Public Health Communication Interventions Nurit Guttman 2000-04-15 The ethical dimensions of health communicators' interventions and campaigns are brought into question in this thought-provoking book. Examining the efforts to effect behavior change, the author questions how far health communication can and should go in changing people's values. The author broadens the current analysis of interventions and presents conceptual frameworks that help identify values and justifications that are embedded in health communication goals, strategies, and evaluation criteria. This critical approach helps explain how and why choices are made in design and implementation, and provides constructs and frameworks to examine them. It also widens the criteria for program evaluation and policymaking, and provides practitioners, planners, policy-makers, researchers, and students with practice-oriented questions.

Advanced Practice Nursing in the Community Carl O. Helvie 1998 In this new text-reference, Dr. Carl Helvie explores the realm of community health care for advanced practice nurses currently working in community care or requiring an awareness and understanding of its salient issues. Simple in its presentation but rigorous in its coverage of related theories and concepts, *Advanced Practice Nursing in the Community* reviews community health nursing and advanced practice and then presents the Helvie Energy Theory as a guiding framework for the remainder of the volume. This comprehensive volume comprises thoughtful discussions of the economic, environmental, and sociocultural influences on community health, providing a foundation for subsequent chapters on community assessment, analysis, and diagnosis. It examines community intervention, addressing such topics as multilevel community intervention; diffusion and maintenance of community change; mass media and the political process; coalition building among professional and lay organizations as well as nursing centers and the schools; and rural health care. In addition to numerous assessments and other tools found throughout the book, case studies follow nearly every chapter to illuminate the content. Clinicians early in their community advanced practice will find the extensive assessment example of an actual community in the Rudyville Community Analysis especially interesting. *Advanced Practice Nursing in the Community* is a remarkably comprehensive and thought-provoking work. It is a must for both the community health specialist and advanced practice nurse seeking a reference for public and community health care.
