Corporate Social Responsibility and Governance Samuel O. Idowu 2014-11-27 This book deals with the role of international standards for corporate governance in the context of corporate social responsibility. Based on the fundamentals of moral theory, the book examines governance and CSR in general, addressing questions such as: Is “good governance” not affected by moral concerns? How do the principles and practices of CSR standards adhere to or conflict with insights from business ethics and moral theory? To what extent do the standards and governance models provide normative guidance? Do the standards and governance guidelines provide an adequate means of benchmarking and auditing? Are these standards a help or a hindrance to stakeholder engagement and transparency? The book provides insightful and thought-provoking answers to these and many other important questions concerning CSR standards, and offers a valuable resource for practitioners, academics and students at business schools and other institutions.

PROJECT APPRAISAL AND FINANCING AMBRISH GUPTA 2017-01-01 The era of nineties has created a new breed of entrepreneurs whose quest for finance is unending. The lending institutions, on the other hand, have become choosy due to, among other reasons, mounting Non-performing Assets (NPAs). All this has led to increased pressure on the availability of finance to the entrepreneurs. In this setting, careful consideration of Project Appraisal and Financing holds the key to survival. Designed in this context, the book begins with explaining the project’s fundamentals—features, identification, and project life cycle. It goes on to explain and analyze project formulation, appraisal of promoters and management, market appraisal, technical appraisal, financial appraisal, project report, institutional risk assessment and financing decision. The book also focuses on the concepts of project management, overruns, post-completion performance evaluation and contemporary issues like infrastructural financing, and environmental impact assessment. All through the book, the emphasis is on critical analysis and decision-making. Primarily intended for the students of MBA/PGDM/PGDBM and other allied courses such as MFC and MBE, the book will also be of immense value to the students of CA, CWA, CS, CFA, CPA and CAIIB. Besides, it will be equally beneficial for the executive development and in-

company training programmes on project appraisal and financing. Project finance executives in consulting firms and lending institutions and banks will also be benefited from the book due to its practical orientation. KEY FEATURES • Highlights the text from practitioner's perspective. • Written in a lecture mode and conversational style; classroom simulative. • Large number of illustrations, exercises and case studies. • Systematic and organized coverage of a full-fledged manufacturing project, including 10 years' financial projections integrated with the text throughout the book. Contemporary issues like infrastructure financing and environmental impact assessment. Unique pedagogical features, as explained in the 'Visual Tour of the Book' section. Chapter-wise PPTs and Solutions Manual available, on demand, for instructors adopting the book.

E-Business Fundamentals Peter Eckersley 2003-05-29 This comprehensive textbook considers all of the key business, management and technical issues of e-Business, examining and explaining how technologies can help organizations in both the public and private sectors conduct business in new ways. After addressing the changing nature of the e-Economy and the impact of the dot.com 'bubble' of the late 1990s, Eckersley, Harris and Jackson go on to analyse key software developments and the impact these have had on organizational practices. They then outline the legal and ethical frameworks of e-Business, and consider how companies use various e-commerce tools to enter new markets. Finally, they trace the progress public sector organizations have made in adopting e-Business practice. This is an accessible, jargon-free and focused textbook that offers readers both a technical and managerial overview of the issues surrounding e-Business. It uses illustrative cases and discussion

questions to help students and managers in organizations not only to familiarize themselves with e-Business but also to equip themselves with the skills to challenge and analyze the changing business environment.

Venture Capital & the Finance of Innovation Andrew Metrick 2021-02 "Many interesting developments have occurred in the world of venture capital since the publication of the first edition of this book in 2006, which prompted us to revise the book for the second edition. While the organization of the book remains unchanged, many of the chapters are substantially rewritten. For example, in Chapter 5, we re-ranked top VC firms, incorporating the latest performance statistics, fundraising and investment activities, notable exits, and (as always) our subjective opinions. In Chapter 6, we examine further evidence of the deepening globalization of the industry. In Chapters 3, 4, and 7, we analyze the impact of the 1999-2000 Internet bubble years on the VC risk and returns, as investments made in those years are finally mature and thus now a part of the performance evaluation analysis. We also incorporated expositional improvements throughout the book based on reader feedback on the first edition. Another feature of the new edition is that the VCV model, used extensively in Part III of the book, is now available as a Web-based application available on <http://VCVtools.com>. Significant collaborative efforts went into developing this tool, which we believe will be of interest to a broad audience, including practitioners interested in valuing VC-backed company stocks and employee stock options"

Corporate Finance S R Vishwanath 2007-03-07 This-revised and enhanced-book examines the role of finance in supporting other functional areas while fostering an understanding of how financial decisions can create value. Corporate Finance covers areas related to estimating divisional cost of capital; executing a financing strategy; establishing debt and dividend policies consistent with the company's strategy and environment; choosing between dividends and stock repurchases; managing high growth and managing working capital. Its new topics include: - Corporate Financial Flexibility (Real options) - New Financial Instruments - Project Finance - Acquisitions and Control - Performance Measurement and Incentive Compensation The goal of this book is to provide a thorough understanding of how and why firms make their financial decisions the way they do and their impact on shareholder value. The central theme of the book is Value Based Management, which assumes that maximizing shareholder value is the governing objective of a firm. Each chapter of this new edition has detailed and real-life cases to help students easily understand and grasp concepts. The author has also provided the case-map of the Harvard Business School to make this book more user-friendly in classrooms. The inclusion of several new topics/cases, extensive pedagogical tools and a finance-for-non-finance approach make this book ideal for MBA/CA/CFA/ICWA students and executive education programs.

Revolutionizing Business Practices Through Artificial Intelligence and Data-Rich Environments Gupta, Manisha 2022-06-24 Throughout the world, artificial intelligence is reshaping businesses, trade interfaces, economic activities, and society as a whole. In recent years, scholarly research on artificial intelligence has emerged from a variety of empirical and applied domains of knowledge. Computer scientists have developed advanced deep learning algorithms to leverage its utility in a variety of fields such as medicine, energy, travel, education, banking, and business management. Although a growing body of literature is shedding light on artificial intelligence-enabled difficulties, there is still much to be gained by applying fresh theory-driven techniques to this vital topic. *Revolutionizing Business Practices Through Artificial Intelligence and Data-Rich Environments* provides a comprehensive understanding of the business systems, platforms, procedures, and mechanisms that underpin different stakeholders' experiences with reality-enhancing technologies and their transformative application in management. The book also identifies areas in various business processes where artificial intelligence intervention would not only transform the business but would also make the business more sustainable. Covering key topics such as blockchain, business automation, and manufacturing, this reference work is ideal for computer scientists, business owners, managers, industry professionals, researchers, academicians, scholars, practitioners, instructors, and students.

ACCOUNTING FOR MANAGERS JELSY JOSEPH KUPPAPALLY 2008-08-08 Decision-making is a pivotal function of any manager. A knowledge of Accounting, insofar as it

affects decision-making, is very important for a manager. And very often, students find Accounting as one of the 'tough' subjects to handle. This book strives to make Accounting intelligible and easily comprehensible to students. The text gives a comprehensive coverage of the three branches of Accounting - Financial Accounting, Management Accounting, and Cost Accounting. It focuses on the various methods and techniques followed in the Management Reporting System. The text deals, in detail, with various accounting transaction procedures, methods of costing, ratio analysis, budgeting, forecasting, accounting errors, funds flow and cash flow statements, trial balance and balance sheet, and so on. It equips the students with the knowledge in the preparation, analysis, evaluation, and interpretation of financial statements, which will enrich their managerial competence and decision-making skills. KEY FEATURES ☐ Emphasises the various accounting and decision-making techniques. ☐ Provides a number of problems and their solutions, besides giving notes, working notes, and exercises, to help the students understand the concepts better. This book is intended as a text for the postgraduate students of Management (MBA/MIB), financial courses (MFC), and undergraduate and postgraduate students of Commerce and those pursuing MCA. In addition, the book will be very useful to practising managers who wish to develop effective and result-oriented decision-making skills.

Management Education in India Manish Thakur 2016-08-08 This volume problematizes different facets of management education in India---pedagogy, curricula, and disciplinary and institutional practices---from the perspective of the Global South. The essays in this volume bring out the institutional challenges of crafting a relevant academic programme that converses with both national specificities and global realities. Coming from diverse academic specializations, the contributors traverse the interface of their respective disciplines with management education. In doing so, they engage with the ongoing global debate on management education. This volume fills a noticeable gap of serious, scholarly reflection on the state of management education. While there have been sporadic reflections and occasional critiques, a critical stocktaking of the institutional and disciplinary aspects of management education has been long wanting. This volume is of interest to scholars and practitioners of management education across the globe, and is likely to generate debate on its contemporary relevance and future trajectory.

Behavioral Finance: The Second Generation Meir Statman 2019-12-02 Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants--restricted to the

utilitarian benefits of high returns and low risk. That first generation commonly described people as “irrational”—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people’s normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People’s normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People’s normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.
