Environmental Social Sciences Ismael Vaccaro 2010-11-11 The relationship between human communities and the environment is extremely complex. In order to resolve the issues involved with this relationship, interdisciplinary research combining natural sciences, social sciences, and humanities is necessary. In this 2010 book, specialists summarise methods and research strategies for various aspects of social research devoted to environmental issues. Each chapter is illustrated with ethnographic and environmental examples, ranging from Australia to Amazonia, from Madagascar to the United States, and from prehistoric and historic cases to contemporary rural and urban ones. It deals with climate change, deforestation, environmental knowledge, natural reserves, politics and ownership of natural resources, and the effect of differing spatial and temporal scales. Contributing to the intellectual project of interdisciplinary environmental social science, this book shows the possibilities social science can provide to environmental studies and to larger global problems and thus will be of equal interest to social and natural scientists and policy makers.

Professor Kant's Incredible Day Jean Paul Mongin 2016-05-09 What can I know? What should I do? What may I hope? What s for dinner? More than two hundred years ago, on a day that takes quite a peculiar course, Professor Kant is working hard to give an answer to all these questions. Not only the morning papers, but also a slightly perfumed letter get in his way however. As a result, he even forgets to go out on his regular digestive walk and everything goes off the rails Light-hearted without being flippant, funny and ironical, and accompanied by congenial artwork, this book tells the story of a day in the life of the great stylite and ancestor of Enlightenment philosophy, Immanuel Kant, sketching some of his major thoughts (without omitting his seemingly minor ones, like the inhabitants of Jupiter have marvelously light-weight bodies which teases readers to develop a historical understanding). The result is a wondrously easy and articulate approach to Kant s important construct of ideas. "

It gives the critic an opportunity to come to grips with the evolution of James's technique from his second short story to his penultimate, unfinished novel, *The Ivory Tower*.

Finding the Movement A. Finn Enke 2007-10-17 In *Finding the Movement*, Anne Enke reveals that diverse women's engagement with public spaces gave rise to and profoundly shaped second-wave feminism. Focusing on women's activism in Detroit, Chicago, and Minneapolis-St. Paul during the 1960s and 1970s, Enke describes how women across race and class created a massive groundswell of feminist activism by directly intervening in the urban landscape. They secured illicit meeting spaces and gained access to public athletic fields. They fought to open bars to women and abolish gendered dress codes and prohibitions against lesbian congregation. They created alternative spaces, such as coffeehouses, where women could socialize and organize. They opened women-oriented bookstores, restaurants, cafes, and clubs, and they took it upon themselves to establish women's shelters, health clinics, and credit unions in

order to support women's bodily autonomy. By considering the development of feminism through an analysis of public space, Enke expands and revises the historiography of second-wave feminism. She suggests that the movement was so widespread because it was built by people who did not identify themselves as feminists as well as by those who did. Her focus on claims to public space helps to explain why sexuality, lesbianism, and gender expression were so central to feminist activism. Her spatial analysis also sheds light on hierarchies within the movement. As women turned commercial, civic, and institutional spaces into sites of activism, they produced, as well as resisted, exclusionary dynamics.
