But the Russian military did not simply copy European armies. Adapting the tactics of its neighbours on both sides, Russia created a powerful strategy of its own, integrating steppe defence with European concerns. In *Russia's Wars of Emergence*, Carol Belkin Stevens examines the social and political factors underpinning Muscovite military history, the eventual success of the Russian Empire and the sacrifices made for power.

Golden Threads William Overbay 2021-03-30 The author begins his true story with the memory of family tragedy and the efforts to be self-sufficient on a small plot of land. He writes about the end of WWII, wanting to fly away to other places, personal cynics concerning clergy, and the petty schisms that split Christian churches into many denominations. He includes events and discussions with people in domestic and foreign places where he has served, worked, and lived about their religion and beliefs for which he observes common elements. His dreams of riding a big chestnut steed started when he was a young boy. The dreams recurred for over forty years. He uses the dreams to symbolically reflect the stages of his life where he strips himself of things that finally sets him free from his anger and doubts.

*Trade and Romance* Michael Murrin 2013-12-16 In *Trade and Romance*, Michael Murrin examines the complex relations between the expansion of trade in Asia and the production of heroic romance in Europe from the second half of the thirteenth century through the late seventeenth century. He shows how these tales of romance, ostensibly meant for the aristocracy, were important to the growing mercantile class as a way to gauge their own experiences in traveling to and trading in these exotic locales. Murrin also looks at the role that growing knowledge of geography played in the writing of the creative literature of the period, tracking how accurate, or inaccurate, these writers were in depicting far-flung destinations, from Iran and the Caspian Sea all the way to the Pacific. With reference to an impressive range of major works in several languages—including the works of Marco Polo, Geoffrey Chaucer, Matteo Maria Boiardo, Luís de Camões, Fernão Mendes Pinto, Edmund Spenser, John Milton, and more—Murrin tracks numerous accounts by traders and merchants through the literature, first on the Silk Road, beginning in the mid-thirteenth century; then on the water route to India, Japan, and China via the Cape of Good Hope; and, finally, the overland route through Siberia to Beijing. All of these routes, originally used to exchange commodities, quickly became paths to knowledge as well, enabling information to pass, if sometimes vaguely and intermittently, between Europe and the Far East. These new tales of distant shores fired the imagination of Europe and made their way, with surprising accuracy, as Murrin shows, into the poetry of the period.

**Tourism in the New Europe** Rhodri Thomas 2007-01-18 The book represents a state of the art review of key research on small firms in tourism in relation to European integration. It is, therefore, an essential resource for those engaged in research relating to tourism SMEs in transitional economies throughout the world. In addition, it is an essential purchase for the increasing number of students studying modules on small businesses as part of their final year undergraduate and postgraduate degree programmes. One of the key features of this book is its clear focus on breaking new ground by reporting recent research and theorising on small firms in tourism. In many cases, the analysis provided by contributors will carefully relate small business behaviour to issues of wider concern to tourism academics and policy-makers. It is also distinctive for its overt emphasis on contrasting European experiences. These characteristics contrast with the existing literature on small firms in tourism and hospitality, particularly in Europe. Previous literature achieved their aims by providing valuable syntheses of existing literature. Now that such 'taking of stock' has been undertaken, there is a demand for more overtly research-based texts that are nevertheless accessible to a wide audience. This book does exactly that.
