The Psychology of Control and Aging (Psychology Revivals) Margret M. Baltes 2014-08-01 Originally published in 1986, the central topic of this book is the analysis and application of control-related beliefs and behaviours for theory and practice in the psychology of aging. The volume was written for two specific interrelated purposes aimed at cross-fertilization between the psychology of control and the field of gerontology. The first purpose was to summarise available research and theory on the psychology of control for researchers and professionals interested in gerontology at the time. The second was to enrich the field of the psychology of control.

*Old Age and Finitude* Joep M. A. Munnichs 1980-01-01

**The Experience of Death ; The Moral Problem of Suicide** Paul-Louis Landsberg 1977

Exit House Jo Roman 1992 Written before Roman's carefully deliberated suicide, this book examines the idea of rational suicide as a human right and proposes an exit house for those who prefer a self-determined death

**Rehabilitation in the Aging** T. Franklin Williams 1984

*The Psychology of Control* Ellen J. Langer 1983 Langer uses her original field research to show the impact of a person's sense of control on their mental and physical well being. The book begins by dealing with general issues, refining our concept of what a sense of control is, showing how it differs from power, choice, or ability to predict events. Chapters in the second section show how people lose and regain control in everyday life: asking a favour, taking precautions against burglary. The third section shows the effects that loss of control have on the elderly, and the benefits and adverse effects of treatments that increased their sense of control. 'This material can be strongly recommended to those who are involved in the management of the chronic sick, the elderly

*Older Persons* Frank Riessman 1977-10

**The Child's Discovery of Death** Anthony, Sylvia 2013-07-04 Routledge is now re-issuing this prestigious series of 204 volumes originally published between 1910 and 1965. The titles include works by key figures such as C.G. Jung, Sigmund Freud, Jean Piaget, Otto Rank, James Hillman, Erich Fromm, Karen Horney and Susan Isaacs. Each volume is available on its own, as part of a themed mini-set, or as part of a specially-priced 204-volume set. A brochure listing each title in the "International Library of Psychology" series is available upon request.

*The Psychology of Death* Robert Kastenbaum, PhD 2000-02-07 In this extensively updated and revised edition, Dr. Kastenbaum continues to examine and expand upon issues of dying and the ways in which we shape and reshape our conceptions of death. New to the Third Edition are chapters on how we construct death; Death in adolescence and adulthood including discussion on suicide, physician assisted death and Regret Theory and Denial; new approaches to the role of death anxiety, Terror Management Theory, and Edge Theory, and much more. A major contribution to the literature -- this book is must reading for professionals and students of psychology, thanatology, gerontology, social work, and those working in hospice care.
