Kasher in the Rye Moshe Kasher 2012-03-28 Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But KASHER IN THE RYE is not an "eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland , California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control-his mother walked him around on a leash, which he chewed through and ran away. Those early years read like part Augusten Burroughs, part David Sedaris, with a touch of Jim Carrol...but a lot more Jewish. In fact, Kasher later spends time in a Brooklyn Hasidic community. Then came addiction... Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations.

Disciple IV Abingdon Press 2005-05 DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

Radio Frequency and Microwave Electronics Illustrated Matthew M. Radmanesh 2001 Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. You Are Your Best Thing Tarana Burke 2022-01-25 NEW YORK TIMES BESTSELLER • Tarana Burke and Dr. Brené Brown bring together a dynamic group of Black writers, organizers, artists, academics, and cultural figures to discuss the topics the two have dedicated their lives to understanding and teaching: vulnerability and shame resilience. Contributions by Kiese Laymon, Imani Perry, Laverne Cox, Jason Reynolds, Austin Channing Brown, and more NAMED ONE OF THE BEST BOOKS OF THE YEAR BY MARIE CLAIRE AND BOOKRIOT It started as a text between two friends. Tarana Burke, founder of the 'me too.' Movement, texted researcher and writer Brené Brown to see if she was free to jump on a call. Brené assumed that Tarana wanted to talk about wallpaper. They had been trading home decorating inspiration boards in their last text conversation so Brené started scrolling to find her latest Pinterest pictures when the phone rang. But it was immediately clear to Brené that the conversation

wasn't going to be about wallpaper. Tarana's hello was serious and she hesitated for a bit before saying, "Brené, you know your work affected me so deeply, but as a Black woman, I've sometimes had to feel like I have to contort myself to fit into some of your words. The core of it rings so true for me, but the application has been harder." Brené replied, "I'm so glad we're talking about this. It makes sense to me. Especially in terms of vulnerability. How do you take the armor off in a country where you're not physically or emotionally safe?" Long pause. "That's why I'm calling," said Tarana. "What do you think about working together on a book about the Black experience with vulnerability and shame resilience?" There was no hesitation. Burke and Brown are the perfect pair to usher in this stark, potent collection of essays on Black shame and healing. Along with the anthology contributors, they create a space to recognize and process the trauma of white supremacy, a space to be vulnerable and affirm the fullness of Black love and Black life.

Head in the Game Brandon Sneed 2017-02-28 An intriguing blend of science and sports that explores how some of the world's greatest athletes are utilizing the last frontier of performance-enhancing technology—the mental mapping and engineering of their own brains—for peak performance, and what it means for the future of athleticism, sports, and the rest of us. *Moneyball* showed how statistics were revolutionizing baseball. *The Sports Gene* revealed the role genetics play in sports. Now, *Head in the Game* examines the next evolution: how mental engineering—the manipulation of the cognitive processes of the brain—can make gifted athletes even better. For years, technology—from EEG (electroencephalogram) to fMRI (Functional magnetic resonance imaging) to video games, tablets, and personal data collection devices—have been used with soldiers to understand their physical and mental functioning. Touching on brain functionality vital to sports—both the "hard" (coordination, stimuli processing, functional memory, decision-making, load-processing) and the "soft" (emotion regulation, visualization, psychology, mindfulness)—this tech is now being adopted by scores of championship franchises and top athletes—including scrappy underdogs forced to innovate and elite players looking for an advantage. Star NFL quarterbacks Russell Wilson and Tom Brady, the NBA's Kyle Korver, and Olympic volleyball champion Kerri Walsh are using mental engineering to up their game. It's not luck that has transformed the San Antonio Spurs into a formidable force—it's science, Sneed demonstrates. As mental engineering becomes widespread—taking athletes who are already freaks of nature and making them better—the impact on the multi-billion dollar sports industry will be dramatic on players, managers, trainers, owners, and even fans. Interviewing athletes and coaches, visiting training camps and sports science firms, Brandon Sneed offers a firsthand, on-the-ground look at this exciting breakthrough that has the potential to transform the game—and all our lives.
