Rural-Urban Migration and Agro-Technological Change in Post-Reform China Lena Kaufmann 2021-02-19 How do rural Chinese households deal with the conflicting pressures of migrating into cities to work as well as staying at home to preserve their fields? This is particularly challenging for rice farmers, because paddy fields have to be cultivated continuously to retain their soil quality and value. Drawing on ethnographic fieldwork and written sources, this book describes farming households' strategic solutions to this predicament. It shows how, in light of rural-urban migration and agro-technological change, they manage to sustain both migration and farming. It innovatively conceives rural households as part of a larger farming community of practice that spans both staying and migrating household members and their material world. Focusing on one exemplary resource - paddy fields - it argues that socio-technical resources are key factors in understanding migration flows and migrant-home relations. Overall, this book provides rare insights into the rural side of migration and farmers' knowledge and agency.

Solve for Happy Mo Gawdat 2017-03-21 In this “powerful personal story woven with a rich analysis of what we all seek” (Sergey Brin, cofounder of Google), Mo Gawdat, Chief Business Officer at Google’s [X], applies his superior logic and problem solving skills to understand how the brain processes joy and sadness—and then he solves for happy. In 2001 Mo Gawdat realized that despite his incredible success, he was desperately unhappy. A lifelong learner, he attacked the problem as an engineer would: examining all the provable facts and scrupulously applying logic. Eventually, his countless hours of research and science proved successful, and he discovered the equation for permanent happiness. Thirteen years later, Mo’s algorithm would be put to the ultimate test. After the sudden death of his son, Ali, Mo and his family turned to his equation—and it saved them from despair. In dealing with the horrible loss, Mo found his mission: he would pull off the type of “moonshot” goal that he and his colleagues were always aiming for—he would share his equation with the world and help as many people as possible become happier. In *Solve for Happy* Mo questions some of the most fundamental aspects of our existence, shares the underlying reasons for suffering, and plots out a step-by-step process for achieving lifelong happiness and enduring contentment. He shows us how to view life through a clear lens, teaching us how to dispel the illusions that cloud our thinking; overcome the brain’s blind spots; and embrace five ultimate truths. No matter what obstacles we face, what burdens we bear, what trials we’ve experienced, we can all be content with our present situation and optimistic about the future.

Think! Different Andreas Boskugel 2015-03-25 *Think! Different* is a different kind of self-help book: the author, Andreas Boskugel, is well-known in Europe and appreciated for his clear and direct manner. Boskugel has taken the law of attraction to its systematic and logical conclusion! This book is completely free of otherwise typical references to moral or religious "standards" because the law of attraction - like all natural laws - isn't based on morality or religion. Consequently the author has a very different take than do others on success; for example, he doesn't idolize hard work, honesty and gratitude ad absurdum, for these are only religious and cultural based opinions and actually contradict the law of attraction. The author also forgoes otherwise typical teachings about what is right or wrong; after all, what is "right" is individually defined. Feigned pity or morality sermons are also not included in this work. This work is for those who love the integrity of the law of attraction and prefer clarity over political correctness. And it's for those who really want to get somewhere in life and who therefore question existing opinions. It's for people who are able to think on their own instead of going with the

flow. For many, it was not until reading this book that they finally understood the law of attraction, for the topics in this book are more logically organized than in other popular works, and insights are offered that can dramatically improve the lives of readers. Completely new insights about the existing laws of life can help readers become invincible masters of their own destiny. Keywords: Law of Attraction, Self-Help, Success, Wealth, Dream, Wish Fulfillment, Love, Relationship, Money

A History of Saudi Arabia Madawi al-Rasheed 2002-07-11 Saudi Arabia is a wealthy and powerful country which wields influence in the West and across the Islamic world. Yet it remains a closed society. Its history in the twentieth century is dominated by the story of state formation. After the collapse of the Ottoman Empire, Ibn Sa'ud fought a long campaign to bring together a disparate people from across the Arabian peninsula. In 1932 the Kingdom of Saudi Arabia was born. Madawi al-Rasheed traces its extraordinary history from the age of emirates in the nineteenth century, through the 1990 Gulf War, to the present day. She fuses chronology with analysis, personal experience with oral histories, and draws on local and foreign documents to illuminate the social and cultural life of the Saudis. This is a rich and rewarding book which will be invaluable to students, and to all those trying to understand the enigma of Saudi Arabia.

The Parables of Jesus Luise Schottroff A premier New Testament scholar explores how Jesus' trial and execution are portrayed in the New Testament and how that portrayal has affected biblical studies, Christian theology, and Jewish-Christian relations through history. Tomson has written an accessible, responsible analysis of the biblical accounts of Jesus' death, demonstrating how, through compounded misunderstandings, they contributed to anti-Jewish sentiment in the early church and later history. Tomson's question of how Jesus is to be understood in his first-century Judean context is a critical one not only for biblical scholars, but for anyone concerned about human rights and interreligious dialogue today.

Shi'ism is as old as Islam. It began as an exclusively Arab political issue of succession to Muhammad, and was later embraced by the Iranians. At the core of Shi'i religious practice are rituals of mourning and atonement.--Publisher description.

Women of Mongolia Martha Avery 1996 For decades preceding 1990, Mongolia's economy was supported by the Soviet Union. For the past several years the country has been undergoing extreme change in economic structure as well as social organization. The 30 women in this book discuss the changes in specific, personal terms but, as a counterpoint, confirm a tenacious sense of tradition. Weather conditions are extreme in Mongolia: winter temperatures hover between 30 to 40 degrees below zero. The high plateau that Mongolia sits on has preserved a uniquely Mongolian lifestyle. The women of Mongolia celebrate that lifestyle in this book, as they face an uncertain future with strength and optimism. "Women of Mongolia is a vivid, colorful, and extremely informative description of the changes and continuities in the lives of Mongolian women...Ms. Avery allows the women to speak for themselves, providing the reader with fascinating insights and vignettes. She has interviewed a remarkable variety of women - from yak herders to anthropologists to street sweepers to ambassadors, all of whom have been influenced by the recent transformations in the Mongolian economy and society." -Morris Rossabi, Columbia University "Self-reliance has always been a necessary condition of life on the
