Mindfulness J. Mark G. Williams 2013-10-18 Mindfulness-based approaches to medicine, psychology, neuroscience, healthcare, education, business leadership, and other major societal institutions have become increasingly common. New paradigms are emerging from a confluence of two powerful and potentially synergistic epistemologies: one arising from the

wisdom traditions of Asia and the other arising from post-enlightenment empirical science. This book presents the work of internationally renowned experts in the fields of Buddhist scholarship and scientific research, as well as looking at the implementation of mindfulness in healthcare and education settings. Contributors consider the use of mindfulness throughout history and look at the actual meaning of mindfulness whilst identifying the most salient areas for potential synergy and for potential disjunction. Mindfulness: Diverse Perspectives on its Meanings, Origins and Applications provides a place where wisdom teachings, philosophy, history, science and personal meditation practice meet. It was originally published as a special issue of Contemporary Buddhism.

Cry of Pain Mark Williams 2014-07-03 Suicide presents a real and often tragic puzzle for the family and friends of someone who has committed or attempted suicide. 'Why did they do it?'

'How could they do this?' 'Why did they not see there was help available?' For therapists and clinicians who want to help those who are vulnerable and their families, there are also puzzles that often seem unsolvable. What is it that causes someone to end his or her own life, or to harm themselves: is it down to a person's temperament, the biology of their genes, or to social conditions? What provides the best clue to a suicidal person's thoughts and behaviour? Each type of explanation, seen in isolation, has its drawbacks, so we need to see how they may fit together to give a more complete picture. Cry of Pain examines the evidence from a social, psychological and biological perspective to see if there are common features that might shed light on suicide. Informative and sympathetically written, it is essential reading for therapists and mental health professionals as well as those struggling with suicidal feelings, their families and friends.

Finding the Space to Lead Janice Marturano 2014-01-07 The complexity and relentless pace of our world places exceptional demands on leaders today. They work incredibly hard and yet feel that they are not meeting their own expectations of excellence. They feel disconnected from their own values and overburdened. By the thousands, they seek out books on leadership skills, time management, and “getting things done,” but the techniques these volumes offer, useful as they are, don't often don't speak to the leader's fundamental sense that something is missing. Janice Marturano, a senior executive with decades of experience in Fortune 500 corporations, explains how Mindful Leadership training integrates the practice of mindfulness-meditation and self-awareness-with the practical tools of management, enabling leaders to bring a wider range of their capacities to the challenges at hand. We already know from scientific research that mindfulness practices enhance mental health and improve clarity and focus. FINDING THE SPACE shows how this training has specific value for leaders. This is not a new “leadership system” to add to the burden of already overworked people. It brings the concepts of mindfulness into the everyday life of anyone in a leadership role, through specific exercises that address practical issues-the calendar, schedule, phone usage, meetings, to-do list, and strategic planning, as well as interpersonal challenges such as listening and working with difficult colleagues. Leaders who have experienced mindfulness training report that it provides a “transformative experience” with significant improvements in innovation, self-awareness, listening, and making better decisions. In FINDING THE SPACE TO LEAD, Marturano masterfully lays out her proven techniques for promoting mindfulness in the busy executive's working life.

From Sam Harris, neuroscientist and author of numerous New York Times bestselling books, Waking Up is for the twenty percent of Americans who follow no religion but who suspect that important truths can be found in the experiences of such figures as Jesus, the Buddha, Lao Tzu, Rumi, and the other saints and sages of history. Throughout this book, Harris argues that there is more to understanding reality than science and secular culture generally allow, and that how we pay attention to the present moment largely determines the quality of our lives. Waking Up is part memoir and part exploration of the scientific underpinnings of spirituality. No other book marries contemplative wisdom and modern science in this way, and no author other than Sam Harris—a scientist, philosopher, and famous skeptic—could write it.

A Heart Full of Peace Joseph Goldstein 2010-10-19 Love, compassion, and peace - these words are at the heart of all spiritual endeavors. Although we intuitively resonate with their meaning and value, for most of us, the challenge is how to embody what we know; how to transform these words into a vibrant, living practice. In these times of conflict and uncertainty, this transformation is far more than an abstract ideal; it is an urgent necessity. Peace in the world begins with us. This wonderfully appealing offering from one of the most trusted elders of Buddhism in the West is a warm and engaging exploration of the ways we can cultivate and manifest peace as wise and skillful action in the world. This charming book is illuminated throughout with lively, joyous, and sometimes even funny citations from a host of contemporary and ancient sources - from the poetry of W.S. Merwin and Galway Kinnell to the haiku of Issa and the great poet-monk Ryokan, from the luminous aspirations of Saint Francis of Assisi to the sage advice of Thich Nhat Hanh and the Dalai Lama.
