Ordinance 1992

Psychological Testing in the Service of Disability Determination Institute of Medicine 2015-06-29 The United States Social Security Administration (SSA) administers two disability programs: Social Security Disability Insurance (SSDI), for disabled individuals, and their dependent family members, who have worked and contributed to the Social Security trust funds, and Supplemental Security Income (SSSI), which is a means-tested program based on income and financial assets for adults aged 65 years or older and disabled adults and children. Both programs require that claimants have a disability and meet specific medical criteria in order to qualify for benefits. SSA establishes the presence of a medically-determined impairment in individuals with mental disorders other than intellectual disability through the use of standard diagnostic criteria, which include symptoms and signs. These impairments are established largely on reports of signs and symptoms of impairment and functional limitation. Psychological Testing in the Service of Disability Determination considers the use of psychological tests in evaluating disability claims submitted to the SSA. This report critically reviews selected psychological tests, including symptom validity tests, that could contribute to SSA disability determinations. The report discusses the possible uses of such tests and their contribution to disability determinations. Psychological Testing in the Service of Disability Determination discusses testing norms, qualifications for administration of tests, administration of tests, and reporting results. The recommendations of this report will help SSA improve the consistency and accuracy of disability determination in certain cases.

Don't Tell Me What to Do, Just Send Money Helen E. Johnson 2011-07-05 This completely revised and updated edition of Don't Tell Me What To Do, Just Send Money prepares parents for the issues that they will encounter during their children's college years. Since our original publication over ten years ago, there has been a dramatic increase in the use of cell phone and internet technology. The birth of the term 'helicopter parent' is, in part, due to the instant and frequent connectivity that parents have with their children today. Parents are struggling with the appropriate use of communicative technology and aren't aware of its impact on their child's development, both personally and academically. With straightforward practicality and using humorous and helpful case examples and dialogues, Don't Tell Me What To Do, Just Send Money helps parents lay the groundwork for a new kind of relationship so that they can help their child more effectively handle everything they'll encounter during their college years.
