Handbook of Research on Digital Research Methods and Architectural Tools in Urban Planning and Design

Abusaada, Hisham 2019-06-28 The efficient usage, investigation, and promotion of new methods, tools, and technologies within the field of architecture, particularly in urban planning and design, is becoming more critical as innovation holds the key to cities becoming smarter and ultimately more sustainable. In response to this need, strategies that can potentially yield more realistic results are continually being sought. The Handbook of Research on Digital Research Methods and Architectural Tools in Urban Planning and Design is a critical reference source that comprehensively covers the concepts and processes of more than 20 new methods in both planning and design in the field of architecture and aims to explain the ways for researchers to apply these methods in their works. Pairing innovative approaches alongside traditional research methods, the physical dimensions of traditional and new cities are addressed in addition to the non-physical aspects and applied models that are currently under development in new settlements such as sustainable cities, smart cities, creative cities, and intercultural cities. Featuring a wide range of topics such as built environment, urban morphology, and city information modeling, this book is essential for researchers, academicians, professionals, technology developers, architects, engineers, and policymakers.

Urban Wastelands Francesca Di Pietro 2021-10-18 Faced with the growing demand for nature in cities, informal greenspaces are gaining the interest of various stakeholders - residents, associations, public authorities - as well as scientists. This book provides a cross-sectorial overview of the advantages and disadvantages of urban wastelands in meeting this social demand of urban nature, spanning from the social sciences and urban planning to ecology and soil sciences. It shows the potential of urban wastelands with respect to city dwellers' well-being, environmental education, urban biodiversity and urban green networks as well as concerns regarding urban wastelands' in relation to conflicts, and urban marketing. The authors provide a global insight through case studies in nine countries, mainly located in Europe, Asia and America, thus offering a broad perspective.

Local Energy Autonomy Fanny Lopez 2019-06-05 In Europe, numerous forms of energy self-sufficiency or small technical systems exist, are promoted and discussed. They share the ambition to reduce the dependence to inherited/incumbent large technical systems in various sectors (energy and water supply, sanitation, waste management...) through the implementation of "local" energy systems and "small" grids. The contemporary energy and environmental crisis could rush the end of large technical systems (networks and infrastructures) as they have been developed since the late 19th century. This book examines the various options to transition.

Research Companion to Language and Country Branding Irene Theodoropoulou 2020-11-17 Research Companion to Language and Country Branding brings together entirely new interdisciplinary research conducted by scholars working on various sociolinguistic, semiotic, anthropological and discursive analytical aspects of country branding all over the world. Branding is a process of identity construction, whereby countries gain visibility and put themselves on the world map as distinctive entities by drawing on their history, culture, economy, society, geography, and their people. Through branding, countries aim not only at establishing their uniqueness but also, and perhaps most importantly, at attracting tourism, investments, high quality human capital, as well as at forging financial, military, political and social alliances. Against this backdrop, this volume explores how countries and regions imagine and portray others and themselves in terms of gender, ethnicity, and diversity today as well as the past. In this respect, the book examines how branding differs from other, related policies and practices, such as nation building, banal nationalism, and populism. This volume is an essential reference for students, researchers, and practitioners with an interest in country, nation, and place branding processes.

Marseille, Port to Port William Kornblum 2022-06-21 Marseille, France's sunny second city, is a beguiling place. A major Mediterranean port, it beckons to urban wanderers and anyone enthralled by cities in all their multiplicity. Marseille's ancient streets tell stories of fires, plagues, wars, decay, and regrowth. Waves of people of diverse ethnic and religious backgrounds have made their way there, and many have found homes for themselves. Although the city hosts visitors from around the world, France's social and political fault lines are on full display. For all its charm, Marseille struggles to overcome its reputation for corruption and crime. William Kornblum—an eminent urban sociologist and a veteran traveler in the Francophone world—invites readers on an exploration of a changing city. Blending travelogue and social observation,

he roams Marseille's neighborhoods and regions in the company of writers, scholars, activists, and ordinary people. The living history of the city comes through in Kornblum's character sketches and the stories that his guides tell. Relishing Marseille's coasts and crags and reveling in its rich maritime culture, they discuss the political, social, and environmental challenges the city faces. Kornblum also draws connections with his hometown, New York City, which like Marseille is a deindustrialized port city increasingly dependent on the production and consumption of culture. Offering a captivating and thoughtful portrait of the city and its citizens, this book is for all readers who have ever wondered what makes Marseille so distinctive.

Innovating Strategies and Solutions for Urban Performance and Regeneration

Cristina Piselli 2022-07-01 This book focuses on enhancing urban regeneration performance and strategies that pave the way toward sustainable urban development models and solutions. The book at hand thoroughly examines the latest studies on the regeneration of urban areas and attempts at alleviating the negative impacts associated with high population density and urban heat effects. It gathers contributions that combine theoretical reflections and international case studies on urban regeneration and transformation with the single goal of tackling existing social and economic imbalances and developing new solutions. The primary audience of this book will be from the field of architecture and urban planning, offering new insights on how to address the myriad of problems that our cities are facing.

Istanbul Eats Ansel Mullins 2010

Cities of Culture John R. Gold 2016-12-05 City authorities in recent years have competed vigorously to gain the right to host international festivals. In doing so they are heirs to a long tradition, since cities have always served as a natural location for festivals and fairs, providing settings on a scale impossible elsewhere. *Cities of Culture* examines the role of the Western city as the scene of staged cultural events over the last 150 years. Adopting a lively comparative perspective, it highlights the development of international festivals since London's Great Exhibition of 1851. Making extensive use of case studies and illuminating examples, it offers thought-provoking insight into the material and symbolic significance of international festivals in urban affairs. The book opens with an historical analysis of the role of the city as centre

for celebrations, rites and festivities from Antiquity to the French Revolution. The next three sections of the book each focus on a different form of international festival. The first deals with the history of staging the International Expositions, with case studies of the Great Exhibition (1851), New York's World's Fair (1939-40) and Montreal's Expo 67 (1967). The next part covers the Summer Olympic Games from their revival at Athens in 1896 to the Atlanta Games (1996), discussing the implications of their fluctuating fortunes for their host cities. The third section discusses the history of a recently-founded event that is assuming ever-greater importance - the European Cities of Culture programme. The conclusion provides an overview of the events that celebrated the Millennium and examines the prospects for international festivals as part of the urban agenda of the twenty-first century. Cities of Culture will appeal to students of cultural history, urban and cultural geography, specialists in arts and heritage events management, and anyone with an interest in the development of the contemporary Western city.

More than just a bird's-eye view, this irresistible book tells the tales behind the cities from the hubs of ancient peoples to modern mega-cities, and profiles the iconic cartographers and artists who created each map. Perfect for history, geography, and cartography enthusiasts and a stunning gift for armchair explorers of all ages, Great City Maps is your window into the world's most fascinating cities.

Cities and Social Movements Walter J. Nicholls 2016-12-21 Through historical and comparative research on the immigrant rights movements of the United

States, France and the Netherlands, *Cities and Social Movements* examines how small resistances against restrictive immigration policies do - or don't - develop into large and sustained mobilizations. Presents a comprehensive, comparative analysis of immigrant rights politics in three countries over a period of five decades, providing vivid accounts of the processes through which immigrants activists challenged or confirmed the status quo Theorizes movements from the bottom-up, presenting an urban grassroots account in order to identify how movement networks emerge or fall apart Provides a unique contribution by examining how geography is implicated in the evolution of social movements, discovering how and why the networks constituting movements grow by tracing where they develop Demonstrates how efforts to enforce national borders trigger countless resistances and shows how some environments provide the relational opportunities to nurture these small resistances into sustained mobilizations Written to appeal to a broad audience of students, scholars, policy makers, and activists, without sacrificing theoretical rigor

Designing the Modern City Eric Mumford 2018-04-10 A comprehensive new survey tracing the global history of urbanism and urban design from the industrial revolution to the present. Written with an international perspective that encourages cross-cultural comparisons, leading architectural and urban historian Eric Mumford presents a comprehensive survey of urbanism and urban design since the industrial revolution. Beginning in the second half of the 19th century, technical, social, and economic developments set cities and the world's population on a course of massive expansion. Mumford recounts how key figures in design responded to these changing circumstances with both practicable proposals and theoretical frameworks, ultimately creating what are now mainstream ideas about how urban environments should be designed, as well as creating the field called "urbanism." He then traces the complex outcomes of approaches that emerged in European, American, and Asian cities. This erudite and insightful book addresses the modernization of the traditional city, including mass transit and sanitary sewer systems, building legislation, and model tenement and regional planning approaches. It also examines the urban design concepts of groups such as CIAM (International Congresses of Modern Architecture) and Team 10, and their adherents and critics, including those of the Congress for the New Urbanism, as well as efforts toward ecological urbanism. Highlighting built as well as unbuilt projects, Mumford offers a sweeping guide to the history of designers' efforts to shape cities.

Handbook of Urban Mobilities Ole B. Jensen 2020-05-18 This book offers the reader a comprehensive understanding and the multitude of methods utilized in the research of urban mobilities with cities and 'the urban' as its pivotal axis. It covers theories and concepts for scholars and researchers to understand, observe and analyse the world of urban mobilities. The Handbook of Urban Mobilities facilitates the understanding of urban mobilities within a historic conscience of societal transformation. It explores key concepts and theories within the 'mobilities turn' with a particular urban framework, as well as the methods and tools at play when empirical, urban mobilities research is undertaken. This book also explores the urban mobilities practices related to commutes; particular modes of moving; the exploration of everyday life and embodied practices as they manifest themselves within urban mobilities; and the themes of power, conflict, and social exclusion. A discussion of urban planning, public control, and governance is also undertaken in the book, wherein the themes of infrastructures, technologies and design are duly

considered. With chapters written in an accessible style, this handbook carries timely contributions within the contemporary state of the art of urban mobilities research. It will thus be useful for academics and students of graduate programmes and post-graduate studies within disciplines such as urban geography, political science, sociology, anthropology, urban planning, traffic and transportation planning, and architecture and urban design.

Hip-Hop en Français Alain-Philippe Durand 2020-09-30 Hip-Hop en Français charts the emergence and development of hip-hop culture in France, French Caribbean, Québec, and Senegal from its origins until today. With essays by renowned hip-hop scholars and a foreword by Marcyliena Morgan, executive director of the Harvard University Hiphop Archive and Research Institute, this edited volume addresses topics such as the history of rap music; hip-hop dance; the art of graffiti; hip-hop artists and their interactions with media arts, social media, literature, race, political and ideological landscapes; and hip-hop based education (HHBE). The contributors approach topics from a variety of different disciplines including African and African-American studies, anthropology, Caribbean studies, cultural studies, dance studies, education, ethnology, French and Francophone studies, history, linguistics, media studies, music and ethnomusicology, and sociology. As one of the most comprehensive books dedicated to hip-hop culture in France and the Francophone World written in the English language, this book is an essential resource for scholars and students of African, Caribbean, French, and French-Canadian popular culture as well as anthropology and ethnomusicology.

ITER: The Giant Fusion Reactor Michel Claessens 2019-10-17 This book provides for the first time an insider's view into ITER, the biggest fusion reactor in the world, which is currently being constructed in southern France. Aimed at bringing the "energy of the stars" to earth, ITER is funded by the major economic powers (China, the EU, India, Japan, Korea, Russia and the US). Often presented as a "nuclear but green" energy source, fusion could play an important role in the future electricity supply. But as delays accumulate and budgets continue to grow, ITER is currently a star partially obscured by clouds. Will ITER save humanity by providing a clean, safe and limitless source of energy, or is it merely a political showcase of cutting-edge technology? Is ITER merely an ambitious research project and partly a PR initiative driven by some politically connected scientists? In any case, ITER has already helped spur on rival projects in the US, Canada and the UK. This book offers readers a behind-the-scenes look at this controversial project, which France snatched from Japan, and introduces them to a world of superlatives: with the largest magnets in the world, the biggest cryogenic plant and tremendous computing power, ITER is one of the most fascinating, and most international, scientific and technological endeavours of our time.

French Riviera Tourist Guide (Guide touristique Côte d'Azur) Nicolae Sfetcu 2016-01-10 Bilingual English/French Book (Livre bilingue anglais/français) French Riviera is one of the first modern resort areas. It began as a winter health resort at the end of the 18th century. With the arrival of the railway it became the playground and vacation spot of British, Russian, and other aristocrats, such as Queen Victoria and King Edward VII, when he was Prince of Wales. In the summer, it also played home to many members of the Rothschild family. In the first half of the 20th century, it was frequented by artists and writers, including Pablo Picasso, Henri Matisse, Edith Wharton, Somerset

Maugham, and Aldous Huxley, as well as wealthy Americans and Europeans. After World War II, it became a popular tourist destination and convention site. Many celebrities, such as Elton John and Brigitte Bardot, have homes in the region. The French Riviera is a major yachting and cruising area with several marinas along its coast. According to the Côte d'Azur Economic Development Agency, each year the Riviera hosts 50% of the world's superyacht fleet, with 90% of all superyachts visiting the region's coast at least once in their lifetime. As a tourist centre it benefits from 300 days of sunshine per year, 115 kilometres (71 mi) of coastline and beaches, 18 golf courses, 14 ski resorts and 3,000 restaurants. Although the Riviera is famous for the glamour of St. Tropez, Monaco or the Cannes Film Festival, there are many other less well known attractions, such as the perched villages of Eze and Gourdon, the perfumeries of Grasse and the glass blowers of Biot, the potters in Vallauris. The Riviera has been the inspiration for many well-known artists such as Picasso and many of their works are on display in local museums and art galleries. Community Action and Planning Gallent, Nick 2016-04-20 Analyses the contexts, drivers and outcomes of community action and planning in the global north: from emergent neighbourhood planning in England to the community-based housing movement in New York, and from active citizenship in the Dutch new towns to associative action in Marseille.

Urban Transition in Hanoi Danielle Labbé 2021-01-15 Vietnam is in the midst of one of the world's most rapid and intensive rural-to-urban transitions. In Hanoi, heritage preservation has gained significant policy attention over the last decades, but efforts continue to focus on the Old Quarter and Colonial City to the exclusion of collective socialist housing complexes and former village areas, and natural features such as canals and urban lakes. Parks and

public spaces are urgently needed to offset the high residential densities and to improve the quality of life of residents. Motor vehicles continue to fuel the growth in transportation. Significant efforts were recently made to establish a mass transit system, but progress there is slow. More attention should be paid to improving the existing transportation system and to reduce dependence on fossil fuels. Investments in new housing estates have fuelled a speculative real estate market but failed to address adequately the needs of the vulnerable segments of the population. Regional integration is a challenge as the city expands and swallows the peri-urban areas around the city.

Native to the Republic Minayo Nasiali 2016-10-27 In *Native to the Republic*, Minayo Nasiali traces the process through which expectations about living standards and decent housing came to be understood as social rights in late twentieth-century France. These ideas evolved through everyday negotiations between ordinary people, municipal authorities, central state bureaucrats, elected officials, and social scientists in postwar Marseille. Nasiali shows how these local-level interactions fundamentally informed evolving ideas about French citizenship and the built environment, namely that the institutionalization of social citizenship also created new spaces for exclusion. Although everyone deserved social rights, some were supposedly more deserving than others. From the 1940s through the early 1990s, metropolitan discussions about the potential for town planning to transform everyday life were shaped by colonial and, later, postcolonial migration within the changing empire. As a port and the historical gateway to and from the colonies, Marseille's interrelated projects to develop welfare institutions and manage urban space make it a particularly significant site for exploring this uneven process. Neighborhood debates about the meaning and goals of modernization contributed to normative understandings about which residents deserved access to expanding social rights. Nasiali argues that assumptions about racial, social, and spatial differences profoundly structured a differential system of housing in postwar France. *Native to the Republic* highlights the value of new approaches to studying empire, membership in the nation, and the welfare state by showing how social citizenship was not simply constituted within "imagined communities" but also through practices involving the contestation of spaces and the enjoyment of rights.

Governance and City Regions Karsten Zimmermann 2021-12-17 City-regions are areas where the daily journeys for work, shopping and leisure frequently cross administrative boundaries. They are seen as engines of the national economy, but are also facing congestion and disparities. Thus, all over the world, governments attempt to increase problem-solving capacities in city-regions by institutional reform and a shift of functions. This book analyses the recent reforms and changes in the governance of city-regions in France, Germany and Italy. It covers themes such as the impact of austerity measures, territorial development, planning and state modernisation. The authors provide a systematic cross-country perspective on two levels, between six city-regions and between the national policy frameworks in these three countries. They use a solid comparative framework, which refers to the four dimensions functions, institutions and governance, ideas and space. They describe the course of the reforms, the motivations and the results, and consequently, they question the widespread metropolitan fever or resurgence of city-regions and provide a better understanding of recent changes in city-regional governance in Europe. The primary readership will be researchers and master students in planning, urban studies, urban geography, political science and governance studies, especially those interested in metropolitan regions and / or decentralisation. Due to the uniqueness of the work, the book will be of particular interest to scholars working on the comparative European dimension of territorial governance and planning.

Je T'Aime, Me Neither April Lily Heise 2013-05-30 Is Paris really the eternal City of Love? Dumped suddenly by her Parisian boyfriend, sultry expat Lily is left wondering if je t'aime still exists. Instead of crying into her glass of wine, she decides to heal her bruised ego and quash her romantic doubts with a carefree summer fling . . . or as the French call it: une aventure. Supported by her faithful friends and trusty Saint Amour wine, Lily embarks on her presumably easy quest. Little does she know what-or whom-this adventure has in store! Rather than guide her into the arms of a perfect summer amoureux, the sexy streets of Paris lead her from one impossible candidate to another: disappearing foxy Frenchmen, unavailable Latino heartthrobs, overly-mysterious world travelers, mistress-hunting married men, and not-so-single amnesiacs-oh la la! As her amorous mishaps accumulate, Lily gradually re-evaluates her strategy. But will her good intentions be enough to lead her to the right homme . . . one who might last out the summer-and maybe even beyond? Or will she continue to get embroiled in more mesaventure? This novelized memoir tells the tantalizingly true romantic odyssey of a 21st-Century young woman caught in the mire of desires-which is only intensified by the passion of Paris.
