War Through the Ages Lynn Montross 1960 "This book is unique -- the stirring story of war in all its phases from 490 B.C. to our own day. Since its first appearance fifteen years ago it has become a classic, a storehouse of military lore for the specialist and layman alike. The present edition is thoroughly revised and greatly enlarged. The World War II chapter have been rewritten to make use of sources not available earlier, particularly German and Japanese documents and memoirs. Completely new material has been added, covering more recent events such as the cold war between the Communist states and Western nations, the shooting war in Korea, and the Lebanon intervention. There is a full chronological table as well as a full bibliography of sources in chronological order, and new diagrams and maps make a total of nearly 140 illustrations. Mr. Montross is superbly readable because in telling his story he never loses sight of the fact that wars are waged by men. He is concerned first of all with people, with those who fought and the great conquerors who led them." -- Book jacket.

Marilyn Manson by Perou 2020-05-19 'I often get asked, 'Who was your favorite person to photograph?' or 'Who is the best person you've photographed?'' says photographer Perou. 'It's always 'Marilyn Manson.' Which is just as well, considering how many times I've photographed him.' Perou has been photographing Marilyn Manson since a 1998 magazine cover shoot. Twenty-one years of collaborating have resulted in this unique book, featuring over 350 photographs including previously unpublished work, conceptual portraits, onstage and informal behind-the-scenes images, giving a rare insight into Manson's world.

Lost Downtown Peter Hugar 2016-02 It's a vanished world, and Peter Hugar was right there in it. The Lower East Side between 1972 and 1985 -- filled with artists, wannabe artists and hangers-on -- was a community of the misbegotten gathered from every town in America and relocated in the mean streets between Broadway and the Bowery. Nothing but their talent, their flamboyance, their rank gender-bending mockery and their arch irony supported them. Some made their names. Many came to grief. A few made art. In those days, the gutted streets of the Lower East Side looked like a war zone. Everyone lived and worked on the extreme outer margins of money and art, penniless and unknown. As a community, Downtown was a counterstatement to the rich New York of the banks, museums, media, corporations ... and the art world itself. That Downtown is forever gone. Time, gentrification, disease and death have taken their toll and turned this vibrant epoch into a chapter of art history. But before it vanished, its extravagant cast sat for Peter Hugar's camera -- and is now alive

From Carnac to Callanish Aubrey Burl 1993-01-01 This book discusses the lines of standing stones that until now have been the neglected wonders of prehistoric Europe, rows that were foci of rituals in Britain, Ireland and Brittany for over two thousand years. Places such as Carnac in Brittany and Callanish in the Hebrides are visited by many visitors each year, but before now there has been no book that seriously explains the history, significance and background to these impressive sites. Aubrey Burl shows that the settings vary from pairs of isolated stones in the far south-west of Ireland to networks of long lines in Scotland, Dartmoor and Brittany, and describes the types in a sequence of architectural chapters that stress the increasing social and commercial connections between regions hundred of miles apart. He uses information from a wide variety of sources - excavation reports, megalithic art, astronomical analyses and legends - to provide explanations of why the rows were erected, when, and what they may have been used for.

Ultima Thule Vilhjalmur Stefansson 2019-09-27 Pytheas, around whom centers the question of Thule, was considered for two thousand years the champion liar of antiquity. After perhaps the most overdue of rehabilitations, he is now in our books and belief an outstanding leader in Greek science and a foremost explorerthe earliest of the known great explorers. If he appears to us less than Columbus in some ways he appears greater in others, particularly as a scientist. He has been referred to as a Columbus with a flavor of Darwin; he appears to have been more nearly a composite of James Cook and Galileo.

The Significance of Monuments Richard Bradley 2012-12-06 The Neolithic period, when agriculture began and many monuments - including Stonehenge - were constructed, is an era fraught with paradoxes and ambiguities. Starting in the Mesolithic and carrying his analysis through to the Late Bronze Age, Richard Bradley sheds light on this complex period and the changing consciousness of these prehistoric peoples. The Significance of Monuments studies the importance of monuments tracing their history from their first creation over six thousand years later. Part One discusses how monuments first developed and their role in developing a new sense of time and space among the inhabitants of prehistoric Europe. Other features of the prehistoric landscape - such as mounds and enclosures - across Continental Europe are also examined. Part Two studies how such monuments were modified and reinterpreted to suit the changing needs of society through a series of detailed case studies. The Significance of Monuments is an indispensable text for all students of European prehistory. It is also an enlightening read for professional archaeologists and all those interested in this fascinating period.

The Archaeology of People A. W. R. Whittle 2003 Alasdair Whittle argues for the complexity & fluidity of life in the Neolithic, through a combination of archaeological & anthropological case studies & current theoretical debate. He highlights the multiple dimensions which simultaneously constituted Neolithic existence in complicated situations.

The Past in Prehistoric Societies Richard Bradley 2014-03-18
The idea of prehistory dates from the nineteenth century, but Richard Bradley contends that it is still a vital area for research. He argues that it is only through a combination of oral tradition and the experience of encountering ancient material culture that people were able to formulate a sense of their own pasts without written records. *The Past in Prehistoric Societies* presents case studies which extend from the Palaeolithic to the early Middle Ages and from the Alps to Scandinavia. It examines how archaeologists might study the origin of myths and the different ways in which prehistoric people would have inherited artefacts from the past. It also investigates the ways in which ancient remains might have been invested with new meanings long after their original significance had been forgotten. Finally, the author compares the procedures of excavation and field survey in the light of these examples. The work includes a large number of detailed case studies, is fully illustrated and has been written in an extremely accessible style.
