**Developing, Modelling and Assessing Second Languages** Jörg-U. Keßler 2016-06-29 This edited volume brings together the work of a number of researchers working in the framework of Processability Theory (PT), a psycholinguistic theory of second language acquisition (SLA) (Pienemann 1998; 2005). The aim of the volume is two-fold: It engages with current issues in both theory development and theory application and focuses on theoretical developments within the framework of PT as well as issues related to second language teaching and assessment. In coordinating approaches to addressing both theoretical and applied aspects of SLA, this volume aims at bridging the gap between theory and practice. It also reflects the richness of debate within the field of PT-based research. The volume is intended for postgraduate students, SLA researchers as well as language teachers. As of January 2019, this e-book is freely available, thanks to the support of libraries working with Knowledge Unlatched.

**The Singing Flute** Peter-Lukas Graf 2003-10-01 (Schott). What is a "good" tone in flute playing? Surely it must be more than just "clean" (ie not producing many unwanted sounds), "colourful" (with adequate timbre), "flexible" (able to produce dynamic adjustments) or just a really big tone. The well-known Swiss flautist P.-L. Graf is concerned that the production of tone should not be seen as an aesthetic end in itself, but chiefly as a living means of expression and as a "musical" event. In this practice volume he has picked 3x7 examples from the flute and operatic repertoire in order to work through three sets of themes: 1.) cantabile playing at a piano dynamic, 2.) dynamic flexibility and variation of tone colour, 3.) fullness and intensity of sound. This offers concentrated training for all flautists, from student through to professional player. Text in German, French and English

*The Art of Tonal Analysis* Carl Schachter 2016 Carl Schachter is the world's leading practitioner of Schenkerian theory and analysis. His articles and books have been broadly influential, and are seen by many as models of musical insight and lucid prose. Yet, perhaps his greatest impact has been felt in the classroom. At the Mannes College of Music, the Juilliard School of Music, Queens College and the Graduate Center of the City University of New York, and at special pedagogical events around the world, he has taught generations of musical performers, composers, historians, and theorists over the course of his long career. In Fall 2012, Schachter taught a doctoral seminar at the CUNY Graduate Center in which he talked about the music and the musical issues that have concerned him most deeply; the course was in essence a summation of his extensive and renowned teaching. In *The Art of Tonal Analysis*,

winner of the Society for Music Theory's 2017 Citation of Special Merit, music theorist Joseph Straus presents edited transcripts of those lectures. Accompanied by abundant music examples, including analytical examples transcribed from the classroom blackboard, Straus's own visualizations of material that Schachter presented aurally at the piano, and Schachter's own extended Schenkerian graphs and sketches, this book offers a vivid account of Schachter's masterful pedagogy and his deep insight into the central works of the tonal canon. In making the lectures of one of the world's most extraordinary musicians and musical thinkers available to a wide audience, *The Art of Tonal Analysis* is an invaluable resource for students and scholars of music.

*Falling for the Playboy* Kennedy Fox 2018-11-09 Never trust a man who gets paid to take off his clothes for a living and then uses it as a pick-up line to get girls in bed with him. That should've been enough for me to call in sick that day. I've worked with male cover models like him before and they're all the same-smooth-talking, sexy as sin, egotistical know-it-alls who think they're God's gift to women-all traits I know to steer clear of. Assisting authors comes with many perks-reading on the job, using my organizing skills on a daily basis, drinking coffee by the gallons-but Maverick Kingston barges into my life and demands more than I can handle. When we're forced to road trip across the country together, he pushes every boundary I have and rearranges my thoughts on playing it safe. And when he "accidentally" drops his towel, he makes it very clear what he's offering and proves he's packing more than abs of steel under his clothes. Working with him was brutal, but falling for him was unexpected. And playing by the rules will be impossible. This is a complete STANDALONE novel - filled with plenty of humor, steam, & romance! 18 & up only due to explicit sexual content, language, and adult content.

**Anaphora Resolution and Text Retrieval** Helene Schmolz 2015-03-30 This book covers anaphora resolution for the English language from a linguistic and computational point of view. First, a definition of anaphors that applies to linguistics as well as information technology is given. On this foundation, all types of anaphors and their characteristics for English are outlined. To examine how frequent each type of anaphor is, a corpus of different hypertexts has been established and analysed with regard to anaphors. The most frequent type are non-finite clause anaphors - a type which has never been investigated so far. Therefore, the potential of non-finite clause anaphors are further explored with respect to anaphora resolution. After presenting the fundamentals of computational anaphora resolution and its application in text retrieval, rules for resolving non-finite clause anaphors are established. Therefore, this book shows that a truly interdisciplinary approach can achieve results which would not have been possible otherwise.

Promoting Change Through Action Research Franz Rauch 2014 "Bringing a different world into existence - Action Research as a trigger for innovations" was the overarching theme and vision of the international CARN Conference 2011 in Vienna. The chapters in this book are drawn mainly from conference contributions. The authors share practical knowledge which has arisen from their work, and reflect on development processes in schools, in teacher education and professional development, social work, social pedagogy, health care and community development. This book offers what some critics believe has been missing in recent action research literature, namely first person accounts of action researchers who endeavour to change working conditions and social relations in their environment through the conduct of action research. This book is also distinguished by assembling contributions from people who are linking action research to a broad diversity of differing contexts, and who are exploring topics or issues across various applications of action research
