The Explorers Guild Kevin Costner 2015-10-20 Return to the golden age of adventure with this gorgeously wrought, action-packed, globetrotting tale that combines the bravura storytelling of Kipling with the irresistible, illustrative style of Hergé's Adventures of Tintin. Behind the staid public rooms of an old world gentlemen's club operates a more mysterious organization: The Explorers Guild, a clandestine group of adventurers who bravely journey to those places in which light gives way to shadow and reason is usurped by myth. The secrets they seek are hidden in mountain ranges and lost in deserts, buried in the ocean floor and lodged deep in polar ice. The aim of The Explorers Guild: to discover the mysteries that lie beyond the boundaries of the known world. This beautifully produced combination graphic novel and adventure tale, set against the backdrop of World War I, concerns the Guild's quest to find the golden city of Buddhist myth. The search will take them from the Polar North to the Mongolian deserts,

through the underground canals of Asia to deep inside the Himalayas, before the fabled city finally divulges its secrets and the globe-spanning journey plays out to its startling conclusion. "With its colorful cast, exotic locales, and intertwined fates, the book slowly addicts. A rousing throwback whose spinning plates never stop, even at the end," (Kirkus Reviews), The Explorers Guild is perfect for fans of the adventures of J.J. Abrams and C.S. Lewis.

When Men and Mountains Meet John Keay 1977 The majestic and sublime Himalayas have long exerted a powerful force on the imaginations of explorers and travelers. Indeed, as a challenge for these adventurous souls, the mountain wilderness that separates the Indian subcontinent from Inner Asia is unique: no similar region has ever aroused such intense interest. *When Men and Mountains Meet*, a book based largely on out-of-print and archival material, is the first narrative account of the early exploration of this incomparable part of the world. The difficulty of exploration was not only natural (though the terrain, of course, is the most formidable on earth), but man-made as well: the Himalayas, then as now, are strategic and political boundaries of great importance. Consequently, independent travelers were discouraged from expeditions, while official travelers operated behind a dense screen of secrecy. Yet despite these obstacles, between 1820 and 1875 the Western Himalayas were explored by a number of extraordinary characters. In these pages we meet some of the most intrepid explorers of all time: the American adventurer Alexander Gardiner; Joseph Wolff, who earned the sobriquet of "mad missionary"; Thomas Thomson the Scottish naturalist; Moorcroft, whose exploits have since become legendary in the region; and the dogged surveyor Godwin. All fully lived up to their magnificent setting, and all are once again brought to life in this compelling saga of humankind versus nature.
