**Communication and Negotiation** Linda L. Putnam 1992-04-10 Consolidating alternative perspectives on communication and negotiation, this volume reviews the work of noted communication scholars and suggests directions for future research. Contributors explore three major aspects of negotiation communication: strategies, tactics and negotiation processes; interpretive processes and language analysis; and negotiation situation and context. This research also explores bargaining planning, framing and reframing, as well as relational communication with opponents, constituents and audiences.

**Finite Fields: Theory and Computation** Igor Shparlinski 1999-05-31 This book is mainly devoted to some computational and algorithmic problems in finite fields such as, for example, polynomial factorization, finding irreducible and primitive polynomials, the distribution of these primitive polynomials and of primitive points on elliptic curves, constructing bases of various types and new applications of finite fields to other areas of mathematics. For completeness we include two special chapters on some recent advances and applications of the theory of congruences (optimal coefficients, congruential pseudo-random number generators, modular arithmetic, etc.) and computational number theory (primality testing, factoring integers, computation in algebraic number theory, etc.). The problems considered here have many applications in Computer Science, Coding Theory, Cryptography, Numerical Methods, and so on. There are a few books devoted to more general questions, but the results contained in this book have not till now been collected under one cover. In the present work the author has attempted to point out new links among different areas of the theory of finite fields. It contains many very important results which previously could be found only in widely scattered and hardly available conference proceedings and journals. In particular, we extensively review results which originally appeared only in Russian, and are not well known to mathematicians outside the former USSR.

[Talk and Interaction in Social Research Methods](#) Paul Drew 2006-05-11 'This book admirably fulfils its stated objective of describing social research methods in action and exploring, from a range of perspectives, the linguistic shaping of social context. Overall, this is a balanced, well-edited and coherent collection of papers, bringing together high quality work from recognized authorities in the analysis of talk-in-interaction. It is also highly accessible; it would certainly make an excellent resource book for undergraduate, graduate (and practising!) social scientists' - Rebecca Clift, University of Essex 'Talk and Interaction in Social Research Methodologies is a much-needed methods text. Focusing on research methods in action, the volume offers a new way of viewing the realities of social research. By taking language use seriously, the text reveals the details and depths of a wide range of research projects as they have seldom been presented before. This is the first book of its kind to offer such a powerful and insightful depiction of the role of talk-in-interaction in relation to social research methods. The book's plan is creative and unparalleled. There's nothing else like it. The editors—Paul Drew, Geoffrey Raymond and Darin Weinberg—represent the very best from multiple

traditions of researching talk-in-interaction—from both sides of the Atlantic. The chapters are written by a sterling collection of researchers—a virtual honor roll of conversation analysts and kindred spirits. This book is a "must read" for social researchers of all disciplines who are interested in social interaction. It should be assigned reading for all graduate students being introduced to qualitative methods. It should be on every qualitative researcher's book shelf. It is a tour de force in demonstrating the absolutely fundamental position that language use holds in social science methodology' - James A Holstein, Marquette University This is a methodology text with a difference. It demonstrates the importance of talk in a variety of social research methodologies. Even documents, the seemingly least interactional form of social data, are shown to have important interactional dimensions. The book focuses systematically on how sociological methods are essentially conducted through forms of spoken interaction, and how these interactions shape the results that emerge in research. The book demonstrates: " How spoken interactions shape the outcomes of core research methodologies " The role which talk-in-interaction plays in key substantive areas of sociology notably race, crime, gender and media " Reveals the interactional underpinnings of research methodologies This is the first text aimed at an undergraduate and Master's audience in Sociology and Social Research, which shows the crucial part that spoken interaction plays in the conduct and products of conventional sociological methodologies.

Understanding Media Cultures Nick Stevenson 2002-03-05 Praise for the First Edition: 'I can't think of a book in media studies that handles so well the diversity of perspectives and issues that Stevenson addresses. Whether reconstructing Marxism or deconstructing postmodernism, tackling the pleasures of soap opera or the repetitive structures of daily news presentation, Stevenson is always clear and insightful' - Sociology The Second Edition of this book provides a comprehensive overview of the ways in which social theory has attempted to theorize the importance of the media in contemporary society. Now fully revised to take account of the recent theoretical developments associated with 'new media' and 'information society', as

*Communication as ...* Gregory J. Shepherd 2006 In *Communication as...: Perspectives on Theory*, editors Gregory J. Shepherd, Jeffrey St. John, and Ted Striphas bring together a collection of 27 essays that explores the wide range of theorizing about communication, cutting across all lines of traditional division in the field. The essays in this text are written by leading scholars in the field of communication theory, with each scholar employing a particular stance or perspective on what communication theory is and how it functions. In essays that are brief, argumentative, and forceful, the scholars propose their perspective as a primary or essential way of viewing communication with decided benefits over other views.

**The Essential Guide to Using the Web for Research** Nigel Ford 2011-10-14 This book will be vital reading for anyone doing research, since using the web to find high quality information is a key research skill. It introduces beginners and experts alike to the most effective techniques for searching the web, assessing and organising information and using it in a range of scenarios from undergraduate essays and projects to PhD research. Nigel Ford shows how using the web poses opportunities and challenges that impact on student research at every level, and he explains the skills needed to navigate the web and use it effectively to produce high quality work. Ford connects online skills to the research process. He helps readers to understand research questions and how to answer them by constructing arguments and presenting evidence in ways that will enhance their impact and credibility. The book includes clear and helpful coverage of beginner and advanced search tools and techniques, as well as the processes of: critically evaluating online information creating and presenting evidence-based arguments organizing, storing and sharing information referencing, copyright and plagiarism. As well as providing all the basic techniques students need to find high quality information on the web, this book will help readers use this information effectively in their own research. Nigel Ford is Professor in the University of Sheffield's Information School.

**Doing Research** Daniel Druckman 2005-03-16 An award-winning book, *Doing Research* is a must read. Designed for students across a variety of social science disciplines, it is the first research methods text devoted to conflict analysis and resolution. It begins with a discussion of the philosophical foundations for doing research, providing guidelines on how to develop research questions and how these questions can be addressed with various methodologies. The book presents a wide-ranging treatment of both quantitative and qualitative approaches to the design and analysis of problems of conflict.

presenting and analyzing quantitative as well as qualitative data are all tough-going without a great deal of guidance and encouragement. *Writing a Research Paper in Political Science* breaks down the research paper into its constituent parts and shows students what they need to do at each stage to successfully complete each component until the paper is finished. Practical summaries, recipes for success, worksheets, exercises, and a series of handy checklists make this a must-have supplement for any writing-intensive political science course. New to the Fourth Edition: A non-causal research paper woven throughout the text offers explicit advice to guide students through the research and writing process. Updated and more detailed discussions of plagiarism, paraphrases, "drop-ins," and "transcripts" help to prevent students from misusing sources in a constantly changing digital age. A more detailed discussion of "fake news" and disinformation shows students how to evaluate and choose high quality sources, as well as how to protect oneself from being fooled by bad sources. Additional guidance for writing abstracts and creating presentations helps students to understand the logic behind abstracts and prepares students for presentations in the classroom, at a conference, and beyond. A greater emphasis on the value of qualitative research provides students with additional instruction on how to do it.

Commercial Issues in Private International Law Michael Douglas 2019-06-13 As people, business, and information cross borders, so too do legal disputes. Globalisation means that courts need to apply principles of private international law with increasing frequency. Thus, as the Law Society of New South Wales recognised in its 2017 report *The Future of Law and Innovation in the Profession*, knowledge of private international law is increasingly important to legal practice. In particular, it is essential to the modern practice of commercial law. This book considers key issues at the intersection of commercial law and private international law. The authors include judges, academics and practising lawyers, from Australia, New Zealand, Singapore and the United Kingdom. They bring a common law perspective to contemporary problems concerning the key issues in private international law: jurisdiction, choice of law, and recognition and enforcement of foreign judgments. The book also addresses issues of evidence and procedure in cross-border litigation, and the impact of recent developments at the Hague Conference on Private International Law, including the Convention on Choice of Court Agreements on common law principles of private international law.
