Mining and Social Transformation in Africa Deborah Fahy Bryceson 2013-10-15 After more than three decades of economic malaise, many African countries are experiencing an upsurge in their economic fortunes linked to the booming international market for minerals. Spurred by the shrinking viability of peasant agriculture, rural dwellers have been engaged in a massive search for alternative livelihoods, one of the most lucrative being artisanal mining. While an expanding literature has documented the economic expansion of artisanal mining, this book is the first to probe its societal impact, demonstrating that artisanal mining has the potential to be far more democratic and emancipating than preceding modes. Delineating the paradoxes of artisanal miners working alongside the expansion of large-scale mining investment in Africa, Mining and Social Transformation in Africa concentrates on the

Tanzanian experience. Written by authors with fresh research insights, focus is placed on how artisanal mining is configured in relation to local, regional and national mining investments and social class differentiation. The work lives and associated lifestyles of miners and residents of mining settlements are brought to the fore, asking where this historical interlude is taking them and their communities in the future. The question of value transfers out of the artisanal mining sector, value capture by elites and changing configurations of gender, age and class differentiation, all arise.

Restoring the Soil Dawn Berkelaar 2019 During the last 35 years, green manure/cover crops (gm/ccs) have become recognized widely as an important agricultural technology for the developing world. Millions of farmers use traditional gm/cc systems, and millions more now use systems developed and introduced during the last three decades. Faced with so many promising possibilities, even well-informed agronomists find it difficult to choose the best gm/cc system for a given situation. This happens in part because, unfortunately, some 20 different factors must be considered in selecting the gm/cc systems that will have the greatest potential in any given situation. These factors include everything from local food habits, current market conditions, the dominant cropping systems and the major weeds, to local economic needs, environmental conditions and farmer preferences. Furthermore, the best gm/cc systems almost always include not just one, but several species of gm/cc.

Each day gives you one page to Ask your Question of the day, Record the Card Drawn, chart the Keywords and emotions the card brings forth. You have a place to interpret the card at the beginning of the day - how you think your interpretation of the card will help you during the day, the activities and happenings of the day as seen through the light of your card, and whether your interpretation was correct or needed to be adjusted. Finally, there is a place for your thoughtst at the end of the day and how you can use the day's results to make tomorrow a better day. At the end of the year (book is undated so you can start on any day) you will have a convenient place for reviewing your entire year and making a plan for the next one.

Cervical, Breast and Prostate Cancer (Classical Cover) Iconcept Press 2014-08-30 Cervical cancer and breast cancer are two of the most common cancers found in women. Cervical cancer is when cancer arises from the cervix. Early on there are typically no symptoms. Later symptoms may include abnormal vaginal bleeding, pelvic pain or pain during sex. Breast cancer is when cancer develops from breast tissue. Signs of breast cancer may include a lump in the breast, a change in breast shape, dimpling of the skin, fluid coming from the nipple, or a red scaly patch of skin. Prostate cancer is when cancer develops in the prostate, a gland in the male reproductive system. It may initially cause no symptoms. In later stages it can cause difficulty urinating, blood in the urine, or pain in the pelvis, back or when urinating. This book provides some

latest research and findings on breast cancer, cervical cancer and prostate cancer. The aim of this book is to serve as an important reference book for individuals working in biomedical laboratories, and for clinical professionals. There are totally 13 chapters in this book. Chapter 1 proposes an outlook on different endoscopic surgical procedures to treat cervical cancer, using traditional laparoscopy and robotics. Chapter 2 reviews the clinical results of carbon ion radiotherapy (C-ion RT) for uterine cervical cancer. Carbon-ion RT has been established as a safe short-term treatment for locally advanced uterine cervical cancer. Chapter 3 summarises chrysin inhibits proliferation, induces apoptosis and reduce angiogenesis in most tested cancer cells, including cervical cancer cells. Chapter 4 shows that involving physicians in the promotion of public health programs and initiatives is a viable option. Chapter 5 summarizes the published findings about the controversial role of METCAM, a cell adhesion molecule, in the progression of human breast cancer. Chapter 6 focuses on the biology of "neu" in breast cancer - the potential mechanisms that may contribute to tumor resistance and the numerous uncertainties that persist despite the bona-fide progress made in treating this particular subtype of breast cancer. Chapter 7 describes the mechanisms by which estrogen can exert its role in estrogenresponsive cells, focusing on specific aspects of estrogen receptor signaling. Moreover, this chapter shows how some of the proteins involved in estrogen receptor signaling can be used as predictive markers in breast cancer and describes a proposed clinical study related to the combined use of two drugs (bortezomib and tamoxifen) as therapeutic agents for estrogen receptor negative breast cancers. Chapter 8 summarizes the recent studies indicating that AngII facilitates breast cancer metastasis by contributing to the cross-talk between cancer cells and the host stroma. Chapter 9 focuses on a rationale pharmaceutical development along with a detailed understanding of biological effects so as to accelerate the incorporation of nanocarriers in breast cancer therapy. Chapter 10 summarizes the mTOR pathway and the clinical results in breast cancer treatment, relating them to results obtained using cultured MCF-7 breast cancer tamoxifen resistant sublines. Chapter 11 discusses how to develop a standard extraction method, yielding tomato products which are suitable for cell cultures, and enable product comparison of different tomato varieties. Chapter 12 describes principles and processes that are involved in investigating biological or clinical problems with nuclear magnetic resonance (NMR) based metabolomics - an approach that involves the global analysis of metabolites. The authors use prostate cancer as a case study to outline the processes, applications and potential of metabolomics for inform scientists and clinicians. Chapter 13 discusses the epidemiology, screening, diagnosis and treatment options of prostate cancer and its association with osteoporosis.

Quality Declared Seeds Fao 1997 Quality Declared Seed system would make use of resources already available in seed production organization in those countries where human and physical resources for quality control were otherwise limited. The book is designed to provide quality control during seed production which would be less demanding on government resources than seed certification, but that it could be sufficiently adequate to provide good quality seed both within

countries and in international trade. However, the Quality Declared Seed system places greater reliance on the conscientiousness of seed producing farmers and seed traders. The book has not been designed as replacement for a fully developed seed certification scheme but rather to make the best use of limited technical resources. The system is designed to develop technical expertise within the seed industry so that seed production and distribution become more efficient and with the responsibility placed on producers and traders a climate will be created in which the conscientious traders a climate will be created in which the conscientious trader can prosper. Questions of Life Nicky Gumbel 2018-08-21 From "Why am I here?" to "What's next?" in this international bestseller, Alpha pioneer Nicky Gumbel addresses some of the foundational questions that challenge us all. Questions of Life is a step-by-step guide to the basics of the Christian faith by one of the world's most respected Christian leaders. This book contains the talks that are given on Alpha, and in it Nicky explores key themes, questions, and objections to faith, leading us on an engaging, personal journey of discovery. Alpha creates an environment of hospitality where people can bring their friends, family, and work colleagues to explore the Christian faith, ask questions, and share their point of view. Alpha makes it easy to invite friends to have spiritual conversations which explore life's biggest questions in a safe and respectful way. Alpha's approach to hospitality, faith, and discussion is designed to welcome everyone, especially those who might not describe themselves as Christians or church-goers. Each session includes time for a large group meal,

short teaching, and small group discussion.
