Prismatic Ecology Jeffrey Jerome Cohen 2013-12-01 Emphasizing sustainability, balance, and the natural, green dominates our thinking about ecology like no other color. What about the catastrophic, the disruptive, the inaccessible, and the excessive? What of the ocean's turbulence, the fecundity of excrement, the solitude of an iceberg, multihued contaminations? Prismatic Ecology moves beyond the accustomed green readings of ectheory and maps a colorful world of ecological possibility. In a series of linked essays that span place, time, and discipline, Jeffrey Jerome Cohen brings together writers who illustrate the vibrant worlds formed by colors. Organized by the structure of a prism, each chapter explores the coming into existence of nonanthropocentric ecologies. "Red" engages sites of animal violence, apocalyptic emergence, and activism; "Maroon" follows the aurora borealis to the far North and beholds in its shimmering alternative modes of world composition; "Chartreuse" is a meditation on postsustainability and possibility within sublime excess; "Grey" is the color of the undead; "Ultraviolet" is a potentially lethal force that opens vistas beyond humanly known nature. Featuring established and emerging scholars from varying disciplines, this volume presents a collaborative imagining of what a more-than-green ecology offers. While highlighting critical approaches not yet common within ectheory, the contributions remain diverse and cover a range of topics including materiality, the inhuman, and the agency of objects. By way of color, Cohen guides readers through a reflection of an essentially complex and disordered universe and demonstrates the spectrum as an unfinishable totality, always in excess of what a human perceives. The Best Team Wins Adrian Gostick 2018-02-13 The New York Times bestselling authors of *The Carrot Principle* and *All In* deliver a breakthrough, groundbreaking guide for building today's most collaborative teams—so any organization can operate at peak performance. A massive shift is taking place in the business world. In today's average company, up to eighty percent of employees' days are now spent working in teams. And yet the teams most people find themselves in are nowhere near as effective as they could be. They're often divided by tensions, if not outright dissension, and dysfunctional teams drain employees' energy, enthusiasm, and creativity. Now Adrian Gostick and Chester Elton share the proven ways managers can build cohesive, productive teams, despite the distractions and challenges every business is facing. In *The Best Team Wins*, Gostick and Elton studied more than 850,000 employee engagement surveys to develop their "Five Disciplines of Team Leaders," explaining how to recognize and motivate different generations to enhance individual engagement; ways to promote healthy discord and spark innovation; and techniques to unify customer focus and build bridges across functions, cultures, and distance. They've shared these disciplines with their corporate clients and have now distilled their breakthrough findings into a succinct, engaging guide for business leaders everywhere. Gostick and Elton offer practical ways to address the real challenges today's managers are facing, such as the rise of the Millennials, the increasing speed of change, the growing number of global and virtual teams, and the friction created by working cross-functionally. This is a must-read for anyone looking to maximize performance at work, from two of the most successful corporate consultants of their generation, whom The New York Times called "creative and refreshing."

Death Waits in the Dark Mark Edward Langley 2020-08-04 It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

Sustainable Non-Profit Management R A Williams 2016-12-31 This book is about charity management in the United States. It is intended for people who want to run their church, charity, or other not-for-profit corporation in a healthy, responsible, and sustainable way. It also contains hard-hitting descriptions of what happens when good intentions go awry and when charity administrators make bad, shortsighted decisions that are based on a flawed understanding of basic business law. The emphasis is on small and regional charities, however the book discusses budgeting, marketing techniques and cash flow analysis techniques that are relevant to national and even global charitable ventures. The book also introduces the concept of "social capital", which is the primary means by which charities operate. The book begins by introducing some basic business concepts relevant to not-for-profit companies. It discusses corporate structure, cash flow, and the division of operations between program, administrative, and advertising activities. From there, the book introduces techniques to determine whether the charity is running "sustainably": that is to say, in a way that does not exhaust the donor or volunteer pool. The book introduces various ways in which a charity can scale its program to fit the available money and resources. To run a sustainable charity requires attention to both money and people. The book therefore introduces several easy but previously unpublished tests that allow a reader to quickly determine whether a charity is healthy based on information in its annual report. The book contains techniques to calculate how much money a given set of volunteers should be able to raise, to determine whether a particular group of people is suffering from burnout, to identify which fundraising techniques produce the best return on investment, and to assess the maturity and sustainability of a charity based on the kind of donations it receives. The reader will learn how to choose fundraising techniques appropriate to the charity's size and program, how to build a volunteer and donor base, how to write a grant proposal, how to create

a budget and spending plan that minimizes stress on staff and volunteers, and how to plan for the worst. Different types of insurance and legal protections are discussed, along with instructions about how to find the optimal size and complexity for the charity's program activities. The book includes detailed instructions for booster clubs and small charities, and describes how to set up and run concessions and other basic fundraisers.
