techno-horror takes you on a startling and chilling odyssey into the origins of life and death in *Mortal Fear*. When an eminent biomolecular geneticist dies violently before his eyes, a doctor must use more than his medical knowledge to explain what he comes to believe is murder, and to stop a scientific breakthrough from becoming a curse instead of a miracle. There was a lot that internist Jason Howard didn't know about Dr. Alvin Hayes. But when the scientist met his sudden end, it all came out with a vengeance – for the academically respected geneticist had led a double life, and the private side was damning. Dismissing official police reports linking Hayes's death to his associations with the sordid side of society, Jason believes Hayes was silenced to keep him from revealing the results of his research, and the secret lies not in the back streets of Boston's erotic underworld, the Combat Zone, but in the high-tech genetics laboratories of the Good Health Plan clinic. Overcoming his own personal emotional problems, Jason turns his powers of diagnosis to deduction, vowing to solve the mystery no matter who tries to stop him . . . With this disturbing story, DNA research is shown to have a fearful potential, not only through possible mistakes and accidents, but ironically even through success. Splendidly researched and intricately plotted, *Mortal Fear* is Robin Cook at his prophetic and galvanizing best.

Contagion Robin Cook 1997 From the undisputed master of the medical thriller comes the story of a deadly epidemic spread not merely by microbes but by sinister sabotage—a terrifying cautionary tale for the millennium as the health care giants collide. After he loses first his Midwestern ophthalmology practice to a for-profit medical giant and then his family to a commuter airline tragedy, Dr. John Stapleton's life is transformed to ashes. Feeling less the golden boy than a jaded cynic, Stapleton retrains in forensic pathology and relocates to find an uneasy niche for himself in a city that suits his changed perspective: the cold, indifferent, concrete maze of New York. Stapleton thinks he is past pain and past caring, but as a series of virulent and extremely lethal illnesses—capped by a particularly deadly outbreak of a rare strain of influenza—strikes the young, the old, and the innocent, his suspicions are aroused. When the apparent epicentres of these outbreaks are revealed to be hospitals and clinics controlled by the same for-profit giant that cannibalized his old ophthalmology practice, Stapleton fears he has stumbled upon a diabolic conspiracy of catastrophic proportions: Could the for-profit giant be engaged in the systematic elimination of its more costly subscribers? Getting at the truth leads to Stapleton's unlikely pairing—both professionally and personally—with Terese Hagen, an art director at a hot Madison Avenue advertising firm. Together they discover that the real explanation behind the killer contagions is even more Machiavellian than could be imagined. *Contagion* anticipates some of the uncharted consequences of managed health care, in an age when even the wariest consumer may be at risk. It is Robin Cook at his unerring best.
