These proceedings contain 21 papers that were accepted for presentation at the conference. These papers were selected from 67 submissions including 3 invited papers. They went through a thorough review process by the Program Committee and were selected on the basis of excellence and novelty. The following is a brief description of the history of this conference and - viewing process: In August 2001 some members of the Special Interest Group on Multimedia Protection (SIGMP) of the Korea Institute of Information Security and Cryptology (KIISC) agreed to create the IWDW. In November 2001 we set up a Program Committee and solicited papers while asking Springer-Verlag to publish the proceedings of the workshop in their Lecture Notes in Computer Science series. In July 2002 we received 64 submissions from 14 countries using Microsoft's conference management site (<http://cmt.research.microsoft.com/iwdw2002/>). Each submission was assigned a number automatically by the conference management tool and the paper was sent to the Program Committee members for their review. **Privacy, Property and Personality** Huw Beverley-Smith 2005-11-24 The protection of privacy and personality is one of the most fascinating issues confronting any legal system. This book provides a detailed comparative analysis of the laws relating to commercial exploitation of personality in France, Germany, the United Kingdom and the United States. It examines the difficulties in reconciling privacy and personality with intellectual property rights in an individual's identity and in balancing such rights with the competing interests of freedom of expression and freedom of competition. This analysis will be useful for lawyers in legal systems which have yet to develop a sophisticated level of protection for interests in personality. Equally, lawyers in systems which provide a higher level of protection will benefit from the comparative insights into determining the nature and scope of intellectual property rights in personality, particularly questions relating to assignment, licensing, and post-mortem protection.
