Franquin's Last Laugh Andre Franquin 2013-01-18 Renowned Franco-Belgian gag cartoonist Andre Franquin suffered from depression. With his late-career "Idees Noires" series of gags from the late 1970s and early 1980s, created mostly for the independent/underground comics magazine *Fluide Glacial*, Franquin harnessed his still-virtuoso graphic style to his increasingly morbid worldview. Fantagraphics is proud to present the complete "Idees Noires" collection under the title *Franquin's Last Laugh*.

Strong Bonds. Child-animal Relationships in Comics 2021 Snoopy and Charlie Brown, Calvin and Hobbes, Tintin and Snowy? comics are home to many memorable child and animal figures. Many cultural productions, especially children's literature and cartoons, stress the similarities between children and animals, similarities that have their limits and often place the child, as human, above the animal. Still, these fictional situations offer opportunities for thinking of child-animal relationships in diverse ways through, for instance, considering the possibilities of privileged contact between children and animals or of animals that are more knowledgeable and powerful than children and even adults. Despite the prevalence and success of child-animal tandems in comics and culture, we know very little about these relationships. What makes them so popular? How do they work? How much do they vary across time and cultures? What do they tell us about the place of animals and children in comics and in the real world? 'Strong Bonds: Child-animal Relationships in Comics' takes a first, important step in this direction. Bringing together

scholars with a diverse range of comics expertise, the volume's chapters combine contextualized readings of comics with relevant theories for interrogating childhood and animality, their overlaps and divergences. The strong bonds between children and animals mapped out here point towards alternative modes of conceptualizing family and identity and, ultimately, alternative means of reading, interpreting and imagining. With chapters on early comics (the Italian children's magazine 'Corriere dei Piccoli' during WWI, Harold Gray's 'Little Orphan Annie') international and regional classics ('Tintin', the Flemish 'Jommeke') and contemporary graphic novels (Bryan Talbot's 'A Tale of One Bad Rat', Brecht Evens's 'Panther'), this critical anthology sheds light on a vast array of child-animal relationships in comics from Europe and North America.

The Family Trichodoridae: Stubby Root and Virus Vector Nematodes W. Decraemer 2013-04-09 The family Trichodoridae was established by Thorne in 1935 but it remained of limited taxonomie interest until 1951 when Christie and Perry associated *Trichodorus christie* (now *Paratrichodorus minor*) with a "stubby root disease" that affected certain crops in Florida, USA and interest further increased from 1960 when *P. pachydermus* was implicated as a vector of the economically important tobacco raule virus. Such discoveries gave an impetus to studies on many aspects of the biology of trichodorid nematodes with a consequent proliferation of new species described from different parts of the world. The number of species increased from twelve in 1957 to a present day total exceeding eighty. This rapid expansion in the number of species was accompanied by several reappraisals of the taxonomy and systematics of the family, the most notable changes being the creation of the genus *Paratrichodorus* by Siddiqi in 1974 and the recognition of the monodelphic genera *Monotrichodorus* and *Allotrighodorus* respectively by Andrassy in 1976 and Rodriguez-M, Sher and Siddiqi in 1978. Reliable and unambiguous identification of taxa is dependent on the known reliability of a range of characters, which remains of paramount importance in taxonomy even when biochemical and molecular methodology is available. In this book each of the species, including synonyms and species inquirenda, that comprise the family Trichodoridae is re-described from meticulous microscopie examination of type specimens, material from official nematode collections and populations in the field.

Imagining the Global Fabienne Darling-Wolf 2014-12-22 Based on a series of case studies of globally distributed media and their reception in different parts of the world, *Imagining the Global* reflects on what contemporary global culture can teach us about transnational cultural dynamics in the 21st century. A focused multisited cultural analysis that reflects on the symbiotic relationship between the local, the national, and the global, it also explores how individuals' consumption of global media shapes their imagination of both faraway places and their own local lives. Chosen for their continuing influence, historical relationships, and different geopolitical positions, the case sites of France, Japan, and the United States provide opportunities to move beyond common dichotomies between East and West, or United States and "the rest." From a theoretical point of view, *Imagining the Global* endeavors to answer the question of how one locale can help us understand another locale. Drawing from a wealth of primary sources—several years of fieldwork; extensive participant observation; more than 80 formal interviews with some 160 media consumers (and occasionally producers) in France, Japan, and the United States; and analyses of media in different languages—author Fabienne Darling-Wolf considers how global culture intersects with other significant identity factors, including gender, race, class, and geography. *Imagining the Global* investigates who gets to participate in and who gets excluded from global media representation, as well as how and why the distinction matters.
