Architecture for the Dead : Cairo's Medieval Necropolis Galila El Kadi 2007 The great medieval necropolis of Cairo, comprising two main areas that together stretch twelve kilometers from north to south, constitutes a major feature of the city's urban landscape. With monumental and smaller-scale mausolea dating from all eras since early medieval times, and boasting some of the finest examples of Mamluk architecture not just in the city but in the region, the necropolis is an unparalleled--and until now largely undocumented--architectural treasure trove. In *Architecture for the Dead*, architect Galila El Kadi and photographer Alain Bonnamy have produced a comprehensive and visually stunning survey of all areas of the necropolis. Through detailed and painstaking research and remarkable photography, in text, maps, plans, and pictures, they describe and illustrate the astonishing variety of architectural styles in the necropolis: from Mamluk to neo-Mamluk via baroque and neo-pharaonic, from the grandest stone buildings with their decorative domes and minarets to the humblest--but elaborately decorated--wooden structures. The book also documents the modern settlement of the necropolis by families creating a space for the living in and among the tombs and architecture for the dead.

Michel Houellebecq and the Literature of Despair Carole Sweeney 2013-11-21 Widely acknowledged as an important, if highly controversial, figure in contemporary literature, French novelist and poet Michel Houellebecq has elicited diverse critical responses. In this book Carole Sweeney examines his novels as a response to the advance of neoliberalism into all areas of affective human life. This historicizing study argues that le monde houellebecquien is an 'atomised society' of banal quotidian alienation populated by quietly resentful men who are the botched subjects of late-capitalism. Addressing Houellebecq's handling of the 'failure' of the radical thought of '68, Sweeney looks at the ways in which his fiction treats feminism, the decline of religion and the family, as well as the

obsolescence of French 'theory' and the Sartrean notion of 'engaged' literature. Reading the world with the disappointed idealism of a contemporary moralist, Houellebecq's novels, Sweeney argues, fluctuate between despair for the world as it is and a limp utopian hope for a post-humanity.

The Fourth Industrial Revolution Klaus Schwab 2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Politicization of Ecological Issues Gabrielle Bouleau 2019-09-04 The legitimacy of environmental policies is an issue of increasing concern for analysts. Ecological stakes are deemed to be global, but global public decisions are rare and implemented with difficulty. Dissensus prevails on environmental ethics and there is little evidence of any greening of policy tools. The global framing of the environment fails to account for how people relate to the ecological realities which surround them. Rather than placing the environment at a distance, *Politicization of Ecological Issues* advocates for building legitimacy from people's perceptions of singular forms and patterns in their environment. Based on scholarly literature in political ecology and empirical cases of water policy in Europe, the book shows how the qualification of environmental realities has been politicized and translated into motives for public action. Similarly, it argues that theoretical debates addressing the ecological crisis are not only dealing with ideas, but rather advocating for specific environmental forms that are deemed to be motives of hope or worry.

accessible overview of ancient pagan religions throughout the European continent. Before there were Christians, the peoples of Europe were pagans. Were they bloodthirsty savages hanging human offerings from trees? Were they happy ecologists, valuing the unpolluted rivers and mountains? In *European Paganism* Ken Dowden outlines and analyses the diverse aspects of pagan ritual and culture from human sacrifice to pilgrimage lunar festivals and tree worship. It includes: * a 'timelines' chart to aid with chronology * many quotations from ancient and modern sources translated from the original language where necessary, to make them accessible * a comprehensive bibliography and guide to further reading.

Basic Geophysics Enders A. Robinson 2017-09-01 For a thorough comprehension of the field of geophysics, we need to understand its origins. *Basic Geophysics* by Enders Robinson and Dean Clark takes us on a journey that demonstrates how the achievements of our predecessors have paved the way for our modern science. From the ancient Greeks through the Enlightenment to the greats of the contemporary age, the reasoning behind basic principles is explored and clarified. With that foundation, several advanced topics are examined, including: the 3D wave equation; ray tracing and seismic modeling; reflection, refraction, and diffraction; and WKB migration. The successful integration of the historical narrative alongside practical analysis of relevant principles makes this book an excellent resource for both novices and professionals, and all readers will gain insight and appreciation for the seismic theory that underlies modern exploration seismology.

Attraction étrange Louise Hervé 2013 For their first artist's book, Louise Hervé and Chloé Maillet draw inspiration from the popular American 'pulp' genre – mostly dedicated to fantastical literature and science-fiction – to present a first overview of their work. They commissioned a graphic illustrator to design a 'pulp' cover, and three authors to write curious short stories, the outlines of which are derived from their artworks and their recent exhibitions. Hervé and Maillet have also redesigned all of their artworks as black and white illustrations to accompany their performance scripts and their own texts,

such as the nineteenth-century-like serial story they published in 2012 in a regional newspaper. Fascinated by narrative processes and multi-layered (hi)stories, their book is a way to filter their practice through a literary genre they are familiar with. Born in 1981, living in Paris and working together since 2000, Louise Hervé and Chloé Maillet are among the most active artists of the new French scene, producing genre movies, performed conferences, and installations. Meticulously crafted and thoroughly updated, the Eighth Edition of Oxford's Essential World Atlas is an indispensable resource for students, teachers, armchair travelers, tourists, and anyone else curious about all corners of the globe.

Prison Journal, 1940-1945 Edouard Daladier 1995-03-21 "The French Prime Minister who signed the Munich Agreement in 1938 and who one year later led his country into war against Hitler's Germany, Edouard Daladier was arrested by the Vichy regime and imprisoned in France and Germany until the war's end. As a pastime and a catharsis, Daladier wrote." "He wrote about what had happened to him and to his country, about day-to-day conditions in captivity, and about what he could glean of the anti-Nazi war effort through newspaper accounts, from the visits of his friends and family, and from his well-hidden radio receiver. He wrote of the accusations made against him by his former proteges and comrades-in-arms; and of his trial, during which the charges oddly metamorphosed from having declared war on Germany to not having sufficiently prepared France for battle (the charges were of little importance, as the verdict had been previously decided)." "Ever the statesman, Daladier wrote most of all about his hopes and fears for France and Europe - which hung so heavily, at first, upon the battlefield successes of the British, American, and Allied forces; and later, upon the Allies' refusal to recognize in Soviet power the danger of the very totalitarianism that they had been fighting to eliminate. At the war's end, witnessing the devastation of Germany, Daladier wrote with a poignant sympathy that is unexpectedly moving." "Daladier's notes remained forgotten and unpublished until twenty years after his death, when they were discovered and compiled by his son Jean. They are presented here in English for the first time. By turns sorrowful, enraged, humorous, and philosophical, this lively narrative gives fresh insights into the tangled politics of the era."--BOOK JACKET. Sakura's Cherry Blossoms Robert Paul Weston 2018-02-20 A warm, gorgeous exploration of a little girl's experience immigrating to a new country and missing her home and her grandmother, who still lives far away. Sakura's dad gets a new job in America, so she and her parents make the move from their home in Japan. When she arrives in the States, most of all she misses her grandmother and the cherry blossom trees, under which she and her grandmother used to play and picnic. She wonders how she'll ever feel at home in this new place, with its unfamiliar language and landscape. One day, she meets her neighbor, a boy named Luke, and begins to feel a little more settled. When her grandmother becomes ill, though, her family takes a trip back to Japan. Sakura is sad when she returns to the States and once again reflects on all she misses. Luke does his best to cheer her up -- and tells her about a surprise he knows she'll love, but she'll have to wait till spring. In the meantime, Sakura and Luke's friendship blooms and finally, when spring comes, Luke takes her to see the cherry blossom trees flowering right there in her new neighborhood. *Sakura's Cherry Blossoms* captures the beauty of the healing power of friendship through Weston's Japanese poetry-inspired text and Saburi's breathtaking illustrations.

Issues in Curating Contemporary Art and Performance Judith Rugg 2007 To stay relevant, art curators must keep up with the rapid pace of technological innovation as well as the aesthetic tastes of fickle critics and an ever-expanding circle of cultural arbiters. *Issues in Curating Contemporary Art and Performance* argues that, despite these daily pressures, good curating work also requires more theoretical attention. In four thematic sections, a distinguished group of contributors consider curation in light of interdisciplinary and emerging practices, examine conceptions of curation as intervention and contestation, and explore curation's potential to act as a reconsideration of conventional museum spaces. Against the backdrop of cutting-edge developments in electronic art, art/science collaboration, nongallery spaces, and virtual fields, contributors propose new approaches to curating and new ways of fostering critical inquiry. Now in paperback, this volume is an essential read for scholars, curators, and art enthusiasts alike.

The Jedburghs Will Irwin 2009-04-29 The story of the Special Forces in World War II has never fully been told before. Information about them began to be declassified only in the 1980s. Known as the Jedburghs, these Special Forces were selected from members of the British, American, and Free French armies to be dropped in teams of three deep behind German lines. There, in preparation for D-Day, they carried out what we now know as unconventional warfare: supporting the French Resistance in guerrilla attacks, supply-route disruption, and the harassment and obstruction of German reinforcements. Always, they operated against extraordinary odds. They had to be prepared to survive pitched battles with German troops and Gestapo manhunts for weeks and months while awaiting the arrival of Allied ground forces. They were, in short, heroes. The Jedburghs finally tells their story and offers a new perspective on D-Day itself. Will Irwin has selected seven of the Jedburgh teams and told their stories as gripping personal narratives. He has gathered archival documents, diaries and correspondence, and interviewed Jed veterans and family members in order to present this portrait of their crucial role - a role recognized by Churchill and Eisenhower - in the struggle to liberate Europe in 1944-45. This is narrative history at its most compelling; a vivid drama of the battle for France from deep behind enemy lines.

The Rejection of Consequentialism Samuel Scheffler 1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best

possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

Cases in Public Relations Strategy Burton St. John III 2018-08-02 *Cases in Public Relations Strategy* draws on original, real-world case studies to provide students with a strategic approach to meeting the needs of a client before, during, and beyond a campaign. Using the RACE (Research, Action Planning, Communication, and Evaluation) model, students explore successful contemporary campaigns and evaluate best practices in all major areas of public relations activity. This practical, client-oriented text shows students how to systematically evaluate and adapt to the needs of a particular client—whether big or small, global or local, for-profit or nonprofit—in order to launch the most effective campaign. Each case includes a brief introduction focused on fundamentals and core competencies, and all cases have been carefully selected to present a wide range of client types. In addition to the lessons from professionals in the case studies, a section on PR consulting and an appendix on advancing your PR career give students the knowledge and skills they need for success in the field. Maps of the Imagination Peter Turchi 2011-06-01 In *Maps of the Imagination*, Peter Turchi posits the idea that maps help people understand where they are in the world in the same way that literature, whether realistic or experimental, attempts to explain human realities. The author explores how writers and cartographers use many of the same devices for plotting and executing their work, making crucial decisions about what to include and what to leave out, in order to get from here to there, without excess baggage or a confusing surplus of information. Turchi traces the history of maps, from their initial decorative and religious purposes to their later instructional applications. He describes how maps rely on projections in order to portray a three-dimensional world on the two-dimensional flat surface of paper, which he then relates to what writers do in projecting a literary work from the imagination onto the page.
