autumn of the Middle Ages is Johan Huizinga's classic portrait of life, thought, and art in fourteenth- and fifteenth-century France and the Netherlands. Few who have read this book in English realize that The Waning of the Middle Ages, the only previous translation, is vastly different from the original Dutch, and incompatible with all other European-language translations. For Huizinga, the fourteenth- and fifteenth-century marked not the birth of a dramatically new era in history—the Renaissance—but the fullest, ripest phase of medieval life and thought. However, his work was criticized both at home and in Europe for being "old-fashioned" and "too literary" when The Waning of the Middle Ages was first published in 1919. In the 1924 translation, Fritz Hopman adapted, reduced and altered the Dutch edition—softening Huizinga's passionate

arguments, dulling his nuances, and eliminating theoretical passages. He dropped many passages Huizinga had quoted in their original old French. Additionally, chapters were rearranged, all references were dropped, and mistranslations were introduced. This translation corrects such errors, recreating the second Dutch edition which represents Huizinga's thinking at its most important stage. Everything that was dropped or rearranged has been restored. Prose quotations appear in French, with translations preprinted at the bottom of the page, mistranslations have been corrected. "The advantages of the new translation are so many. . . . It is one of the greatest, as well as one of the most enthralling, historical classics of the twentieth century, and everyone will surely want to read it in the form that was obviously intended by the author." —Francis Haskell, *New York Review of Books* "A once pathbreaking piece of historical interpretation. . . . This new translation will no doubt bring Huizinga and his pioneering work back into the discussion of historical interpretation." —Rosamond McKitterick, *New York Times Book Review*

Progress Johan Norberg 2017-04-06 A Book of the Year for The Economist and the Observer Our world seems to be collapsing. The daily news cycle reports the deterioration: divisive politics across the Western world, racism, poverty, war, inequality, hunger. While politicians, journalists and activists from all sides talk about the damage done, Johan Norberg offers an illuminating and heartening analysis of just how far we have come in tackling the greatest problems facing humanity. In the face of fear-mongering, darkness and division, the facts are unequivocal: the golden age is now.

The Oxford Handbook of Medieval Literature in English Elaine Treharne 2010-04-15 The study of medieval literature has experienced a revolution in the last two decades, which has reinvigorated many parts of the discipline and changed the shape of the subject in relation to the scholarship of the previous generation. 'New' texts (laws and penitentials, women's writing, drama records), innovative fields and objects of study (the history of the book, the study of space and the body, medieval masculinities), and original ways of studying them (the Sociology of the Text, performance studies) have emerged. This has brought fresh vigour and impetus to medieval studies, and impacted significantly on cognate periods and areas. The Oxford Handbook of Medieval Literature in English brings together the insights of these new fields and approaches with those of more familiar texts and methods of study, to provide a comprehensive overview of the state of medieval literature today. It also returns to first

principles in posing fundamental questions about the nature, scope, and significance of the discipline, and the directions that it might take in the next decade. Topics covered range from the canonical genres of Saints' lives, sermons, romance, lyric poetry, and heroic poetry; major themes including monstrosity and marginality, patronage and literary politics, manuscript studies and vernacularity are investigated; and there are close readings of key texts, such as Beowulf, Wulf and Eadwacer, and Ancrene Wisse and key authors from Ælfric to Geoffrey Chaucer, Langland, and the Gawain Poet.

News Framing through English-Chinese translation Nancy Xiuzhi Liu 2018-11-14 News Framing Through English-Chinese Translation provides a useful tool to depict how Chinese news translation can be examined in the era of globalization. The author has integrated framing theory in journalism studies with translation studies and developed a new theoretical model/framework named Transframing. This interdisciplinary model is pioneering and will make theoretical and conceptual contributions to translation studies. This book aims to reveal ideological, sociocultural and linguistic factors creating media discourse by examining Chinese media discourse, in comparison to its counterpart in English. Through the analysis of both quantitative and qualitative methods, it is concluded that the transframing model can be

applied to interpreting, describing, explaining as well as predicting the practice of news translation.

Going Forward by Looking Back Felix Riede 2020-09-01 Catastrophes are on the rise due to climate change, as is their toll in terms of lives and livelihoods as world populations rise and people settle into hazardous places. While disaster response and management are traditionally seen as the domain of the natural and technical sciences, awareness of the importance and role of cultural adaptation is essential. This book catalogues a wide and diverse range of case studies of such disasters and human responses. This serves as inspiration for building culturally sensitive adaptations to present and future calamities, to mitigate their impact, and facilitate recoveries.

Our International Education Sherry Marx 2015-12-17 What makes a person pack up and move to another country? What does she or he hope to gain from the experience? How do children fit into the picture? Our International Education presents the stories of three American women, a university professor, a high school math teacher, and a high school English as a second language teacher, who move to Hungary for a year to teach. Each woman brings her young children and enrolls them in local Hungarian public schools though none of them speak Hungarian at the beginning of the experience. The autoethnographic stories that make up Our International Education weave together the personal and professional dimensions of life abroad, illuminating not only the realities of negotiating work, school, and family life in another country, but also the complexities of cultural adjustment and second language acquisition. First-person storytelling makes this book a compelling read for those considering a move abroad with their family, and an excellent supplemental narrative for those studying second language acquisition, acculturation, autoethnography, and international education. "These interconnected stories of three women and their children living in Hungary offer an alternately uplifting and heartrending look at what families face when overseas. The co-authors present a deeply personal and vivid account of their bold adventure, from the initial thrill to the gradual revelation that life abroad is not always the carefree romp that some might perceive. Our International Education masterfully demonstrates the unequivocal impact of cross-cultural understanding." - Eleni Kounalakis, United States Ambassador to Hungary 2010-2013 and author of *Madam Ambassador: Three Years of Diplomacy, Dinner Parties, and Democracy in Budapest*.

Looking Forward Kenneth S. Keyes Jr. *Jacque Fresco* Looking Forward is an imaginative and fascinating book in which the authors take you on a journey into the culture and technology of the twenty-first century. After an introductory section that discusses the Things that Shape Your Future, you will explore the whys and wherefores of the unfamiliar, alarming, but exciting world of a hundred years from now. You will see this society through the eyes of Scott and Hella, a couple of the next century. Their living quarters are equipped with a cybernator, a seemingly magical computer device, but one that is based on scientific principles now known. It regulates sleeping hours, communications throughout the world, an incredible underwater living complex, and even the daily caloric intake of the "young" couple. (They are in their forties but can expect to live 200 years.) The world that Scott and Hella live

in is a world that has achieved full weather control, has developed a finger-sized computer that is implanted in the brain of every baby at birth (and the babies are scientifically incubated—the women of the twenty-first century need not go through the pains of childbirth), and that has perfected genetic manipulation that allows the human race to be improved by means of science. Economically, the world is Utopian by our standards. Jobs, wages, and money have long since been phased out. Nothing has a price tag, and personal possessions are not needed. Nationalism has been surpassed, and total disarmament has been achieved; educational technology has made schools and teachers obsolete. The children learn by doing, and are independent in this friendly world by the time they are five. The chief source of this greater society is the Correlation Center, “Corcen,” a gigantic complex of computers that serves but never enslaves mankind. Corcen regulates production, communication, transportation and all other burdensome and monotonous tasks of the past. This frees men and women to achieve creative challenging experiences rather than empty lives of meaningless leisure. Obviously this book is speculative, but it is soundly based upon scientific developments that are now known. And as the authors state: “You will understand this book best if you are one who sees today only as a stepping stone between yesterday and tomorrow. You will need a sensitivity to the injustices, lost opportunities for happiness, and searing conflicts that characterize our twentieth-century civilization. If your mind can weigh new ideas and evaluate them with insight, this book is for you. “We have no crystal ball. ... We want you to feed our ideas into your own computer, so that you can find even better ideas that may play a part in molding the future of our civilization.”
