An Introduction to Cultural Ecology Mark Q. Sutton 2020-08-26 This contemporary introduction to the principles and research base of cultural ecology is the ideal textbook for advanced undergraduate and beginning graduate courses that deal with the intersection of humans and the environment in traditional societies. After introducing the basic principles of cultural anthropology, environmental studies, and human biological adaptations to the environment, the book provides a thorough discussion of the history of, and theoretical basis behind, cultural ecology. The bulk of the book outlines the broad economic strategies used by traditional cultures: hunting/gathering, horticulture, pastoralism, and agriculture. Fully explicated with cases, illustrations, and charts on topics as diverse as salmon ceremonies among Northwest Indians, contemporary Maya agriculture, and the sacred groves in southern China, this book gives a global view of these strategies. An important emphasis in this text is on the nature of contemporary ecological issues, how peoples worldwide adapt to them, and what the Western world can learn from their experiences. A perfect text for courses in anthropology, environmental studies, and sociology.

the controversial human right to life and, in particular, assesses the weight of conflicting interests which could and/or should serve to override the right. This contemporary study of the right to life focuses on the legal, as well as ethical, issues raised by the value of life in modern day society. It seeks to analyze the development, meaning and value of the fundamental human right to life in the context of its conflicts with other competing interests. The book begins with an overview of the right to life in which the concept of life itself is first analyzed, before both the right and its legal protection and enforcement are subjected to historical, philosophical and comparative analysis. The remainder of the book identifies, and assesses the merits of, various competing interests. These comprise armed conflict; prevention of crime; rights of others; autonomy; quality of life; and finite resources. The right to life is unusual in having potential application to so many of today's ethically controversial questions. This new work investigates specific topics of current political, legal and ethical concern such as the right to life during international conflicts, the role of lethal force in law enforcement, the death penalty, the right to life of a foetus in the context of legalized abortion, and the significance of quality of life and autonomy issues in respect of euthanasia and assisted suicide.

Company Max Barry 2007-03-13 Stephen Jones is a shiny new hire at Zephyr Holdings. From the outside, Zephyr is just another bland corporate monolith, but behind its glass doors business is far from usual: the beautiful receptionist is paid twice as much as anybody else to do nothing, the sales reps use self help books as manuals, no one has seen the CEO, no one knows exactly what they are selling, and missing donuts are the cause of office intrigue. While Jones originally wanted to climb the corporate ladder, he now finds himself descending deeper into the irrational rationality of company policy. What he finds is hilarious, shocking, and utterly telling.

Henry David Thoreau Laura Dassow Walls 2017-06-30 "Walden. Yesterday I came here to live." That entry from the journal of Henry David Thoreau, and the intellectual journey it began, would by themselves be enough to place Thoreau in the American pantheon. His attempt to "live deliberately" in a small woods at the edge of his hometown of Concord has been a touchstone for individualists and seekers since the publication of Walden in 1854. But there was much more to Thoreau than his brief experiment in living at Walden Pond. A member of the vibrant intellectual circle centered on his neighbor Ralph Waldo Emerson, he was also an ardent naturalist, a manual laborer and inventor, a radical political activist, and more. Many books have taken up various aspects of Thoreau's character and achievements, but, as Laura Dassow Walls writes, "Thoreau has never been captured between covers; he was too quixotic, mischievous, many-sided." Two hundred years after his birth, and two generations after the last full-scale biography, Walls restores Henry David

Thoreau to us in all his profound, inspiring complexity. Walls traces the full arc of Thoreau's life, from his early days in the intellectual hothouse of Concord, when the American experiment still felt fresh and precarious, and "America was a family affair, earned by one generation and about to pass to the next." By the time he died in 1862, at only forty-four years of age, Thoreau had witnessed the transformation of his world from a community of farmers and artisans into a bustling, interconnected commercial nation. What did that portend for the contemplative individual and abundant, wild nature that Thoreau celebrated? Drawing on Thoreau's copious writings, published and unpublished, Walls presents a Thoreau vigorously alive in all his quirks and contradictions: the young man shattered by the sudden death of his brother; the ambitious Harvard College student; the ecstatic visionary who closed Walden with an account of the regenerative power of the Cosmos. We meet the man whose belief in human freedom and the value of labor made him an uncompromising abolitionist; the solitary walker who found society in nature, but also found his own nature in the society of which he was a deeply interwoven part. And, running through it all, Thoreau the passionate naturalist, who, long before the age of environmentalism, saw tragedy for future generations in the human heedlessness around him. "The Thoreau I sought was not in any book, so I wrote this one," says Walls. The result is a Thoreau unlike any seen since he walked the streets of Concord, a Thoreau for our time and all time.

A Trial of Witches Ivan Bunn 2005-11-04 In 1662, Amy Denny and Rose Cullender were accused of witchcraft, and, in one of the most important of such cases in England, stood trial and were hanged in Bury St Edmunds. *A Trial of Witches* is a complete account of this sensational trial and an analysis of the court procedures, and the larger social, cultural and political concerns of the period. In a critique of the official process, the book details how the erroneous conclusions of the trial were achieved. The authors consider the key participants in the case, including the judge and medical witness, their institutional importance, their part in the fate of the women and their future careers. Through detailed research of primary sources, the authors explore the important implications of this case for the understanding of hysteria, group mentality, social forces and the witchcraft phenomenon as a whole.

Give the Pig a Chance & Other Stories David Rice 1996 "In the title story, two cousins fight over the death of a potbellied pig but come to a sincere reconciliation in the end. In "Tina La Tinaca," a woman grieving over the death of her son grows so obese that when she dies, an emergency crew must widen the doorway of her home so that her body can be removed. Culture and place figure prominently in Rice's work; most of the stories are set in the lower Rio Grande Valley of Texas and explore issues surrounding contemporary Mexican American life near the border. These stories ring with the author's distinctive voice and will certainly establish him as one of the most important young Chicano writers today."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. On the Jews and Their Lies Martin Luther 2019-11-10 Founder of modern-day Lutheranism, Martin Luther (1483-1546) confronted many opponents, most notably, the Jews. Hence, said Luther, the harshest of measures are warranted. A shocking book.
