ABC of Physics Lev Okun 2012 This little book concentrates on the foundations of modern physics (its OC ABC"sOCO) and its most fundamental constants: c OCo the velocity of light and \hbar OCo the quantum of action. First of all, the book is addressed to professional physicists, but in order to achieve maximal concentration and clarity it uses the simplest (high school) mathematics. As a result many pages of the book will be useful to college students and may appeal to a more general audience."

A Season of Angels LP Debbie Macomber 2011-06-28 Shirley, Goodness, and Mercy—three willing but sometimes wayward angels— are each given someone's prayer to answer.... Shirley: She's sent to answer the prayers of nine-year-old Timmy Potter, who longs for a new father, although his mother, Jody, has vowed never to trust any man again... Goodness: She knows Monica Fischer longs for a husband and home of her own, but the young woman has practically given up on finding the right man to stand by her side... Mercy: Can Mercy bring hope back into Leah Lundberg's life? This maternity nurse desperately wants a child to fill up the home she's made with her husband, Andrew. But there's just one catch: each angel must teach her charge a memorable lesson before the prayer can be granted...

Structures or Why things don't fall down J. Gordon 2012-12-06 I am very much aware that it is an act of extreme rashness to attempt to write an elementary book about structures. Indeed it is only when the subject is stripped of its mathematics that one begins to realize how difficult it is to pin down and describe those structural concepts which are often called 'elementary'; by which I suppose we mean 'basic' or 'fundamental'. Some of the omissions and oversimplifications are intentional but no doubt some of them are due to my own brute ignorance and lack of understanding of the subject. Although this volume is more or less a sequel to *The New Science of Strong Materials* it can be read as an entirely separate book in its own right. For this reason a certain amount of repetition has been unavoidable in the earlier chapters. I have to thank a great many people for factual information, suggestions and for stimulating and sometimes heated discussions. Among the living, my colleagues at Reading University have been generous with help, notably Professor W. D. Biggs (Professor of Building Technology), Dr Richard Chaplin, Dr Giorgio Jeronimidis, Dr Julian Vincent and Dr Henry Blyth; Professor Anthony Flew, Professor of Philosophy, made useful suggestions about the last chapter. I am also grateful to Mr John Bartlett, Consultant Neurosurgeon at the Brook Hospital. Professor T. P. Hughes of the University of the West Indies has been helpful about rockets and many other things besides. My secretary, Mrs Jean Collins, was a great help in times of trouble. Mrs Nethercot of Vogue was kind to me about dressmaking. Mr Gerald Leach and also many of the editorial staff of Penguins have exercised their accustomed patience and helpfulness. Among the dead, I owe a great deal to Dr Mark Pryor - lately of Trinity College, Cambridge - especially for discussions about biomechanics which extended over a period of nearly thirty
