Building Innovation Neil Briem Gislason 2011-01-01 In *Building Innovation*, Neil Gislason explores how school buildings inform teaching and learning. He also examines how non-architectural factors, like school organization, interact with physical design to shape the learning environment. Drawing on case study and historical research, the author lays a foundation for school planning and design that will be of use to educators and architects alike. Readers interested in non-traditional school design, teaching methods, and curriculum will appreciate Gislason's focus on school architecture as a vehicle for progressive education.

Why Photography Matters as Art as Never Before Michael Fried 2008 From the late 1970s onward, serious art photography began to be made at large scale and for the wall. Michael Fried argues that this immediately compelled photographers to grapple with issues centering on the relationship between the photograph and the viewer standing before it that until then had been the province only of painting. Fried further demonstrates that certain

philosophically deep problems—associated with notions of theatricality, literalness, and objecthood, and touching on the role of original intention in artistic production, first discussed in his controversial essay “Art and Objecthood” (1967)—have come to the fore once again in recent photography. This means that the photographic “ghetto” no longer exists; instead photography is at the cutting edge of contemporary art as never before. Among the photographers and video-makers whose work receives serious attention in this powerfully argued book are Jeff Wall, Hiroshi Sugimoto, Cindy Sherman, Thomas Struth, Thomas Ruff, Andreas Gursky, Luc Delahaye, Rineke Dijkstra, Patrick Faigenbaum, Roland Fischer, Thomas Demand, Candida Höfer, Beat Streuli, Philip-Lorca diCorcia, Douglas Gordon and Philippe Parreno, James Welling, and Bernd and Hilla Becher. Future discussions of the new art photography will have no choice but to take a stand for or against Fried’s conclusions.

Analyzing Grammar Paul R. Kroeger 2005-05-05 Analyzing Grammar is a clear introductory textbook on grammatical analysis, designed for students beginning to study the discipline. Covering both syntax (the structure of phrases and sentences) and morphology (the structure of words), it equips them with the tools and methods needed to analyze grammatical patterns in any language. Students are shown how to use standard notational devices such as phrase structure trees and word-formation rules, as well as prose descriptions. Emphasis is placed on comparing the different grammatical systems of the world's languages, and students are encouraged to practice the analyses through a diverse range of problem sets and exercises. Topics covered include word order, constituency, case, agreement, tense, gender, pronoun systems, inflection, derivation, argument structure and grammatical relations, and a useful glossary provides a clear explanation of each term. Accessibly written and comprehensive, Analyzing Grammar is set to become a key text for all courses in grammatical analysis.

Architectural Encounters Rabah Saoud 2017-05-10 So many books have been written and so much ink has been spilled on the Muslim and western enmity. There existed many instances of coexistence and cooperation, shared human values, trade exchanges, and mutual cultural penetration. These were either deliberately concealed or mistakenly ignored. The present book gives a ground-breaking account of such co-existence. It provides unique perspectives on Muslim-European cultural encounters, and architectural and artistic exchanges. The work is dedicated to the contribution of Muslim architecture to many aspects of European architecture, particularly during the medieval period. Based on the historical research and image evidence, the analysis focuses on Muslim influence, tracing the origins of Muslim motifs -employed in the West (Europe)-, the routes by which such motifs were transferred, and provide where possible the evidence. The book should provide a new insight to historians, architects, academics, politicians and the general public in both the West and lands of Islam to understand and appreciate each other to achieve a well-deserved reconciliation and live in a lasting peace.

A Thousand Years of Nonlinear History Manuel De Landa 1997 More than a simple expository history, *A Thousand Years of Nonlinear History* sketches the outlines of a renewed materialist philosophy of history in the tradition of Fernand Braudel, Gilles Deleuze, and Félix Guattari, while also engaging the critical new understanding of material processes derived from the sciences of dynamics. Following in the wake of his groundbreaking *War in the Age of Intelligent Machines*, Manuel De Landa presents a radical synthesis of historical development over the last one thousand years. More than a simple expository history, *A Thousand Years of Nonlinear History* sketches the outlines of a renewed materialist philosophy of history in the tradition of Fernand Braudel, Gilles Deleuze, and Félix Guattari, while also engaging the critical new understanding of material processes derived from the sciences of dynamics. Working against prevailing attitudes that see history as an arena of texts, discourses, ideologies, and metaphors, De Landa traces the concrete movements and interplays of matter and energy through human populations in the last millennium. De Landa attacks three domains that have given shape to human societies: economics, biology, and linguistics. In every case, what one sees is the self-directed processes of matter and energy interacting with the whim and will of human history itself to form a panoramic vision of the West free of rigid teleology and naive notions of progress, and even more important, free of any deterministic source of its urban, institutional, and technological forms. Rather, the source of all concrete forms in the West's history are shown to derive from internal morphogenetic capabilities that lie within the flow of matter-energy itself.

The Irony of Vietnam Leslie H. Gelb 2016-05-31 "If a historian were allowed but one book on the American involvement in Vietnam, this would be it." — *Foreign Affairs* When first published in 1979, four years after the end of one of the most divisive conflicts in the United States, *The Irony of Vietnam* raised eyebrows. Most students of the war argued that the United States had "stumbled into a quagmire in Vietnam through hubris and miscalculation," as the *New York Times's* Fox Butterfield put it. But the perspective of time and the opening of documentary sources, including the Pentagon Papers, had allowed Gelb and Betts to probe deep into the decisionmaking leading to escalation of military action in Vietnam. The failure of Vietnam could be laid at the door of American foreign policy, they said, but the decisions that led to the failure were made by presidents aware of the risks, clear about their aims, knowledgeable about the weaknesses of their allies, and under no illusion about the outcome. The book offers a picture of a steely resolve in government circles that, while useful in creating consensus, did not allow for alternative perspectives. In the years since its publication, *The Irony of Vietnam* has come to be considered the seminal work on the Vietnam War.

Language and Culture on the Margins Sjaak Kroon 2018-09-17 This collection of thirteen essays examines sociolinguistic phenomena in a wide variety of marginal environments, providing both an overview of globalization on the margins and a foundation for an expanded understanding of the processes of linguistic and cultural changes at work in these settings. Taking an expansive conceptual view of margins, the volume is organized in three parts, looking at examples of marginal spaces in the nation-state, in online environments, and in the peripheries of urban locations, globally to call attention to new and changing discursive genres, patterns, practices, and identities emerging in these spaces as a result of contemporary mobilities, the evolving global economy, and socio-political changes. With previous research previously confined to the study of globalization in urban areas, this volume opens the door for further research on the complex sociolinguistic processes resulting from globalization on the margins, making this an ideal resource for students and scholars in sociolinguistics, globalization and heritage studies, new media, anthropology, and cultural studies.

All I Ever Wanted Kathy Valentine 2020-04-09 At twenty-one, Kathy Valentine was at the Whisky in Los Angeles when she met a guitarist from a fledgling band called the Go-Go's—and the band needed a bassist. The Go-Go's became the first multi-platinum-selling, all-female band to play instruments themselves, write their own songs, and have a number one album. Their debut, *Beauty and the Beat*, spent six weeks at the top of the Billboard 200 and featured the hit songs “We Got the Beat” and “Our Lips Are Sealed.” The record's success brought the pressures of a relentless workload and schedule culminating in a wild, hazy, substance-fueled tour that took the band from the club circuit to arenas, where fans, promoters, and crew were more than ready to keep the party going. For Valentine, the band's success was the fulfillment of a lifelong dream—but it's only part of her story. *All I Ever Wanted* traces the path that took her from her childhood in Texas—where she all but raised herself—to the height of rock 'n' roll stardom, devastation after the collapse of the band that had come to define her, and the quest to regain her sense of self after its end. Valentine also speaks candidly about the lasting effects of parental betrayal, abortion, rape, and her struggles with drugs and alcohol—and the music that saved her every step of the way. Populated with vivid portraits of Valentine's interactions during the 1980s with musicians and actors from the Police and Rod Stewart to John Belushi and Rob Lowe, *All I Ever Wanted* is a deeply personal reflection on a life spent in music.
