*The Art of BMW* Peter Gantriis 2013-04-15 Ever since Max Friz first mounted his innovative M2B32 opposed-twin engine in a motorcycle frame in 1923, the history of BMW motorcycles has been defined by a constant and relentless quest for perfection. In the 95 years that have followed, the company has created the most innovative and technologically advanced motorcycles produced anywhere on earth. BMW has earned a reputation for not doing things the way everyone else does, but its motorcycles aren't different simply for the sake of being different. Each distinctive feature represents a brilliant and elegant solution to a real problem, leading BMW to be the first company to introduce many of the features that were later adopted by other manufacturers. But there's more to a BMW motorcycle than innovation and technology—there's also art. And as beautiful as the bikes are in their totality, they may be even more so when broken down into their individual details. This book captures the elegance of these amazing machines, both in their details and in the sum of their parts, through the masterful photography of Henry von Wartenberg and writing of author Peter Gantriis. *The Art of BMW: Ninety Years of Motorcycling Excellence* features the Peter Nettesheim collection, one of the world's premier collections of BMW motorcycles. These wonderfully restored pieces exemplify the design and engineering prowess that have defined the BMW motorcycle tradition for almost a century. **Author bio:** Henry von Wartenberg was born in Mar del Plata, Argentina, in 1967 and has been a professional photographer since 1990. He worked as a photojournalist for *Gente* magazine for nine years before opening his own office near Buenos Aires in 1999. He has worked for many companies and publishers in Argentina and overseas, including *Geographic Adventure* magazine. With his publishing firm, Triple Ve Editores, he has also published several books of his photography: *Red Deer-Stag Hunting in Argentina*, *iMotos Clasicas en Argentina/i*, *iThe Best of Argentine Polo/i*, and *iBuenos Aires in Stone and Bronze/i*. Parrish Times tracks his amazing journey over the last four decades, through a rollercoaster ride of emotions in surely the most dangerous and exhilarating sporting arena there is. In the 1970s Steve was competing for the world motorcycle championship with legendary team mate Barry Sheene on a Suzuki. **The Hanoverian Dimension in British History, 1714–1837** Brendan Simms 2007-02-08 For more than 120 years (1714–1837) Great Britain was linked to the German Electorate, later Kingdom, of Hanover through Personal Union. This made Britain a continental European state in many respects, and diluted her sense of insular apartness. The geopolitical focus of Britain was now as much on Germany, on the Elbe and the Weser as it was on the Channel or overseas. At the same time, the Hanoverian connection was a major and highly controversial factor in British high politics and popular political debate. This volume was the first systematically to explore the subject by a team of experts drawn from the UK, US and Germany. They integrate the burgeoning specialist literature on aspects of the Personal Union into the broader history of eighteenth- and early nineteenth-century Britain. Never before had the impact of the Hanoverian connection on British politics, monarchy and the public sphere, been so thoroughly investigated.

Royal Enfield Greg Pullen 2021-04-26 Royal Enfield's famous motor - 'made like a gun' - hints at the factory's origins, but few appreciate that it is the oldest motorcycle manufacturer in existence that can boast of continuous production. In addition, its famous Bullet can claim the longest motorcycle production run of all time. Greg Pullen charts the rise, fall and rise again of Royal Enfield, from the company's pre-motorcycle beginnings in Redditch, through the impact of two World Wars, the importance of exports to India and subsequent establishment of factories there, to changes in ownership, recently launched models and new concept bikes for the future. With 190 colour photographs, this book includes: the V-twins, from the 1930s K and KX range to a glimpse of the concept V-twin shown in 2018; the singles, from 2-strokes to side-valve 4-strokes, and the ohv version that first used the Bullet name, through to the new singles built in India. The British Bullet: its arrival in 1948 and production in the UK, the original orders from India and subsequent setting up of production there are discussed. The 250s, (1958-68), including the Turbo Twins, and the big twins, from the 1948 500 Town to the final interceptor in 1970, including the 800cc prototype and the Clymer Indians are covered. The new twins: the 650cc Royal Enfield interceptor and Continental GT twins and the Bobber concept bike are discussed. Competition success is covered, with notable ISDT achievements, star rider Johnny Brittain and racing the big twins, and Geoff Duke in the GP5. Finally, the British factories and the new opportunities with the Indian factories are remembered.

*Moonfire* Norman Mailer 2015 And the moon came nearer: Journey back to July 20, 1969 It has been called the single most historic event of the 20th century: On July 20, 1969, after a decade of tests and training, supported by a staff of 400,000 engineers and scientists, and with a budget of billions, the most powerful rocket ever launched brought Neil Armstrong, Buzz Aldrin, and Michael Collins to the moon. Nobody captured the men, the mood, and the machinery like Norman Mailer, hired by LIFE magazine to cover the mission in a dazzling reportage he later enhanced into the brilliantly crafted book, *Of a Fire on the Moon*. Rediscover this epoch-making event with TASCHEN's adaptation of Mailer's account, now in our popular Reader's Edition so you can really curl up and travel not just back in time, but into outer space. The text is accompanied by hundreds of photographs from the NASA vaults, the archives of LIFE, and other leading magazines of the day, documenting the development of the agency and the mission, life inside the command module and on the moon's surface, as well as the world's jubilant reaction to the landing. Captions by leading Apollo 11 experts explain the history and science behind the images, citing the mission log, publications of the day, and postflight astronaut interviews, while an evocative introduction by Colum McCann celebrates Mailer's incomparable skill at transforming “the science of space...the weight of history...the breadth of mythology” into prose.

**Alfa Romeo From 1910 to 2010** Maurizio Tabucchi 2010-07-15 Exactly 100 years ago in 1910 at Portello on the outskirts of Milan, a new company was established in the still young world of motoring of the period: Alfa Romeo. A name which, in those 100 years, has become synonymous with cars, so important has its presence been both on the industrial and sports fronts as well as culturally. In this long period of time, the celebrated Italian marque brought to life cars that have entered by right into the history of the automobile and not only that of Italy, like the 1900, the Giulietta and the Giulia. Yet at the same time the company was able to write its own unrepeatable pages in the annuals of motor sport, winning all the most important races: from the Mille Miglia to Le Mans, from the Tourist Trophy to the World Sports Car Championship. An epic about which just almost everything has been written; but this volume by a great authority on the subject in Maurizio Tabucchi aims to be a tribute to this tremendous story, told above all by pictures, many of them previously unpublished, and supported by brief but exhaustive texts.
