Of Revelation and Revolution, Volume 2 John L. Comaroff 2009-02-15 In the second of a proposed three-volume study, John and Jean Comaroff continue their exploration of colonial evangelism and modernity in South Africa. Moving beyond the opening moments of the encounter between the British Nonconformist missions and the Southern Tswana peoples, *Of Revelation and Revolution, Volume II*, explores the complex transactions—both epic and ordinary—among the various dramatis personae along this colonial frontier. The Comaroffs trace many of the major themes of twentieth-century South African history back to these formative encounters. The relationship between the British evangelists and the Southern Tswana engendered complex exchanges of goods, signs, and cultural markers that shaped not only African existence but also bourgeois modernity "back home" in England. We see, in this volume, how the colonial attempt to "civilize" Africa set in motion a dialectical process that refashioned the everyday lives of all those drawn into its purview, creating hybrid cultural forms and potent global forces which persist in the postcolonial age. This fascinating study shows how the initiatives of the colonial missions collided with local traditions, giving rise to new cultural practices, new patterns of production and consumption, new senses of style and beauty, and new forms of class distinction and ethnicity. As noted by reviewers of the first volume, the Comaroffs have succeeded in providing a model for the study of colonial encounters. By insisting on its dialectical nature, they demonstrate that colonialism can no longer be seen as a one-sided relationship between the conquering and the conquered. It is, rather, a complex system of reciprocal determinations, one whose legacy is very much with us today.

The Palgrave Handbook of Africa and the Changing Global Order Samuel Ojo Oloruntoba 2021-11-22 This handbook fills a large gap in the current knowledge about the critical role of Africa in the changing global

order. By connecting the past, present, and future in a continuum that shows the paradox of existence for over one billion people, the book underlines the centrality of the African continent to global knowledge production, the global economy, global security, and global creativity. Bringing together perspectives from top Africa scholars, it actively dispels myths of the continent as just a passive recipient of external influences, presenting instead an image of an active global agent that astutely projects soft power. Unlike previous handbooks, this book offers an eclectic mix of historical, contemporary, and interdisciplinary approaches that allow for a more holistic view of the many aspects of Africa's relations with the world.

The African National Congress and the Regeneration of Political Power Susan Booyesen 2011-11-11 The African National Congress is light years beyond the liberation movement of old. It remains a juggernaut, but its control and dominance are no longer watertight. The ANC lives the contradictions of weaknesses, cracks and factions while retaining its colossal status. As a party-movement it draws on its liberation credentials, and extracts immense power from its deep anchorage in South Africa's people. It is immersed in electoral politics that marks the state of its overwhelming power cyclically. As government the ANC is the object of protest, but not protest designed to bring the ruling party to its knees. The ANC is in command of the state, yet fails to definitively counter the deficits that make South Africa's democracy seem so diluted. Its incredulous and thus far trusting supporters condemn but only rarely punish deployees who do not 'pass through the eye of the needle'. The ANC and the Regeneration of Political Power unpacks these contradictions. It focuses on four faces of the ANC's political power – the organisation, the people, political parties and elections, and policy and government – and explores how the ANC has acted since 1994 to continuously regenerate its power. By 2011-12 the power configurations around the ANC were converging to a conjuncture holding vexing uncertainties. This book presents insights into how South African politics – in many ways synonymous with the politics of the ANC – is likely to unfold in years and possibly decades to come.

Becoming a teacher Josef de Beer 2020-12-31 This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the ‘elephant in the room’. These authors note that ‘the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road’. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the ‘gap’ that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where “safe spaces” or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

Strategic Management: A Cross-Functional Approach Porth 2011-06-27 Good strategic managers are capable of seeing the big picture and managing across the whole organization -- that is the message of *Strategic Management: A Cross-Functional Approach*. This text shows students that successful strategic management requires an ability to see the organization as a whole--to step out of the functional silos that students tend to acquire through previous work experience or prior courses, and see the organization in a new way. To be good strategic thinkers, people from a marketing or HR background need to understand financials and how to use them, and finance and accounting people need to see that customer and employee relationships are the lifeblood of the organization. Strategic Management is unique in covering the research, tools, and theory of strategic management - taking a cross-functional and integrative perspective, by focusing on value creation for customers, employees, and owners/stockholders. This concept, called the customer-employee-owner cycle, is introduced in Chapter 1 and serves as an organizing framework throughout the book. Each chapter is brought to life for students with a "focus company," used as a running example to illustrate and enliven the material in the chapter. Focus companies include organizations students are familiar with and interested in, such as Nike, Microsoft, Wal-Mart, John & Johnson, and the Walt Disney Company.

African Rhino Richard Emslie 1999 The black and the white rhinoceros have become flagship species for international conservation. They are significant not only for the continuation of a major evolutionary heritage, but also as symbols for the protection of African savannahs. The battle for the survival of these species has been marked by some notable successes and sadly, many failures, and the situation is still critical. The international horn trade ban and the domestic bans imposed in most traditional user states have driven the trade further underground, in some cases inflating prices and making illegal dealing even more lucrative. This Plan is aimed at donors, government and non-government organizations, and all those involved in rhino conservation. It outlines the actions and strategies needed to catalyse support for these majestic animals, and help secure their future in sub-Saharan Africa. The overall conclusion is that, given the political will, stability and adequate field expenditure, rhinos can be conserved in the wild.

Democracy Compromised Lungisile Ntsebeza 2005-06-01 Democracy Compromised is about traditional authorities (chiefs of various ranks) in a democracy. The book addresses mainly two integrally related questions. First, how despite their role in the apartheid state, traditional authorities have not only survived, but have won unprecedented powers in rural governance in South Africa's democracy, and, secondly, how they derive their authority. It argues that chieftaincy has always been contested and that it has throughout its history since the advent of colonialism been dependent on the support of the state. Their role in the land allocation process is central to our understanding, not only of the survival of traditional authorities, but on how they derived their authority. The book will be of particular interest to academics, researchers, students, activists and policy makers.

We Are Fighting the World Gary Kynoch 2005-01-01 Since the late 1940s, a violent African criminal society known as the Marashea has operated in and around South Africa's gold mining areas. With thousands of members involved in drug smuggling, extortion, and kidnapping, the Marashea was more influential in the day-to-day lives of many black South Africans under apartheid than were agents of the state. These gangs remain active in South Africa. In *We Are Fighting the World: A History of the Marashea Gangs in South Africa, 1947–1999*, Gary Kynoch points to the combination of coercive force and administrative weakness that characterized the apartheid state. As long as crime and violence were contained within black townships and did not threaten adjacent white areas, township residents were largely left to fend for themselves. The Marashea's ability to prosper during the apartheid era and its involvement in political conflict led directly to the violent crime epidemic that today plagues South Africa. Highly readable and solidly researched, *We Are Fighting the World* is critical to an understanding of South African society, past and present. This pioneering study challenges previous social history research on resistance, ethnicity, urban spaces, and gender in South Africa. Kynoch's interviews with many current and former gang members give *We Are Fighting the World* an energy and a realism that are unparalleled in any other published work on gang violence in southern Africa.

Africa's Soft Power Oluwaseun Tella 2021-05-23 This book investigates the ways in which soft power is used by African countries to help drive global influence. Selecting four of the countries most associated with soft power across the continent, this book delves into the currencies of soft power across the region: from South Africa's progressive constitution and expanding multinational corporations, to Nigeria's Nollywood film industry and Technical Aid Corps (TAC) scheme, Kenya's sport diplomacy, fashion and tourism industries, and finally Egypt's Pan-Arabism and its reputation as the cradle of civilisation. The book asks how soft power is wielded by these countries and what constraints and contradictions they encounter. Understandings of soft power have typically been driven by Western scholars, but throughout this book, Oluwaseun Tella aims to Africanise our understanding of soft power, drawing on prominent African philosophies, including Nigeria's Omolúwàbí, South Africa's Ubuntu, Kenya's Harambee, and Egypt's Pharaonism. This book will be of interest to researchers from across political science, international relations, cultural studies, foreign policy and African Studies. Strategic Management Allen Amason 2011-03-17 Leadership, adaptability, value creation. These are the skills necessary for tomorrow's managers. Allen Amason approaches the topic of strategic management with these traits in mind. Rather than simply teaching theory and research, he seeks to communicate to them the fundamental keys to how strategy works. This book is designed to help students think critically and understand fully how to strategically manage their future firms. In so doing, it will enable them to adapt and learn, even as their circumstances change; to apply sound logic and reasoning, even in new and unfamiliar

settings. By conveying enduring and fundamental principles of economic and human behavior rather than simply reporting on the latest innovations, this book succeeds in preparing students to excel in the business environment over time, regardless of how it evolves.

The Truth about Crime Jean Comaroff 2016-12-05 In this book, renowned anthropologists Jean and John L. Comaroff make a startling but absolutely convincing claim about our modern era: it is not by our arts, our politics, or our science that we understand ourselves—it is by our crimes. Surveying an astonishing range of forms of crime and policing—from petty thefts to the multibillion-dollar scams of too-big-to-fail financial institutions to the collateral damage of war—they take readers into the disorder of the late modern world. Looking at recent transformations in the triangulation of capital, the state, and governance that have led to an era where crime and policing are ever more complicit, they offer a powerful meditation on the new forms of sovereignty, citizenship, class, race, law, and political economy of representation that have arisen. To do so, the Comaroffs draw on their vast knowledge of South Africa, especially, and its struggle to build a democracy founded on the rule of law out of the wreckage of long years of violence and oppression. There they explore everything from the fascination with the supernatural in policing to the extreme measures people take to prevent home invasion, drawing illuminating comparisons to the United States and United Kingdom. Going beyond South Africa, they offer a global criminal anthropology that attests to criminality as the constitutive fact of contemporary life, the vernacular by which politics are conducted, moral panics voiced, and populations ruled. The result is a disturbing but necessary portrait of the modern era, one that asks critical new questions about how we see ourselves, how we think about morality, and how we are going to proceed as a global society.
