Explanatory Report on the European Charter of Local Self-government 1986

The Making of the Soviet System Moshe Lewin 1994 In this Now-Classic Book, The Making of the Soviet System, Moshe Lewin traces the transformation of Russian society and the Russian political system in the period between the two world wars, a transformation that was to lead to Stalinism in the 1930s. Lewin focuses on the changes stemming from war, revolution, civil war, and industrialization, and he discusses such topics as rural society and religion in the twentieth century; the background of Soviet collectivization; Soviet prewar policies of agricultural procurement; the kolkhoz and the muzhik; Leninism and Bolshevism; industrial relations during the five-year plans of 1928-1941; and the social background of Stalinism. Through this comprehensive approach to understanding the origins and problems of Stalinism, Lewin makes a

significant contribution to the study of Russia's social history before the revolution as well as in the Soviet period.

Patterns of Local Autonomy in Europe Andreas Ladner 2018-10-26 This book considers local autonomy, measured as a multidimensional concept, from a cross-country comparative perspective, and examines how variations can be explained and what their consequences are. It fills a gap in the literature by providing a comprehensive study of the different components of local autonomy across a large number of countries, over time. It offers a theoretically saturated concept to measure local autonomy and applies it to 39 countries, including all 28 EU member states together with Albania, Georgia, Iceland, Liechtenstein, Macedonia, Moldova, Norway, Serbia, Switzerland Turkey and Ukraine, over a period of 25 years (1990-2014).

Englesko-srpskohrvatski rečnik Živojin Simić 1963

Greece and the Law of the Sea Theodore C. Kariotis 1997 Greece was one of the initial 119 delegations to sign the United Nations Convention on the Law of the Sea at the final meeting of the Conference for that purpose in December of 1982. When the Convention came into force in November 1994, only two countries opposed it. Turkey was one of them. Turkey has no plans to ratify the Convention in the near future. *Greece & the Law of the Sea* reviews the main developments in the Greek-Turkish dispute relating to the Greek islands in the Aegean Sea & analyzes all other aspects of the Greek maritime interests in the light of the Convention. The contributors have closely followed the creation of the new international law of the sea & discuss in their papers how this affects a great maritime nation, such as Greece, in a variety of ways. The work is published under the auspices of the recently established Aegean Institute of the Law of the Sea & Maritime Law, an independent scientific research center affiliated with the University of the Aegean, located in Rhodes. It constitutes one of the few books to cover Greek affairs in the English language. As such, it will greatly assist non-Greek speaking scholars interested in following & studying Greek affairs.

An Economic and Social History of the Ottoman Empire Suraiya Faroqhi 1997-04-28 A major contribution to Ottoman history, now published in paperback in two volumes.

Islamic Mysticism and the Bektashi Path Baba Rexheb 2019-10-28 "The Bektashi Way is profoundly simple yet perplexingly complex, striking in its boldness yet gracious in its subtlety; consequently, while shining forth brightly it still is seemingly cloaked in obscurity. There have been attempts to gather its history, characteristic ideas, and observable aspects together and to elucidate its inner wisdom in prose, but few of these attempts have been made by

knowledgeable insiders, and even fewer of these have been made in English. This full translation of Baba Rexheb's Islamic Mysticism and the Bektashi Path from its original Albanian is thus a unique addition to the literature on Bektashism in English, and a boon to those who seek to know more about this clearly enigmatic way." --- Vafi Baba

Al-Shura: The Qur'anic Principle of Consultation Ahmad Al-Raysuni 2011-09-30 Muslims remain largely unaware of the importance and value of the Qur'anic principle of al-Shura (mutual consultation) and the significant role it can play in the advancement and reform of Muslim society. In this work, the author attempts to introduce and examine key meanings and practices of al-Shura, trace its historical evolution, and explore ways in which the principle can be introduced, institutionalized and applied in Muslim societies. There is no doubt that al-Shura has been sidelined throughout the Muslim world and the reasons for this are both historically and politically complex. According to the author, although much has been written on the subject, in reality it has been at best ineffectively applied and at worst heedlessly ignored. Even today it is a hotly contested issue. As al-Shura is increasingly associated with democratic participation in a decision-making process, debate has ignited with critics challenging the notion of equating the principle with western notions of democracy, with others claiming that the principle allows for a meaning that breaks the grip of centralized power. These and other issues are investigated with careful scholarship. Al-Raysuni concludes that al-Shura should be adopted as a way of life for all Muslims to protect their interests and as a vital tool for reconstruction and reform. In doing so he addresses the subject from some intriguing new angles, giving insight into areas hitherto little, if at all, examined.

The Crime of Aggression Noah Weisbord 2019-06-11 A gripping behind-the-scenes account of the dramatic legal fight to hold leaders personally responsible for aggressive war On July 17, 2018, starting an unjust war became a prosecutable international crime alongside genocide, crimes against humanity, and war crimes. Instead of collective state responsibility, our leaders are now personally subject to indictment for crimes of aggression, from invasions and preemptions to drone strikes and cyberattacks. The Crime of Aggression is Noah Weisbord's riveting insider's account of the high-stakes legal fight to enact this historic legislation and hold politicians accountable for the wars they start. Weisbord, a key drafter of the law for the International Criminal Court, takes readers behind the scenes of one of the most consequential legal dramas in modern international diplomacy. Drawing on in-depth interviews and his own invaluable insights, he sheds critical light on the motivations of the prosecutors, diplomats, and military strategists who championed the fledgling prohibition on unjust war—and those who tried to sink it. He untangles the complex history behind the measure, tracing how the crime of aggression was born at the Nuremberg trials only to fall dormant during the Cold War, and he draws lessons from such pivotal events as the collapse of the League of Nations, the rise of the United Nations, September 11, and the war on terror. The power to try leaders for unjust war holds untold promise for the

international order, but also great risk. In this incisive and vitally important book, Weisbord explains how judges in such cases can balance the imperatives of justice and peace, and how the fair prosecution of aggression can humanize modern statecraft.

Muslim Contributions to World Civilization M. Basheer Ahmed 2005 The brilliant contributions of Islam to science, art, and culture, are a timeless and precious heritage, which should be historically preserved for future generations. The great achievements of Muslim scholars are rarely if at all acknowledged in formal education, and today their identity, origins and impact remain largely obscure. This collection of papers aims to give readers a brief introduction to the intellectual history of Muslims and the contributions that eminent Muslim scholars have made in certain specific fields of knowledge including basic and applied physical and biological sciences, medicine, legal and political theories and practices, economic and financial concepts, models, and institutions, etc.

The Enforceability of Promises in European Contract Law James Gordley 2001-07-12 Civil law and common law systems are held to enforce promises differently: civil law, in principle, will enforce any promise, while common law will enforce only those with 'consideration'. In that respect, modern civil law supposedly differs from the Roman law from which it descended, where a promise was enforced depending on the type of contract the parties had made. This 2001 volume is concerned with the extent to which these characterizations are true, and how these and other differences affect the enforceability of promises. Beginning with a concise history of these distinctions, the volume then considers how twelve European legal systems would deal with fifteen concrete situations. Finally, a comparative section considers why legal systems enforce certain promises and not others, and what promises should be enforced. This is the second completed project of The Common Core of European Private Law launched at the University of Trento.

Structure and Synthesis of PID Controllers Aniruddha Datta 2013-03-14 In many industrial applications, the existing constraints mandate the use of controllers of low and fixed order while typically, modern methods of optimal control produce high-order controllers. The authors seek to start to bridge the resultant gap and present a novel methodology for the design of low-order controllers such as those of the P, PI and PID types. Written in a self-contained and tutorial fashion, this book first develops a fundamental result, generalizing a classical stability theorem – the Hermite–Biehler Theorem – and then applies it to designing controllers that are widely used in industry. It contains material on: • current techniques for PID controller design; • stabilization of linear time-invariant plants using PID controllers; • optimal design with PID controllers; • robust and non-fragile PID controller design; • stabilization of first-order systems with time delay; • constant-gain stabilization with desired damping • constant-gain stabilization of discrete-time plants.

The Index for Inclusion Tony Booth 2016

Usual Cruelty Alec Karakatsanis 2019-10-29 From an award-winning civil rights lawyer, a profound challenge to our society's normalization of the caging of human beings, and the role of the legal profession in perpetuating it Alec Karakatsanis is interested in what we choose to punish. For example, it is a crime in most of America for poor people to wager in the streets over dice; dice-wagerers can be seized, searched, have their assets forfeited, and be locked in cages. It's perfectly fine, by contrast, for people to wager over international currencies, mortgages, or the global supply of wheat; wheat-wagerers become names on the wings of hospitals and museums. He is also troubled by how the legal system works when it is trying to punish people. The bail system, for example, is meant to ensure that people return for court dates. But it has morphed into a way to lock up poor people who have not been convicted of anything. He's so concerned about this that he has personally sued court systems across the country, resulting in literally tens of thousands of people being released from jail when their money bail was found to be unconstitutional. Karakatsanis doesn't think people who have gone to law school, passed the bar, and sworn to uphold the Constitution should be complicit in the mass caging of human beings—an everyday brutality inflicted disproportionately on the bodies and minds of poor people and people of color and for which the legal system has never offered sufficient justification. Usual Cruelty is a profoundly radical reconsideration of the American "injustice system" by someone who is actively, wildly successfully, challenging it.

Defenders of Reason in Islam Richard C. Martin 2016-03-03 This clearly written text explores the rational theology of Islam, the conflict between the "defenders of God" and the "defenders of reason", and the controversy's historical roots.

Fjalor enciklopedik shqiptar: H-M Zija Xholi 2008

The Love Revolution Joyce Meyer 2009-09-22 Joyce Meyer is not satisfied with the status quo. She believes that we each need to become a revolutionary and practice love every day. And if Joyce has her way, the revolution will spread - person by person, house by house, town by town, until the old culture of selfishness and greed gives way to a new culture of concern for others. The book is a revolutionaries' manual, a hands-on primer for bringing the Golden Rule to life in the twenty-first century. Meyer starts out by giving some stunning statistics. Right now...210,000 children will die this week because of poverty; 640 million children do not have adequate shelter; every day, 3,000 children are abducted into the sex-trafficking industry; every day, 16,000 children die from hunger-related causes. She goes on to say that although crisis is global, the solution is local. We can't solve the world's problems,

Downloaded from avenza-dev.avenza.com
on November 29, 2022 by guest

but that isn't a reason to remain idle. LOVE REVOLUTION focuses on personal behavior on the local scale. It's not just a call to action; it is a call to being: being the person who goes out of your way to encourage someone who's out of hope; being the one who smiles at a stranger; being the one who is willing to do something for nothing. The paradox: when we do something for nothing, what we often get is something far greater.

Tito and the Rise and Fall of Yugoslavia Richard West 2012-11-15 Few figures have dominated a nation's destiny as much as Marshal Tito of former Yugoslavia. For nearly thirty years he held together mutually hostile religious groups in a deeply divided country, but his death in 1980 rekindled centuries-old hatreds and by 1992 Yugoslavia ceased to exist. In this revealing biography, Richard West questions the full impact of Tito's reign of power and his implicit responsibility for the ensuing violent, bloody war in Bosnia. 'Excellent ... I recommend his book for those who already know about Yugoslavia and want food for thought about the future.' David Owen, Sunday Times 'Admirable ... Carefully researched and extremely readable.' Literary Review 'A passionate book, in which West's historical sense is interlaced with his own very intimate knowledge of Yugoslavia from the late 1940s on and of the poignancy of [subsequent] events.' Fergus Pyle, Irish Times 'Masterly'. Glasgow Herald

Local Commons and Global Interdependence Robert O Keohane 1994-11-15 This volume offers a synthesis of what is known about very large and very small common-pool resources. Individuals using commons at the global or local level may find themselves in a similar situation. At an international level, states cannot appeal to authoritative hierarchies to enforce agreements they make to cooperate with one another. In some small-scale settings, participants may be just as helpless in calling on distant public officials to monitor and enforce their agreements. Scholars have independently discovered self-organizing regimes which rely on implicit or explicit principles, norms, rules and procedures rather than the command and control of a central authority. The contributors discuss the possibilities and dangers of scaling up and scaling down. They explore the impact of the number of actors and the degree of heterogeneity among actors on the likelihood of cooperative behaviour.

Encyclopedia of the Ottoman Empire Ga ḃor A ́oston 2010-05-21 Presents a comprehensive A-to-Z reference to the empire that once encompassed large parts of the modern-day Middle East, North Africa, and southeastern Europe.

Prosecuting the President Andrew Coan 2019 "[This book provides a] history of special prosecutors in American politics. For more than a century, special prosecutors have struck fear into the hearts of presidents, who have the power to fire them at any time. How could this be, [the author] asks? And how could the nation entrust such a high responsibility to such subordinate officials? [The author] demonstrates that special prosecutors can do much to protect the rule of law under the right circumstances. Many have been thwarted by the formidable challenges of investigating a sitting president and his close associates; a few have abused the powers entrusted to them. But at their best,

special prosecutors function as catalysts of democracy, channeling an unfocused popular will to safeguard the rule of law. By raising the visibility of high-level misconduct, they enable the American people to hold the president accountable. Yet, if a president thinks he can fire a special prosecutor without incurring serious political damage, he has the power to do so. Ultimately, [the author] concludes, only the American people can decide whether the President is above the law."--

Lodusky Frances Hodgson Burnett 2020-03-16 "Lodusky" by Frances Hodgson Burnett. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten-or yet undiscovered gems-of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

The Peace Forum 1913

Bookmarks - A manual for combating hate speech online through human rights education 2014-05-13 The work of the Council of Europe for democracy is strongly based on education: education in schools, and education as a lifelong learning process of practising democracy, such as in non-formal learning activities. Human rights education and education for democratic citizenship form an integral part of what we have to secure to make democracy sustainable. Hate speech is one of the most worrying forms of racism and discrimination prevailing across Europe and amplified by the Internet and social media. Hate speech online is the visible tip of the iceberg of intolerance and ethnocentrism. Young people are directly concerned as agents and victims of online abuse of human rights; Europe needs young people to care and look after human rights, the life insurance for democracy. Bookmarks is published to support the No Hate Speech Movement youth campaign of the Council of Europe for human rights online. Bookmarks is useful for educators wanting to address hate speech online from a human rights perspective, both inside and outside the formal education system. The manual is designed for working with learners aged 13 to 18 but the activities can be adapted to other age ranges.

Managing Public Expenditure A Reference Book for Transition Countries OECD 2001-03-20 Managing Public Expenditure presents a comprehensive and in-depth analysis of all aspects of public expenditure management from the preparation of the budget to the execution, control and audit stages.

Let's Get Free Paul Butler 2010-06-08 Drawing on his personal fascinating story as a prosecutor, a defendant, and an observer of the legal process, Paul Butler offers a sharp and engaging critique of our criminal justice system. He argues against discriminatory drug laws and excessive police power and shows how our policy of mass incarceration erodes communities and perpetuates crime. Controversially, he supports jury nullification—or voting “not guilty” out of principle—as a way for everyday people to take a stand against unfair laws, and he joins with the “Stop Snitching” movement, arguing that the reliance on informants leads to shoddy police work and distrust within communities. Butler offers instead a “hip hop theory of justice,” parsing the messages about crime and punishment found in urban music and culture. Butler’s argument is powerful, edgy, and incisive.

Tourism Ray Youell 1998 This book is designed to provide a basic introduction to the tourism industry and is an ideal text for students requiring a concise and comprehensive introduction to the subject area.

Comparative Judicial Review Erin F. Delaney 2018-09-28 Constitutional courts around the world play an increasingly central role in day-to-day democratic governance. Yet scholars have only recently begun to develop the interdisciplinary analysis needed to understand this shift in the relationship of constitutional law to politics. This edited volume brings together the leading scholars of constitutional law and politics to provide a comprehensive overview of judicial review, covering theories of its creation, mechanisms of its constraint, and its comparative applications, including theories of interpretation and doctrinal developments. This book serves as a single point of entry for legal scholars and practitioners interested in understanding the field of comparative judicial review in its broader political and social context.

Society and Its Environment Egbert Tellegen 1998 This book looks at the different ways in which social scientists study environmental change and environmental problems. The history and geography of the relationship between environment and society is explored, as well as the social dilemmas and cultural considerations faced when confronting environmental issues. Societies' perception of, and response to, environment and risk are examined in detail. The book also considers the causes of local and global environmental problems, together with the policies implemented to control them and how these affect, and are affected by, the interests of organisations. *Society and its Environment: An Introduction* is the completely revised, expanded and internationalised edition of Tellegen and Wolsink's renowned Dutch textbook. It will be recommended reading for students and teachers of Environmental Studies and Sociology courses, as well as environmental managers and policy-makers and anyone seeking an understanding of how social attitudes shape our surroundings.
