**Australia and the United Nations** James Cotton 2012 This landmark reference work is the first complete history of Australia and its relationship with, and role within, the United Nations. On 17 January 1946, when the United Nations Security Council held its inaugural session, an Australian representative, Norman Makin, presided. If all members adhered to the principles of the United Nations Charter, predicted Makin, the United Nations would become "a great power for the good of the world, bringing that freedom from fear, which is necessary before we can hope for progress and welfare in all lands". Australia and the United Nations traces how Australia committed itself to the United Nations project, from before the convening of the first United Nations Security Council until the eve of its election to a fifth term on that body. The book begins with Australian involvement with the organisation that preceded the United Nations, the League of Nations. It then analyses the role played by Australian Minister for External Affairs, HV Evatt, and his staff in framing the United Nations Charter at San Francisco in 1945. Three chapters analyse Australia's diplomacy towards the Security Council, its efforts in peacekeeping, and evolving policies and attitudes towards arms control and disarmament. Two chapters discuss Australia's engagement with the United Nations' manifold specialised agencies and the role of the broader UN family in development. Another two chapters are devoted to a study of Australia's role in areas of United Nations operation only dimly foreseen by its founders at San Francisco-decolonisation and the environment. The two final chapters examine Australia's contribution to the promotion of human rights and international law and the important role it has played seeking to improve the United Nations' performance to equip it to meet new challenges in global politics. Australia and the United Nations tells us what was done in the past, and why. It is essential reading for anyone who wants to better understand Australia's multilateral diplomacy, and our future choices.

Engaging Citizens in Policy Making Tiina Randma-Liiv 2022-02-10 Exploring academic and policy thinking on e-participation, this book opens up the organizational and institutional 'black box' and provides new insights into how public administrations in 15 European states have facilitated its implementation. Using multiple case studies, the book offers a systematic analysis of how e-participation initiatives are actually organized and administered within the government, as well as how the political context and collaborative partnerships both within the government and with non-governmental actors affect the adoption and institutionalization of e-participation platforms. Contributors provide new empirical evidence on some of the most pressing questions related to the organization and management of e-participation, aiming to provide better understanding of citizen participation platforms. Providing comparative knowledge on the institutional, administrative and organizational aspects of e-participation, this book will be an ideal read for public policy researchers and government practitioners interested in innovation and technology in public administration.

**Women Writing War** Katharina von Hammerstein 2018-08-06 Recent scholarship has broadened definitions of war and shifted from the narrow focus on battles and power struggles to include narratives of the homefront and private sphere. To expand scholarship on textual representations of war means to shed light on the multiple theaters of war, and on the many voices who contributed to, were affected by, and/or critiqued German war efforts. Engaged women writers and artists commented on their nations' imperial and colonial ambitions and the events of the tumultuous beginning of the twentieth century. In an interdisciplinary investigation, this volume explores select female-authored, German-language texts focusing on German colonial wars and World War I and the discourses that promoted or critiqued their premises. They examine how colonial conflicts contributed to a persistent atmosphere of *Kriegsbegeisterung* (war enthusiasm) that eventually culminated in the outbreak of World War I, or a *Kriegskritik* (criticism of war) that resisted it. The span from German colonialism to World War I brings these explosive periods into relief and challenges readers to think about the intersection of nationalism, violence and gender and about the historical continuities and disruptions that shape such events.

**Industrial Applications of Batteries** Michel Broussely 2007-02-13 Industrial Applications of Batteries looks at both the applications and the batteries and covers the relevant scientific and technological features. Presenting large batteries for stationary applications, e.g. energy storage, and also batteries for hybrid vehicles or different tools. The important aerospace field is covered both in connection with satellites and space missions. Examples of applications include, telecommunications, uninterruptible power supplies, systems for safety/alarms, car accessories, toll collection, asset tracking systems, medical equipment, and oil drilling. The first chapter on applications deals with electric and hybrid vehicles. Four chapters are devoted to stationary applications, i.e. energy storage (from the electric grid or solar/wind energy), load levelling, telecommunications, uninterruptible power supplies, back-up for safety/alarms. Battery management by intelligent systems and prediction of battery life are dealt with in a dedicated chapter. The topic of used battery collection and recycling, with the description of specific treatments for the different systems, is also extensively treated in view of its environmental relevance. Finally, the world market of these batteries is presented, with detailed figures for the various applications. \* Updated and full overview of the power sources for industries \* Written by leading scientists in their fields \* Well balanced in terms of scientific and technical information

**Inland Fisheries** 2008-04-15 The current high demand for fish and increased awareness of the role of the environment in supporting human well being has led to a situation where attitudes to inland water resources are changing rapidly. Gambling Debt E. Paul Durrenberger 2014-12-04 Gambling Debt is a game-changing contribution to the discussion of economic crises and neoliberal financial systems and strategies. Iceland's 2008 financial collapse was the first case in a series of meltdowns, a warning of danger in the global order. This full-

scale anthropology of financialization and the economic crisis broadly discusses this momentous bubble and burst and places it in theoretical, anthropological, and global historical context through descriptions of the complex developments leading to it and the larger social and cultural implications and consequences. Chapters from anthropologists, sociologists, historians, economists, and key local participants focus on the neoliberal policies—mainly the privatization of banks and fishery resources—that concentrated wealth among a select few, skewed the distribution of capital in a way that Iceland had never experienced before, and plunged the country into a full-scale economic crisis. *Gambling Debt* significantly raises the level of understanding and debate on the issues relevant to financial crises, painting a portrait of the meltdown from many points of view—from bankers to schoolchildren, from fishers in coastal villages to the urban poor and immigrants, and from artists to philosophers and other intellectuals. This book is for anyone interested in financial troubles and neoliberal politics as well as students and scholars of anthropology, sociology, economics, philosophy, political science, business, and ethics. Publication supported in part by the National Science Foundation.
