Clinical Guidelines on the Identification, Evaluation, and Treatment of Overweight and Obesity in Adults
Expert Panel on the Identification, Evaluation, and Treatment of Overweight and Obesity in Adults (U.S.)
1998 Of evidence-based recommendations -- Introduction -- Overweight and obesity: background -- Examination of randomized controlled trial evidence -- Treatment guidelines -- Summary of recommendations -- Future research.

The Photomontages of Hannah Höch Hannah Höch 1996 Here, in the first comprehensive survey of her work by an American museum, authors Peter Boswell, Maria Makela, and Carolyn Lanchner survey the full scope of Hoch's half-century of experimentation in photomontage - from her politically charged early works and intimate psychological portraits of the Weimar era to her later forays into surrealism and abstraction.

Methodological Aspects of Iranian Archaeology Kamal Aldin Niknami 2000 A history and overview of the state of archaeological research in Iran from its beginnings to the present day. Kamal Aldin Niknami assesses recent developments in western archaeology and their impact or influence on Near Eastern practices. At times impartial, sometimes critical, especially of the absence of scientific methods and the lack of inter-disciplinary projects, the author presents a thorough assessment of traditional approaches as well as current issues and priorities for the future.

Literature for Young Children Joan I. Glazer 2000 This broad introduction to early childhood literature focuses on literacy analysis and on specific techniques and methods of effective literature-based education. Updates references of children's books that readers can use as examples of quality literature. Strengthens coverage of several areas including nonfiction, multicultural/international literature, and the use of literature in integrated teaching for the primary grades. For educators and school administrators.

Berlin Coquette Jill Suzanne Smith 2014-05-15 During the late nineteenth century the city of Berlin developed such a reputation for lawlessness and sexual licentiousness that it came to be known as the "Whore of Babylon." Out of this reputation for debauchery grew an unusually rich discourse around prostitution. In *Berlin Coquette*, Jill Suzanne Smith shows how this discourse transcended the usual

clichés about prostitutes and actually explored complex visions of alternative moralities or sexual countercultures including the "New Morality" articulated by feminist radicals, lesbian love, and the "New Woman." Combining extensive archival research with close readings of a broad spectrum of texts and images from the late Wilhelmine and Weimar periods, Smith recovers a surprising array of productive discussions about extramarital sexuality, women's financial autonomy, and respectability. She highlights in particular the figure of the cocotte (Kokotte), a specific type of prostitute who capitalized on the illusion of respectable or upstanding womanhood and therefore confounded easy categorization. By exploring the semantic connections between the figure of the cocotte and the act of flirtation (of being coquette), Smith's work presents flirtation as a type of social interaction through which both prostitutes and non-prostitutes in Imperial and Weimar Berlin could express extramarital sexual desire and agency.

Biological Diversity: Current Status and Conservation Policies Vinod Kumar 2021-10-25 The present book has been designed to bind prime knowledge of climate change-induced impacts on various aspects of our environment and its biological diversity. The book also contains updated information, methods and tools for the monitoring and conservation of impacted biological diversity.

A Room of One's Own Virginia Woolf 2020-10-12 In October 1928 Virginia Woolf was asked to deliver speeches at Newnham and Girton Colleges on the subject of 'Women and Fiction'; she spoke about her conviction that 'a woman must have money and a room of her own if she is to write fiction'. The following year, the two speeches were published as *A Room of One's Own*, and became one of the foremost feminist texts. Knitted into a polished argument are several threads of great importance – women and learning, writing and poverty – which helped to establish much of feminist thought on the importance of education and money for women's independence. In the same breath, Woolf brushes aside critics and sends out a call for solidarity and independence – a call which sent ripples well into the next century. 'Brilliant interweaving of personal experience, imaginative musing and political clarity' — Kate Mosse, *The Guardian* 'Probably the most influential piece of non-fictional writing by a woman in this century.' — Hermione Lee, *The Financial Times*

In the Light of Amarna Ägyptisches Museum und Papyrussammlung 2012 An accompaniment to the Egyptian Museum of Berlin's special exhibition celebrating the discovery of the Nefertiti bust in 1912, this catalog presents never-before-seen artifacts and objects from the Amarna period of Egyptian history. The book also explores religion, craftsmanship, daily life, and sculpture in Amarna and the world famous Nefertiti bust.

Communication Yearbook 14 James A. Anderson 2012-03-22 *Communication Yearbook 14*, originally published in 1991 delves into research concerned with: audiences - their effect on the mass media and how the mass media effect them; the quality of mass media performance and public opinion; the study of contemporary media from an organization studies approach; the implications of propaganda; the pressure of public opinion; and media agenda setting, among other issues. Commentaries provide refreshing viewpoints to each chapter, enhancing each chapter with complementary, or sometimes competing perspectives. Once again Anderson has brought together an internationally distinguished team of contributors who have created a forum for discussing cutting-edge topics in the field.

Anthropology of Color Robert E. MacLaury 2007-11-21 The field of color categorization has always been

Downloaded from avenza-dev.avenza.com
on September 29, 2022 by guest

intrinsically multi- and inter-disciplinary, since its beginnings in the nineteenth century. The main contribution of this book is to foster a new level of integration among different approaches to the anthropological study of color. The editors have put great effort into bringing together research from anthropology, linguistics, psychology, semiotics, and a variety of other fields, by promoting the exploration of the different but interacting and complementary ways in which these various perspectives model the domain of color experience. By so doing, they significantly promote the emergence of a coherent field of the anthropology of color. As of February 2018, this e-book is freely available, thanks to the support of libraries working with Knowledge Unlatched.

Veterinary Epidemiology Michael Thrusfield 2013-04-24 This successful book, now in its third edition, continues to provide a comprehensive introduction to the role of epidemiology in veterinary medicine. Since the publication of the second edition there has been considerable expansion in the application of veterinary epidemiology: more quantitative methods are available, challenges such as the epidemic of foot-and-mouth disease in Europe in 2001 have required epidemiological investigation, and epidemiological analyses have taken on further importance with the emergence of evidence-based veterinary medicine. In this edition: Completely revised and expanded chapters; Increased attention given to the principles and concepts of epidemiology, surveillance, and diagnostic-test validation and performance; Many examples are drawn from both large and small animal medicine, and from the developing as well as the developed world This paperback edition includes a new section on risk analysis. Veterinary Epidemiology is an invaluable reference source for veterinary general practitioners, government veterinarians, agricultural economists and members of other disciplines interested in animal disease. It will also be essential reading for undergraduate and intermediate-level postgraduate students of epidemiology.

Linguistics and the Study of Comics Frank Bramlett 2012-05-09 Do Irish superheroes actually sound Irish? Why are Gary Larson's Far Side cartoons funny? How do political cartoonists in India, Turkey, and the US get their point across? What is the impact of English on comics written in other languages? These questions and many more are answered in this volume, which brings together the two fields of comics research and linguistics to produce groundbreaking scholarship. With an international cast of contributors, the book offers novel insights into the role of language in comics, graphic novels, and single-panel cartoons, analyzing the intersections between the visual and the verbal. Contributions examine the relationship between cognitive linguistics and visual elements as well as interrogate the controversial claim about the status of comics as a language. The book argues that comics tell us a great deal about the sociocultural realities of language, exploring what code switching, language contact, dialect, and linguistic variation can tell us about identity - from the imagined and stereotyped to the political and real.

Invisible Search and Online Search Engines Jutta Haider 2019-03-04 *Invisible Search and Online Search Engines* considers the use of search engines in contemporary everyday life and the challenges this poses for media and information literacy. Looking for mediated information is mostly done online and arbitrated by the various tools and devices that people carry with them on a daily basis. Because of this, search engines have a significant impact on the structure of our lives, and personal and public memories. Haider and Sundin consider what this means for society, whilst also uniting research on information retrieval with research on how people actually look for and encounter information. Search engines are now one of society's key infrastructures for knowing and becoming informed. While their use is dispersed across myriads of social practices, where they have acquired close to naturalised positions, they are

commercially and technically centralised. Arguing that search, searching, and search engines have become so widely used that we have stopped noticing them, Haider and Sundin consider what it means to be so reliant on this all-encompassing and increasingly invisible information infrastructure. *Invisible Search and Online Search Engines* is the first book to approach search and search engines from a perspective that combines insights from the technical expertise of information science research with a social science and humanities approach. As such, the book should be essential reading for academics, researchers, and students working on and studying information science, library and information science (LIS), media studies, journalism, digital cultures, and educational sciences.

The J. Paul Getty Museum Journal The J. Paul Getty Museum 1993-01-28 The J. Paul Getty Museum Journal has been published annually since 1974. It contains scholarly articles and shorter notes pertaining to objects in the Museum's seven curatorial departments: Antiquities, Manuscripts, Paintings, Drawings, Decorative Arts, Sculpture and Works of Art, and Photographs. The Journal also contains an illustrated checklist of the Museum's acquisitions for the previous year, a staff listing, and a statement by the Museum's Director outlining the year's most important activities. Volume 19 of the J. Paul Getty Museum Journal includes articles by Nicholas Penny, Ariane van Suchtelen, Thomas DaCosta Kaufmann and Virginia Roehrig Kaufmann, Frits Scholten, David Harris Cohen, and Dawson W. Carr.

A Functional Biology of Parasitism G.W. Esch 2013-03-07 Series Editor: Peter Calow, Department of Zoology, University of Sheffield, England The main aim of this series will be to illustrate and to explain the way organisms 'make a living' in nature. At the heart of this - their functional biology - is the way organisms acquire and then make use of resources in metabolism, movement, growth, reproduction, and so on. These processes will form the fundamental framework of all the books in the series. Each book will concentrate on a particular taxon (species, family, class or even phylum) and will bring together information on the form, physiology, ecology and evolutionary biology of the group. The aim will be not only to describe how organisms work, but also to consider why they have come to work in that way. By concentration on taxa which are well known, it is hoped that the series will not only illustrate the success of selection, but also show the constraints imposed upon it by the physiological, morphological and developmental limitations of the groups. Another important feature of the series will be its organismic orientation. Each book will emphasize the importance of functional integration in the day-to-day lives and the evolution of organisms. This is crucial since, though it may be true that organisms can be considered as collections of gene-determined traits, they nevertheless interact with their environment as integrated wholes and it is in this context that individual traits have been subjected to natural selection and have evolved.

Standard Atlas of Oakland County, Michigan Geo a Ogle & Co 2021-09-10 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Cryptology and the Winds Message Controversy Robert J. Hanyok 2008 The Japanese attack on Hawaii provoked the never-ending story. Multiple official investigations and private historical inquiries into the attack and its background have generated enormous stocks of info. about both the American and Japanese sides. Even so, info. gaps still exist, and many important questions remain under debate. The authors of this report have focused on two of the event's controversies, the Winds Message and the state of U.S. communications intelligence prior to the Hawaiian attack. This assemblage of documents, supplemented by the authors' clear guide to their meaning, places the reader right in the middle of the behind-the-scenes events and helps the scholar and researcher to follow them closely. Illustrations.

Invasive Species in the Pacific Greg Sherley 2000

Native But Foreign Brenden W. Rensink 2018 Foreword / by Sterling Evans -- Acknowledgments -- Prologue -- Introduction: Comparing the US-Canadian and US-Mexican borderlands and the transnational natives who crossed them -- Homelands, transnational worlds, labor, and border encounters -- Crees, Chippewas, and Yaquis in early transnational contexts -- Transnational encounters and evolving prejudice in Montana and Arizona, 1800-1900 -- Native peoples as "foreign" refugees and immigrants -- Yaqui refugees and American response, 1880s-1910s -- Cree refugees and American response, 1885-1888 -- Native struggles to make American homelands -- Crees in limbo and deportation, 1889-1900 -- Arizona Yaquimi and integration in the United States, 1900s-1950s -- Yaqui legality and belonging in Arizona, 1900-1950s -- Cree and Chippewa attempts at permanent Montana settlement, 1900-1908 -- New allies, new efforts, and final resolutions -- Cree and Chippewa legislative battles and victories, 1908-1916 -- Yaqui struggle for land and federal tribal recognition, 1962-1980

Report of the Federal Courts Study Committee Judicial Conference of the United States. Federal Courts Study Committee 1990

All One System Harold L. Hodgkinson 1985 This report is a demographic study of the United States education system from kindergarten through post-graduate education. Part 1 provides a briefing on the major demographic trends that form the framework of the analysis in terms of: (1) number of births in different groups; (2) rate of age increase in various groups due to varying birth rates; (3) changes in family status; (4) differences in educational needs by region; and (5) education, including educational supply and job demand, and the growing need for day care and early childhood programs such as Head Start. Part 2 concerns the retention of students through the school system to high school graduation. Part 3 concerns the accessibility of college to different socioeconomic groups. Part 4 discusses retention of students through college graduation in the context of the number of years it takes students to reach that goal. Throughout, suggestions are offered on how to deal with the impact of increased minorities in the educational system and how best to structure curricula to better educate the population as a whole. (CG)

Thinking About Psychology Charles T. Blair-Broeker 2003-03-21 This book will be an ally for teachers striving to ignite a passion in their students for psychology's many relevant findings, and for students wanting to satisfy a growing curiosity about themselves, their families, their friends, and the world of people around them.

Text Types and the History of English Manfred Görlach 2004-01-01 The history of modern European languages has been largely determined by the range of functions they have acquired, particularly after

Downloaded from avenza-dev.avenza.com
on September 29, 2022 by guest

1500. This development necessitated a notable expansion of their syntax and lexis, but is most characteristically reflected in the conventionalization of text types. Starting from the German concept of Textsorte as developed from the 1960s onwards, the present account is a first comprehensive attempt at charting the field for the history and present-day situation of the English language. In text types, a designation is linked with a more or less stable form which guides the writer's production as well as the reader's expectation, permitting one to recognize straightforward uses as well as deliberate misuses. Some two thousand of such designations are here listed with minimal definitions and dates for first occurrences. The discussion then concentrates on selected types, which are seen as especially illustrative for English: book dedications, cooking recipes, advertisements, church hymns, lexical entries, and jokes. Their functions and development over time are treated in correlation with their specific linguistic characteristics and adaptations to different period styles and social changes in the readership. The functional range of text types in traditions outside England and the consequences of the export of English categories are exemplified by the history of Scots/Scottish English and of English in India. The arguments are accompanied by a lavish supply of textual excerpts and more than fifty pages of facsimiles, which are especially relevant for insights derived from typographical features. A full bibliography and indices are provided at the end. The book will prove useful for decisions on the constitution of representative text corpora and stimulate research into a greater number of individual text types as well as contrastive analyses at least among European languages.

Water Quality World Health Organization 2001-07 The quality of water, whether it is used for drinking, irrigation or recreational purposes, is significant for health in both developing and developed countries worldwide. This book is based on a programme of work undertaken by an international group of experts during 1999-2001. The aim was to develop a harmonised framework of effective and affordable guidelines and standards to improve the risk assessment and management of water-related microbial hazards. This book will be useful to all those concerned with issues relating to microbial water quality and health, including environmental and public health scientists, water scientists, policy makers and those responsible for developing standards and regulations.

Chinese Reverse Glasspainting 1720-1820 Thierry Audric 2020-04-15 Displaying a talent for combining aesthetic sensibility with scientific rigor, the author has given new life to something that once excited European passions: an original, non-academic art at the forefront of the 'new technology' of the time. For decades, aristocrats of the Old World and then American collectors (the latter at the end of the eighteenth and beginning of the nineteenth centuries) spent countless sums on the purchase of these works, which were worth a fortune. These wealthy collectors of curiosities of all types were also most certainly great dreamers seeking a worthy setting for their dreams. Unbeknownst to them, their endeavours had much greater scope, creating and nourishing the conditions for a rare encounter between two worlds: a golden age of atypical collaboration, a combined adventure between China and Europe.

The German Perfect R. Musan 2012-12-06 1. OUTLINE German has the three main perfect constructions which are illustrated in (1. 1). 1 In each of these constructions, the verb appears in the past participial form and is combined with an auxiliary - in this case, haben ('have'); other verbs form their perfect constructions with the auxiliary sein ('be'). 2 The auxiliary can then be combined with a tense -Le. the present tense as in (Ua), the past tense as in (b), or the future tense as in (c). 3 (1. 1) a. PRESENT PERFECT: Die Eule hat die Schule verlassen. the owl has the school left b. PAST PERFECT: Die Eule hatte die Schule verlassen. the owl had the school left c. FUTURE PERFECT: Die Eule wird die Schule verlassen haben. the owl will the school left have As will shortly become clear, the present perfect is the most intricate of the perfect constructions in German. It has been investigated intensely in the past, with the result that today there is little doubt about what the core problems concerning its semantics are.

1794. History of Muskingum County, Ohio, with Illustrations and Biographical Sketches of Prominent Men and Pioneers J F Everhart 2019-08-10 This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. We have represented this book in the same form as it was first published. Hence any marks seen are left intentionally to preserve its true nature.

Aquatic Dicotyledons of North America Donald H. Les 2017-09-01 *Aquatic Dicotyledons of North America: Ecology, Life History, and Systematics* brings together a wealth of information on the natural history, ecology, and systematics of North American aquatic plants. Most books on aquatic plants have a taxonomic focus and are intended primarily for identification. Instead, this book provides a comprehensive overview of the biology of major aquatic species by compiling information from numerous

sources that lie scattered among the primary literature, herbarium databases, and other reference materials. Included dicotyledon species are those having an obligate (OBL) wetland status, a designation used in the USACE National Wetland Plant List. Recent phylogenetic analyses are incorporated and rationale is provided for interpreting this information with respect to species relationships. This diverse assemblage of information will be useful to a wide range of interests including academic researchers, wildlife managers, students, and virtually anyone interested in the natural history of aquatic and wetland plants. Although focusing specifically on North America, the cosmopolitan distribution of many aquatic plants should make this an attractive text to people working virtually anywhere outside of the region as well. This book is an essential resource for assisting with wetland delineation.
