Mindset Carol S. Dweck 2007-12-26 From the renowned psychologist who introduced the world to “growth mindset” comes this updated edition of the million-copy bestseller—featuring transformative insights into redefining success, building lifelong resilience, and supercharging self-improvement. “Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life.”—Bill Gates, GatesNotes “It’s not always the people who start out the smartest who end up the smartest.” After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. *Mindset* reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.

Dreaming of Light Jayne Bauling 2012 Regile is a zama-zama working illegally in an abandoned mine near Barberton. He has moved up the ranks and is now paid a salary to keep the other child workers in line. Towards the end of a three-month stint underground, a fourteen-year-old boy from Mozambique, Taiba, starts asking questions about their rescue. Taiba constantly reaffirms his belief that they will be saved: by the police, by the private security firms that guard the mines, or maybe even by the mythical Spike Maphosa. Regile knows that such hope is dangerous.

THE EARLY GRADE READING ASSESSMENT Amber K. Gove 2011-09-28 The Early Grade Reading Assessment (EGRA) measures students' progress towards reading. EGRA gauges early literacy skills through a 15-minute individual oral assessment of five fundamental reading skills. RTI worked with education experts to develop the EGRA in 2006, and it has been piloted and implemented in more than 40 countries. This volume aims to take stock of the substantial amount of information and experience generated through the use of EGRA, and to share this knowledge with practitioners, policymakers, and international donors. Chapters cover not only particular applications of the instrument but also put EGRA in the context of broader issues and developments in literacy and education.

Speaking from the Heart Josh wa Maoto 2020-05-05 By presenting an autobiographical narration of his life, author Josh wa Maoto seeks to reveal how God has demonstrated His love and mercy for him. His childhood life might have seemed to be smooth sailing on the surface, but the reality was tougher than it appeared. His road was full of bumps, and he owes it all to God. In fact, Maoto believes God designed his life that way intentionally in order to show His true nature of providence to the world. Although the names of people, places, and businesses have been changed, *Speaking from the Heart* shares the true story of Maoto's life experiences. His aim is to inspire hope in the many hopeless young men and women who have been neglected by their parents. His goal is to help these young people continue to dream big and work beyond minimum expectations. As long as we trust in the general goodness of humanity as an extension of Jehovah's true nature of providence, victory is certain for the faithful. This personal narrative and testimony uses the lens of faith to recall one man's life history growing up and coming of age in South Africa in the midst of apartheid.

Internationalisation and Globalisation in Mathematics and Science Education Bill Atweh 2008-07-14 This book aims to develop theoretical frameworks of the phenomena of internationalisation and globalisation and identify related ethical, moral, political and economic issues facing mathematics and science educators. It provides a wide representation of views some of which are not often represented in international publications. This is the first book to deal with issues of globalisation and internationalisation in mathematics and science education.

My Children! My Africa! Athol Fugard 1990 "Generational conflict over the most effective means for ending apartheid in South Africa lead to an explosive confrontation between a gifted but impatient black township youth and his devoted but "old fashioned" black teacher ... The unexpected involvement of a

young white woman who befriends and learns from both men strips away the political trappings to reveal the human trauma at the heart of South Africa's ... tragedy."--Publisher description.

An African Elegy Ben Okri 2015-04-30 Dreams are the currency of Okri's writing, particularly in this first book of poems, *An African Elegy*, but also in his books of short stories and prize-winning novel *The Famished Road*. Okri's dreams are made on the stuff of Africa's colossal economic and political problems, and reading the poems is to experience a constant succession of metaphors of resolution in both senses of the word. Virtually every poem contains an exhortation to climb out of the African miasma, and virtually every poem harvests the dream of itself with an upbeat restorative ending' - Giles Foden, *Times Literary Supplement*

Marking Matric Vijay Reddy 2006 The past ten years in South Africa has seen many changes in education - the creation of a single department of education; common examinations for all learners in public schools in the country, a new outcomes based education curriculum which was introduced to learners in the general education and training phase since 1998 and will be introduced to the further education and training phase from 2006. To evaluate the success of these changes South African researchers still use the indicator of student achievement. The matriculation examination is the visible, high profile and public performance indicator. Every year parents, learners, teachers, researchers, government officials, policymakers, and the general public get involved in the debate around the matric examination with the most frequently asked questions being - Did the pass rate go up? Are standards dropping? Are the results real or have they been manipulated? How is our education system doing? Are we meeting the development goals? What should the matriculation examination of the future look like? participants from government (national and provincial),

Class, Race, and Inequality in South Africa Jeremy Seekings 2008-10-01 The distribution of incomes in South Africa in 2004, ten years after the transition to democracy, was probably more unequal than it had been under apartheid. In this book, Jeremy Seekings and Nicoli Nattrass explain why this is so, offering a detailed and comprehensive analysis of inequality in South Africa from the midtwentieth century to the early twenty-first century. They show that the basis of inequality shifted in the last decades of the twentieth century from race to class. Formal deracialization of public policy did not reduce the actual disadvantages experienced by the poor nor the advantages of the rich. The fundamental continuity in patterns of advantage and disadvantage resulted from underlying continuities in public policy, or what Seekings and Nattrass call the "distributional regime." The post-apartheid distributional regime continues to divide South Africans into insiders and outsiders. The insiders, now increasingly multiracial, enjoy good access to well-paid, skilled jobs; the outsiders lack skills and employment.

The Digital Challenge: Information Technology in the Development Context Shirin Madon
2018-02-06 This title was first published in 2003. Information and communication technologies (ICTs) are increasingly being recognized as vital to the economic growth and global inclusion and participation of developing countries. This book brings together both academics and practitioners to provide a comprehensive and insightful overview of ICT and development around the world. It examines the role of IT in providing new economic and industrial opportunities, in increasing access to global information and communication, in assisting small cultural and ethnic groups to overcome disadvantages of physical distance and in catalysing initiatives towards democratic decentralization and empowerment of citizens. It also critically appraises major problems such as inappropriate focus and resource allocation, and of missed opportunities. By combining comparative case studies from Africa, South and East Asia, South America and Eastern Europe with theoretical analysis, this volume synthesizes a range of issues related to the evident tensions that exist for developing countries as they try to balance global and local priorities through the adoption and use of ICTs.
