Who Killed Kitchener? David Laws 2019-03-20 In June 1916, Field Marshal Lord Kitchener set sail from Orkney on a secret mission to bolster the Russian war effort. Just a mile off land and in the teeth of a force 9 gale, HMS Hampshire suffered a huge explosion, sinking in little more than fifteen minutes. Crew and passengers numbered 749; only twelve survived. Kitchener's body was never

found. Remembered today as the face of the famous First World War recruitment drive, at the height of his career Kitchener was fêted as Britain's greatest military hero since Wellington. By 1916, however, his star was in its descent. A controversial figure who did not make friends easily in Cabinet, he was considered by many to be arrogant, secretive and high-handed. From the moment his death was announced, rumours of a conspiracy began to flourish, with the finger pointed variously at the Bolsheviks, Irish nationalist saboteurs and even the British government. Using newly released files kept secret for almost 100 years, former Cabinet minister David Laws unravels the true story behind the demise of this complex figure, debunking the conspiracy theories and revealing the crucial blunders that the government and military sought to cover up. The result is the definitive account of an event that shook the country and which has been shrouded in mystery ever since.

Sixty Years of Airfix Models Jeremy Brook 2015-06-30 The best-known and most important manufacturer of plastic model kits in the UK, Airfix has been at the forefront of the industry since 1955 when the first Airfix aircraft kit appeared in UK branches of Woolworth's. The kits were made to a constant scale and covered a wide variety of subjects, from aircraft to birds and from tanks to dinosaurs. In 1981 the famous London-based company closed down and only the kits survived intact. For the next twenty-five years Airfix was run by Palitoy and later Humbrol, but suffered from a lack of investment. In 2006, Hornby Hobbies Ltd, the train and Scalextric manufacturer, bought the ailing company and transformed it. Money and resources were ploughed into the range, and today Airfix releases around twenty new kits per year, designed to an incredibly high standard. The old kits of the 1950s and 1960s are gradually being replaced by new state-of-the-art tooling, all bearing that most prestigious name - Airfix. Published to coincide with the sixtieth anniversary of the first Airfix aircraft kit, Sixty Years of Airfix Models, tells the full story, year by year, of the company and its products. Illustrated throughout with colour photographs of kits, box art and completed models.

Fighting in the Sky John Fairley 2020-06-30 Barely a decade passed from the Wright Brothers' first powered flight to aircraft becoming lethal instruments of war. The Royal Flying Corps and Royal Naval Air Service took off in the very early days of The Great War and captured the public's imagination and admiration. Sydney and Richard Carline happened to be both pilots and artists as was Frenchman Henri Farre. Their works inspired celebrated painters like Sir John Lavery who took to the skies in an airship in the First World War. Feeding on the demand for works depicting this new dimension of warfighting, a new genre of art was born which has remained popular ever since. During the Second World War, the paintings of Paul Nash stood out as did Eric Ravilious who, ironically, died in an air crash. War artist Albert Richards dropped with British paratroopers on D-Day. Post-war, paintings by leading British and international artists graphically illustrate conflicts such as the Falklands, Bosnia and the Gulf War. John Fairley has brought together a dazzling collection of art works covering over 100 years of air warfare, enhanced by lively and informative text. The result is a book that is visually and historically satisfying.

was formed in 1939 and, since it produced its first plastic kit in 1949, grew to be the United Kingdom's leading model kit manufacturer. Several generations of young and young-at-heart modellers have made Airfix kits and, despite turbulent times in the 1970s and 1980s when the company changed ownership several times, in the twenty-first century it goes from strength to strength under the wing of Hornby Hobbies. The 1960s and early 1970s might be called the vintage years of Airfix, when some of their best and most popular kits were produced. For ten years up to 1974, renowned artist Roy Cross produced some of the stunning paintings that appear on the boxes of Airfix kits of the era. Roy set the standard for such artwork, to the extent that many are still used today, four decades later. Roy Cross's earlier book, *The Vintage Years of Airfix Box Art*, contained a host of the paintings he prepared for Airfix, but the unearthing of many more images in old Airfix files has enabled this entirely fresh look at Roy's work to be presented, coinciding with the seventy-fifth anniversary of the first Airfix kit. Thus the remainder of Roy's ten years' work for Airfix is reproduced here. This new compilation features many rare illustrations as well as studies and sketches that were not accepted at the time, and is beautifully illustrated with 180 colour artworks.
