The Phantom Holocaust Olga Gershenson 2013-07-15 Even people familiar with cinema

believe there is no such thing as a Soviet Holocaust film. The Phantom Holocaust tells a different story. The Soviets were actually among the first to portray these events on screens. In 1938, several films exposed Nazi anti-Semitism, and a 1945 movie depicted the mass execution of Jews in Babi Yar. Other significant pictures followed in the 1960s. But the more directly filmmakers engaged with the Holocaust, the more likely their work was to be banned by state censors. Some films were never made while others came out in such limited release that the Holocaust remained a phantom on Soviet screens. Focusing on work by both celebrated and unknown Soviet directors and screenwriters, Olga Gershenson has written the first book about all Soviet narrative films dealing with the Holocaust from 1938 to 1991. In addition to studying the completed films, Gershenson analyzes the projects that were banned at various stages of production. The book draws on archival research and in-depth interviews to tell the sometimes tragic and sometimes triumphant stories of filmmakers who found authentic ways to represent the Holocaust in the face of official silencing. By uncovering little known works, Gershenson makes a significant contribution to the international Holocaust filmography.

A Misunderstood Friendship Zhihua Shen 2020-11-03 Today, the People's Republic of China is North Korea's only ally on the world stage, a tightly knit relationship that goes back decades. Both countries portray their partnership as one of "brotherly affection" based on shared political ideals—an alliance "as tight as lips to teeth"—even though relations have deteriorated in recent years due to China's ascendance and North Korea's intransigence. In A Misunderstood Friendship, leading diplomatic historians Zhihua Shen and Yafeng Xia draw on previously untapped primary source materials revealing tensions and rivalries to offer a unique account of the China-North Korea relationship. They unravel the twists and turns in high-level diplomacy between China and North Korea from the late 1940s to the death of Mao Zedong in 1976. Through unprecedented access to Chinese government documents, Soviet and Eastern European archives, and in-depth interviews with former Chinese diplomats and North Korean defectors, Shen and Xia reveal that the tensions that currently plague the alliance between the two countries have been present from the very beginning of the relationship. They significantly revise existing narratives of the Korean War, China's postwar aid to North Korea, Kim Il-sung's ideological and strategic thinking, North Korea's relations with the Soviet Union, and the importance of the Sino-U.S. rapprochement, among other issues. A Misunderstood Friendship adds new depth to our understanding of one of the most secretive and significant relationships of the Cold War, with increasing relevance to international affairs today.

The Murder Mystique: Female Killers and Popular Culture Laurie Nalepa 2013-02-07 Although they account for only ten percent of all murders, those attributed to women seem especially likely to captivate the public. This absorbing book examines why that is true and how some women, literally, get away with murder.

**Chronicles of Religious Science, Volume II, 1960-2012** Marilyn Leo 2020-06-10 Building on the history documented in Chronicles of Religious Science Volume I, this second volume opens with the transition of Ernest Holmes in 1960. Each chapter highlights the growth and decisions of the Church of Religious Science and Religious Science International as the organizations grew and eventually merged back into one whole in 2012. Based on interviews, quotes, meeting minutes and commentary, these two volumes capture the essence of

Religious Science and preserve its history for future generations. Chronicles of Religious Science Volume II is truly a work of heart by Dr. Marilyn Leo, "Living Treasure" and former neighbor to Ernest and Hazel Holmes. Dr. Leo delves deep into the oracles and wisdom of the Science of Mind Archives to share key events in the evolution of Science of Mind. In this book, we honor the transition of our founder, Dr. Ernest Holmes, in 1960, and we celebrate the healing and uniting of our movement in 2011-12. "This is a valuable resource and an essential read for anyone who has been touched by this profound teaching." — Rev. Kathy Mastroianni Executive Director, Science of Mind Archives and Library Foundation This latest volume of Chronicles of Religious Science embodies the spirit of our founder, Dr. Ernest Holmes', statement that Religious Science should always remain "open at the top." It opens the reader to the unfolding story of this amazing movement. In so doing, it is a valuable resource to every practitioner of the Science of Mind. "Dr. Marilyn Leo has a way of answering the questions of the curious in this, her latest contribution to Religious Science. Enjoy your journey through the annals of one of the major contributors to the Science of Mind." — Rev. Stephen Rambo, Spiritual Leader, CSL Simi Valley "Ernest Holmes writes, "When, through intuition, faith finds its proper place under Divine Law, there are no limitations, and what are called miraculous results follow." The Chronicles of Religious Science II is one of those miraculous efforts. I offer deep gratitude to Marilyn Leo for capturing the essence and details of so many aspects of the life of Holmes and the Religious Science movement and honor the keen minds and huge hearts who worked tirelessly to bring it to you. Holmes also writes, "A thought of love is always healing." May this work be a loving support to you on your spiritual path. The journey continues." — Rev. David Goldberg, Ph.D. Past Publisher and Editor, Science of Mind Magazine, Science of Mind Publishing

The Executioner's Toll, 2010 Matthew T. Mangino 2014-04-11 The Executioner's Toll, 2010 is a meticulous examination of every execution (and the details surrounding the execution) carried out in a single year—and a thought-provoking exploration into the minds of 46 killers as each plays the role of predator, quarry and condemned. The unsettling narratives begin with a murder on May 26, 1993, and end with an execution on December 16, 2010. The book chronicles 63 murders, 44 trials, countless appeals, two suicide attempts, 41 last meals, 33 final statements and 46 executions. The Executioner's Toll, 2010 could have covered any year in the modern era of the death penalty, but had to cover one complete year, in order to provide a true picture of the death penalty, executions and the anguish of victims. This book presents the compelling stories, accounts often neglected in the mainstream media. Every person facing the executioner has a story, every killing is as unique as it is devastating.

*Predictive Analytics* Eric Siegel 2013-02-19 You have been predicted—by companies, governments, law enforcement, hospitals, and universities. Their computers say, "I knew you were going to do that!" These institutions are seizing upon the power to predict whether you're going to click, buy, lie, or die. Why? For good reason: predicting human behavior combats financial risk, fortifies healthcare, conquers spam, toughens crime fighting, and boosts sales.

How? Prediction is powered by the world's most potent, booming unnatural resource: data. Accumulated in large part as the by-product of routine tasks, data is the unsalted, flavorless residue deposited en masse as organizations churn away. Surprise! This heap of refuse is a gold mine. Big data embodies an extraordinary wealth of experience from which to learn. Predictive analytics unleashes the power of data. With this technology, the computer literally learns from data how to predict the future behavior of individuals. Perfect prediction is not possible, but putting odds on the future—lifting a bit of the fog off our hazy view of tomorrow—means pay dirt. In this rich, entertaining primer, former Columbia University professor and Predictive Analytics World founder Eric Siegel reveals the power and perils of prediction: What type of mortgage behavior Chase Bank predicted Predicting which people will drop out of school, cancel a subscription, or get divorced before they are even aware of it themselves Why early retirement decreases life expectancy and vegetarians miss fewer flights Five reasons why organizations predict death How U.S. Bank and Obama's 2012 campaign calculated the way to most strongly influence each individual How IBM's Watson computer beat the human champs on TV's Jeopardy! How Target figures out you're pregnant and Hewlett-Packard deduces you're about to quit your job How judges and parole boards rely on crime-predicting computers to decide who stays in prison and who goes free What's predicted by Citibank, Facebook, Ford, Google, IBM, the IRS, Match.com, Pfizer, and Wikipedia A truly omnipresent science, predictive analytics affects everyone, every day. Although largely unseen, it drives millions of decisions, determining whom to call, mail, investigate, incarcerate, set up on a date, or medicate. Whether you are a consumer of it—or consumed by it—get a handle on the power of Predictive Analytics.

**Not Paved for Us** Camika Royal 2022-07-19 Not Paved for Us chronicles a fifty-year period in Philadelphia education, and offers a critical look at how school reform efforts do and do not transform outcomes for Black students and educators. This illuminating book offers an extensive, expert analysis of a school system that bears the legacy, hallmarks, and consequences that lie at the intersection of race and education. Urban education scholar Camika Royal deftly analyzes decades of efforts aimed at improving school performance within the School District of Philadelphia (SDP), in a brisk survey spanning every SDP superintendency from the 1960s through 2017. Royal interrogates the history of education and educational reforms, recounting city, state, and federal interventions. She covers SDP's connections with the Common School Movement and the advent of the Philadelphia Freedom Schools, and she addresses federal policy shifts, from school desegregation to the No Child Left Behind and Every Student Succeeds Acts. Her survey provides sociopolitical context and rich groundwork for a nuanced examination of why many large urban districts struggle to implement reforms with fidelity and in ways that advance Black students academically and holistically. In a bracing critique, Royal bears witness to the ways in which positive public school reform has been obstructed: through racism and racial capitalism, but also via liberal ideals, neoliberal practices, and austerity tactics. Royal shows how, despite the well-intended actions of larger entities, the weight of school reform, here as in other large urban districts, has been borne by educators striving to meet the extensive needs of their students, families, and communities with only the slightest material, financial, and human resources. She draws on the experiences of Black educators and community members and documents their contributions. Not Paved for Us highlights the experiences of Black educators as they navigate the racial and cultural politics of urban school reform. Ultimately, Royal names, dissects, and challenges the presence of racism in school reform policies and practices while calling for an antiracist future.

*Skirting Traditions: Arizona Women Writers and Journalists 1912-2012* Brenda Kimsey Warneka 2016-04-29 Women who skirt traditions, whether on the frontier of a young state or in a male-dominated profession, have relied on resilience, creativity, and grit to survive...and to flourish. These short biographies of twenty-eight female writers and journalists from Arizona span the one hundred years since Arizona became the forty-eighth state in the Union. They capture the emotions, the monumental and often overlooked events, and the pioneering spirit of women whose lives are now part of Arizona history. The remarkable women profiled in this anthology made the trek to Arizona from the big cities of Chicago, Los Angeles, and Washington, D.C.; from the green hills of Wisconsin, and from backwater towns in Oklahoma and Pennsylvania; by covered wagon, automobile, and, later, airplane. They came with their parents or their husbands, or as single women, with and without children. They came seeking health in the sun-blessed dryness of the desert, a job, a better lifestyle. What these women had in common was their love of writing and journalism, and their ability to use the written word to earn a living, to argue a cause, and to promote the virtues, beauty, history, and people of the Southwest. The narratives in *Skirting Traditions* move forward from the beginning of statehood to the modern day, describing daring feats, patriotic actions, and amazing accomplishments. They are women you won't soon forget.

*Ending Campus Violence* Brian Van Brunt 2012-08-21 With the growth of threats and violence in higher education settings, college campuses are increasingly expected to have systems in place to identify potentially aggressive individuals and intervene to ensure the safety of the campus population. This book will be useful for student affairs professionals as well as college counselors, psychologists, social workers interested in the practical management of aggression and violence on a college campus. It will also be a valuable resource for those involved in creating and running behavioral intervention teams and threat/risk assessment teams. Ten case studies from both the community and residential college settings provide a comprehensive overview of campus violence and how to intervene to prevent it. Pertinent background information is discussed as an introduction to these narratives, such as the fundamentals of aggression and violence on campuses; how these behaviors can impact students, faculty, and staff; and what can be learned from past campus violence. Along with discussion questions and a review of ways to approach each situation, experts in higher education, forensic risk assessment, law enforcement, and legal issues weigh in on each case study. Their perspectives offer a context and broad base of opinions and ideas on how each case could be handled. Additional examples for further training of the college counselor are given through a detailed look at almost 100 incidents of violence, including thwarted attacks, rampage shootings, and hostage situations.

**Eyes All Over the Sky** James Streckfuss 2016-05-19 The impact of the unsung heroes of WWI—"a must for any aviation enthusiast to further complement work on aerial reconnaissance in modern warfare" (Roads to the Great War), Beyond the heroic deeds of the fighter pilots and bombers of World War I, the real value of military aviation lay elsewhere; aerial reconnaissance, observation, and photography impacted the fighting in many ways, but little has been written about it. Balloons and airplanes regulated artillery fire, infantry liaison aircraft followed attacking troops and the retreats of defenders, aerial photographers aided operational planners and provided the data for perpetually updated maps, and naval airplanes, airships, and balloons acted as aerial sentinels in a complex anti-submarine warfare organization. Reconnaissance crews at the Battles of the Marne and Tannenberg averted disaster. Eyes All Over the Sky fully explores all the aspects of aerial reconnaissance and its previously under-appreciated significance. Also included are the individual experiences of British, American, and German airmen—true pioneers of aviation warfare. "With an interesting selection of photos, the book is not only an excellent reference—it is historically important." —Classic Wings "This well-researched history belongs on the shelf of anyone with a serious interest in the air war or the ground war of 1914-1918." —Steve Suddaby, former president of the World War One Historical Association

What's Fair on the Air? Heather Hendershot 2011-09-30 The rise of right-wing broadcasting during the Cold War has been mostly forgotten today. But in the 1950s and '60s you could turn on your radio any time of the day and listen to diatribes against communism, civil rights, the United Nations, fluoridation, federal income tax, Social Security, or JFK, as well as hosannas praising Barry Goldwater and Jesus Christ. Half a century before the rise of Rush Limbaugh and Glenn Beck, these broadcasters bucked the FCC's public interest mandate and created an alternate universe of right-wing political coverage, anticommunist sermons, and pro-business bluster. A lively look back at this formative era, What's Fair on the Air? charts the rise and fall of four of the most prominent right-wing broadcasters: H. L. Hunt, Dan Smoot, Carl McIntire, and Billy James Hargis. By the 1970s, all four had been hamstrung by the Internal Revenue Service, the FCC's Fairness Doctrine, and the rise of a more effective conservative movement. But before losing their battle for the airwaves, Heather Hendershot reveals, they purveyed ideological notions that would eventually triumph, creating a potent brew of religion, politics,

Mortal Sins: Sex, Crime, and the Era of Catholic Scandal Michael D'Antonio 2013-04-09 A Publishers Weekly Best Nonfiction Book of 2013 A Kirkus Reviews Best Book of 2013 An Edgar Award for Best Fact Crime Nominee An explosive, sweeping account of the scandal that has sent the Catholic Church into a tailspin -- and the brave few who fought for justice In the mid-1980s a dynamic young monsignor assigned to the Vatican's embassy in Washington set out to investigate the problem of sexually abusive priests. He found a scandal in the making, confirmed by secret files revealing complaints that had been hidden from police and covered up by the Church hierarchy. He also understood that the United States judicial system was eager to punish offenders and those who aided them. He presented all of this to the American bishops, warning that the Church could be devastated by negative publicity and bankrupted by its legal liability. They ignored him. Meanwhile, a young lawyer listened to a new client describe an abusive sexual history with a priest that began when he was ten years old. His parents' complaints were downplayed by Church officials who offered them money to go away. The lawyer saw a claim that any defendant would want to settle. Then he began to suspect he was onto something bigger, involving thousands of priests who had abused countless children while the Church had done almost nothing about it. The lawsuit he filed would touch off a legal war of historic and global proportions. Part history, part journalism, and part true-crime thriller, Michael D'Antonio's *Mortal Sins* brings to mind landmark books such as *All the President's Men*, *And the Band Played On*, and *The Informant*, as it reveals a long and ferocious battle for the soul of the largest and oldest organization in the world.

*Small, Gritty, and Green* Catherine Tumber 2011-11-10 How small-to-midsize Rust Belt cities can play a crucial role in a low-carbon, sustainable, and relocalized future. America's once-vibrant small-to-midsize cities—Syracuse, Worcester, Akron, Flint, Rockford, and others—increasingly resemble urban wastelands. Gutted by deindustrialization, outsourcing, and middle-class flight, disproportionately devastated by metro freeway systems that laid waste to the urban fabric and displaced the working poor, small industrial cities seem to be part of America's past, not its future. And yet, Catherine Tumber argues in this provocative book, America's gritty Rust Belt cities could play a central role in a greener, low-carbon, relocalized future. As we wean ourselves from fossil fuels and realize the environmental costs of suburban sprawl, we will see that small cities offer many assets for sustainable living not shared by their big city or small town counterparts, including population density and nearby, fertile farmland available for new environmentally friendly uses. Tumber traveled to twenty-five cities in the Northeast and Midwest—from Buffalo to Peoria to Detroit to Rochester—interviewing planners, city officials, and activists, and weaving their stories into this exploration of small-scale urbanism. Smaller cities can be a critical part of a sustainable future and a productive green economy. *Small, Gritty, and Green* will help us develop the moral and political imagination we need to realize this.

**Dying on the Job** Ronald D. Brown 2012-11-15 *Dying on the Job* looks at the variety of reasons people take the lives of coworkers or themselves and offers explanations for their behavior. *Reassembling Scholarly Communications* Martin Paul Eve 2020-10-20 A range of perspectives on the complex political, philosophical, and pragmatic implications of opening research and scholarship through digital technologies. The Open Access Movement proposes to remove price and permission barriers for accessing peer-reviewed research work--to use the power of the internet to duplicate material at an infinitesimal cost-per-copy. In this volume, contributors show that open access does not exist in a technological vacuum; there are complex political, philosophical, and pragmatic implications for opening research through digital technologies. The contributors examine open access across spans of colonial legacies, knowledge frameworks, publics and politics, archives and digital preservation, infrastructures and platforms, and global communities.

*Losing an Enemy* Trita Parsi 2017-01-01 The definitive book on Obama's historic nuclear deal with Iran from the author of the Foreign Affairs Best Book on the Middle East in 2012 This timely book focuses on President Obama's deeply considered strategy toward Iran's nuclear program and reveals how the historic agreement of 2015 broke the persistent stalemate in negotiations that had blocked earlier efforts. The deal accomplished two major feats in one stroke: it averted the threat of war with Iran and prevented the possibility of an Iranian nuclear bomb. Trita Parsi, a Middle East foreign policy expert who advised the Obama White House throughout the talks and had access to decision-makers and diplomats on the U.S. and Iranian sides alike, examines every facet of a triumph that could become as important and consequential as Nixon's rapprochement with China. Drawing from more than seventy-five in-depth interviews with key decision-makers, including Iran's Foreign Minister Javad Zarif and U.S. Secretary of State John Kerry, this is the first authoritative account of President Obama's signature foreign policy achievement.

Medicine at Michigan Joel Howell 2017-09-07 A trailblazer in American medical education since 1850, the Medical School at the University of Michigan was the first program in the United States to own and operate its own hospital and the earliest major medical school to admit women. In the late nineteenth century, the School emerged as a frontrunner in modern scientific medical education in the United States, and one of the first in the nation to implement both required clinical clerkships and laboratory science as part of their curriculum, including the first full laboratory course in bacteriology. Decades later, the Medical School remained at the vanguard of medical education by increasing its focus on research, and these efforts resulted in world-changing breakthroughs such as field-testing the first safe polio vaccine, proposing a genetic mechanism for sickle cell anemia, inventing the fiber-optic endoscope, and cloning the gene responsible for cystic fibrosis. The Medical School's history is not without its growing pains: alongside top-tier education and incredible innovation came times of stress with the broader University and Ann Arbor communities, complex expectations and realities for student diversity, and many controversies over curriculum and methodology. Medicine at Michigan explores how the School has dealt with changes in medical science,

practice, and social climates over the past 150 years and illuminates the complicated interactions between economic, social, and cultural trends and medical education at the University of Michigan and across the nation. This book will appeal to readers interested in the history of medicine as well as current and former medical faculty members, students, and employees of the University of Michigan Medical School.

Racial Spectacles Jonathan Markovitz 2011-06 *Racial Spectacles: Explorations in Media, Race, and Justice* examines the crucial role the media has played in circulating and shaping national dialogues about race through representations of crime and racialized violence. Jonathan Markovitz argues that mass media "racial spectacles" often work to shore up racist stereotypes, but that they also provide opportunities to challenge prevalent conceptions of race, and can be seized upon as vehicles for social protest. This book explores a series of mass media spectacles revolving around the news, prime-time television, Hollywood cinema, and the internet that have either relied upon, reconfigured, or helped to construct collective memories of race, crime, and (in)justice. The case studies explored include the Scottsboro interracial rape case of the 1930s, the Kobe Bryant rape case, the Los Angeles Police Department's "Rampart scandal," the Abu Ghraib photographs, and a series of racist incidents at the University of California. This book will prove to be important not only for courses on race and media, but also for any reader interested in issues of the media's role in social justice.

Understanding Authority in Higher Education Dean O. Smith 2015-01-22 Within the complex environment of higher education, administrators and faculty members face daunting challenges in their unique domains of institutional governance. Many of the greatest challenges arise from basic misunderstandings of authority and its limitations by

administrators and faculty members alike. These misunderstandings are the primary source of disruptive confusion, mistrust, and mismanagement. Consequently, an institution's governance would improve significantly if its personnel clearly understand the fundamental principles of authority. To bring about this improvement, *Understanding Authority in Higher Education* clarifies issues of authority in an academic setting. Throughout, it introduces basic concepts of higher-education administration and then examines the limits of authority in context. Pedagogically, the book strives continuously to ascertain whether authority is used properly from a legal perspective, emphasizing the influence of academic cultural norms on legal principles and vice versa. But, *Understanding Authority in Higher Education* goes further than law textbooks by using real and anecdotal case studies to examine aspects of authority that don't appear in court proceedings— those that lie beyond the reach of the law. In these cases, the book explores the anthropology— the behavior and the culture—of authority in the academic environment.

**Rise and Fall of the UK Film Council** Gillian Doyle 2015-08-18 Drawing on interviews with leading film executives, politicians and industry stakeholders, including Alan Parker, Stewart Till and Tim Bevan, this book provides an empirically grounded analysis of the rise and unexpected fall of the UK Film Council, the key strategic body responsible for supporting film in the UK for over a decade. As well as offering a critical overview of the political, policy and technological contexts which framed the organisation's creation, existence and eventual demise, the book provides a probing analysis of the tensions between national and global interests in an increasingly transnational film industry, not least underlining how both US and EU interests and pressures have played themselves out. It therefore provides a timely and significant investigation into the contemporary policy environment for film in the 21st century.

**A Single Roll of the Dice** Trita Parsi 2012-01-24 Have the diplomatic efforts of the Obama administration toward Iran failed? Was the Bush administration's emphasis on military intervention, refusal to negotiate, and pursuit of regime change a better approach? How can the United States best address the ongoing turmoil in Tehran? This book provides a definitive and comprehensive analysis of the Obama administration's early diplomatic outreach to Iran and discusses the best way to move toward more positive relations between the two discordant states. Trita Parsi, a Middle East foreign policy expert with extensive Capitol Hill and United Nations experience, interviewed 70 high-ranking officials from the U.S., Iran, Europe, Israel, Saudi Arabia, Turkey, and Brazil—including the top American and Iranian negotiators—for this book. Parsi uncovers the previously unknown story of American and Iranian negotiations during Obama's early years as president, the calculations behind the two nations' dealings, and the real reasons for their current stalemate. Contrary to prevailing opinion, Parsi contends that diplomacy has not been fully tried. For various reasons, Obama's diplomacy ended up being a single roll of the dice. It had to work either immediately—or not at all. Persistence and perseverance are keys to any negotiation. Neither Iran nor the U.S. had them in 2009.
