The Money Game in Old New York Clifford Browder 2014-07-15 "I got to be a millionaire afore I know'd it hardly," remarked the Wall Street financier Daniel Drew (1797-1879). An uneducated farm boy from Putnam County, New York, he became in turn a successful cattle drover, a circus clown, tavern keeper, a shrewd Hudson River steamboat operator, and an unscrupulous speculator. As the colorful "Uncle Daniel" of Wall Street-his whiskered face seamed with wrinkles and twinkling with steel-gray eyes -- time and again he disrupted the financial markets with manipulations whereby he either won or lost millions of dollars. Having "got religion" upon hearing a scary hell-fire sermon at the age of fourteen, Drew was also a fervent Methodist. Rumors of his financial operations--epic struggles that pitted him against Cornelius Vanderbilt, Jay Gould, and Jim Fisk, and that subjected him to threats of arrest and even kidnapping, and on one occasion to a most undignified flight from the state-baffled and disturbed the Methodists, who admittedly had little grasp of Wall Street but knew firsthand Brother Drew's tearful repentance at prayer meetings and his generosity in founding churches and seminaries. With its dual commitment to religion and rascality, Drew's career is a rich study in contradictions, an exciting chronicle of high drama and low comedy capped by bankruptcy. To understand Drew in his complexity, the author argues, is to get a grip on the heady and exploitative age that produced him -- the yesterday of "smartness" and "go ahead" that helped engender the America of today. Based on primary sources, this is the first full-fledged biography of Drew, who hitherto has been known chiefly through a fictionalized and fraudulent account of 1910.

Narcotics Anonymous Wso 2008 Narcotics Anonymous (NA) describes itself as a "nonprofit fellowship or society of men and women for whom drugs had become a major problem". Narcotics Anonymous uses a

traditional 12 step model that has been expanded and developed for people with varied substance abuse issues. This work is the so-called "Basic Text" and is divided into two parts. Part 1 discusses the basics of the NA fellowship program and the twelve steps and traditions. Part 2 is composed of many personal recovery stories.

Selecting, Preparing And Developing The School District Superintendent David S.G. Carter 2013-11-05 Growing discontent with the performance of educational institutions is common in the USA today and little is being done to address the real problem - that of the need to reform and restructure the entire educational system. A key issue in this reform is the training and development of leaders in educational administration; as experienced "leaders" retire, so new professionals are called to assume the mantle of the "old hands" and vital new opportunities exist for those willing to take up the challenge.; This vitally practical text is about the selection, preparation and professional development of aspiring school leaders over the course of their careers, concentrating on ways to increase their overall effectiveness - particularly in changing times. It looks at changes that have been made and considers what can be adapted from existing systems in order to make radical improvements for those in leadership positions.; It is intended for use by postgraduate students in education, teacher trainings, heads of education faculties and teachers in leadership positions, school board members and aspirant superintendents.

New Studies in the Manuscript Tradition of Njáls saga Svanhildur Óskarsdóttir 2018-10-22 Njáls saga is the best known and most highly regarded of all medieval Icelandic sagas and it occupies a special place in Icelandic cultural history. The manuscript tradition is exceptionally rich and extensive. The oldest extant manuscripts date to only a couple of decades after the saga's composition in the late 13th century and the saga was subsequently copied by hand continuously up until the 20th century, even alongside the circulation of printed text editions in latter centuries. The manuscript corpus as a whole has great socio-historical value, showcasing the myriad ways in which generations of Icelanders interpreted the saga and took an active part in its transmission; the manuscripts are also valuable sources for evidence of linguistic change and other phenomena. The essays in this volume present new research and a range of interdisciplinary perspectives on the Njáls saga manuscripts. Many of the authors took part in the international research project "The Variance of Njáls saga" which was funded by the Icelandic Research Council from 2011-2013.

Restored Tom Berlin 2016-11-29 Often we make a mess of our lives and wonder if there is any redemption. In this book, pastor and author Tom Berlin helps us see our mess through the eyes of Christ to find redemption and restoration. Using Scripture, devotional tools, and the writings of Ignatius of Loyola, John of the Cross, St. Augustine, John Wesley, Evelyn Underhill, and others, Berlin encourages reflection and meditation through our own brokenness. Only then can we focus on the cross as the place where we truly surrender control, leave our mess, and find redemption. Chapters include: This Is a Real Mess Who Left This Mess? Bless This Mess No Messing Around Address This Mess The Message in the Mess

Daily Reflections A 2017-07-27 This is a book of reflections by A.A. members for A.A. members. It was first published in 1990 to fulfill a long-felt need within the Fellowship for a collection of reflections that moves through the calendar year--one day at a time. Each page contains a reflection on a quotation from A.A. Conference-approved literature, such as Alcoholics Anonymous, Twelve Steps and Twelve Traditions, As Bill Sees It and other books. These reflections were submitted by members of the A.A. Fellowship who were not professional writers, nor did they speak for A.A. but only for themselves, from their own experiences in sobriety. Thus the book offers sharing, day by day, from a broad cross section of members, which focuses on the Three Legacies of Alcoholics Anonymous: Recovery, Unity and Service. Daily Reflections has proved to be a popular book that aids individuals in their practice of daily meditation and provides inspiration to group discussions even as it presents an introduction for some to A.A. literature as a whole.

The Narcotics Anonymous Step Working Guides 1998-01-01 Narcotics Anonymous Step Working Guides are meant to be used by NA members at any stage of recovery, whether it's the first time through the steps, or whether they have been a guiding force for many years. This book is intentionally written to be relevant to newcomers and to help more experienced members develop a deeper understanding of the Twelve Steps.

Black Mental Health Ezra E. H. Griffith, M.D 2018-09-24 Novel in its approach and unique in its scope, *Black Mental Health: Patients, Providers, and Systems* examines the role of African Americans within American psychiatric health care from distinct but interconnected perspectives. The experiences of both black patients and the black mental health professionals who serve them are analyzed against the backdrop of the cultural, societal, and professional forces that have shaped their place in this specialized health care arena. The volume opens with the singular, first-person accounts of five senior black psychiatrists -- including Dr. Altha J. Stewart, president of the American Psychiatric Association -- who describe their individual journeys to the top of their field, not shying away from discussing the racism and discrimination that have challenged their paths to leadership. The book's second part focuses on the complexities of and opportunities for delivering mental health care to various subsets of the African American population, including children, women, elderly patients, and LGBTQ individuals. System design strategies, biological therapies, and church-based mental health promotion initiatives are all considered as methods for reducing racial and ethnic disparities in access to effective treatment. Part III examines the training of black mental health professionals and their representation in psychiatry, particularly in the face of discrimination and implicit bias. A chapter on historically black colleges and universities discusses the importance of their role in the delivery of psychiatric services and research development for African Americans. The fourth part builds on this discussion, addressing research that is relevant to the care of

the black population. A concluding chapter highlights the key themes that emerged from each of the previous four parts, providing a holistic view of the place of black patients and providers in American psychiatry. With its blend of scholarship, clinical insight, and training analysis, Black Mental Health is compulsory reading both for trainees -- as care delivery to minority groups is of ever greater importance -- and practicing clinicians, who will glean useful information from the chapters on research advances and treatment modalities. Additionally, policy makers, educators, and historians, among others, will gain a better understanding of the challenges and necessity of developing integrated approaches to the care of nondominant groups.

The Many Lives of Academic Presidents Clark Kerr 1986 The American college presidency is examined, with attention to characteristics of those who become college presidents, how long they serve and where they go after leaving the presidency, and internal/external factors affecting their performance. The analysis is based in part on 800 interviews with presidents, their spouses, and other close associates that were undertaken for a 1984 report, "Presidents Make A Difference: Strengthening Leadership in Colleges and Universities." Brief notes on 24 college presidents illustrate the diversity of these leaders. Reasons presidents give for seeking/accepting and refusing presidencies are identified. The book also considers: experiences of new presidents; similarities between college presidents and corporate executives; general responsibilities of the executive group and board and core responsibilities of the president; skills required of the president; strategies and styles employed by presidents; historical trends affecting the presidency; external influences such as public regulation; internal influences such as student and staff input; four presidential models; and the context of 11 types of institutions. Appended materials include: advice offered by 16 presidents, attributes considered by presidential search committees, and a nine-page annotated bibliography. (SW): reprinted from ERIC.

Crossing the Rubicon examines how such a conspiracy was possible through an interdisciplinary analysis of petroleum, geopolitics, narco-traffic, intelligence and militarism—without which 9/11 cannot be understood. In reality, 9/11 and the resulting "War on Terror" are parts of a massive authoritarian response to an emerging economic crisis of unprecedented scale. Peak Oil—the beginning of the end for our industrial civilization—is driving the elites of American power to implement unthinkably draconian measures of repression, warfare and population control. Crossing the Rubicon is more than a story of corruption and greed. It is a map of the perilous terrain through which we are all now making our way.

Lost Libraries J. Raven 2004-01-31 This pioneering volume of essays explores the destruction of great libraries since ancient times and examines the intellectual, political and cultural consequences of loss. Fourteen original contributions, introduced by a major re-evaluative history of lost libraries, offer the first ever comparative discussion of the greatest catastrophes in book history from Mesopotamia and Alexandria to the dispersal of monastic and monarchical book collections, the Nazi destruction of Jewish libraries, and the recent horrifying pillage and burning of books in Tibet, Bosnia and Iraq.

The Anthropology of Experience Professor Edward M Bruner 1986 Fourteen authors, including many of the best-known scholars in the field, explore how people actually experience their culture and how those experiences are expressed in forms as varied as narrative, literary work, theater, carnival, ritual, reminiscence, and life review. Their studies will be of special interest for anyone working in anthropological theory, symbolic anthropology, and contemporary social and cultural anthropology, and useful as well for other social scientists, folklorists, literary theorists, and philosophers.

One Hundred Years at the Intersection of Chemistry and Physics Jeremiah James 2011-10-27 This volume, occasioned by the centenary of the Fritz Haber Institute, formerly the Institute for Physical Chemistry and Electrochemistry, covers the institute's scientific and institutional history from its founding until the present. The institute was among the earliest established by the Kaiser Wilhelm Society, and its inauguration was one of the first steps in the development of Berlin-Dahlem into a center for scientific research. Its establishment was made possible by an endowment from Leopold Koppel, granted on the condition that Fritz Haber, well-known for his discovery of a method to synthesize ammonia from its elements, be made its director. The history of the institute has largely paralleled that of 20th-century Germany. It undertook controversial weapons research during World War I, followed by a "Golden Era" during the 1920s, in spite of financial hardships. Under the National Socialists it experienced a purge of its scientific staff and a diversion of its research into the service of the new regime, accompanied by a breakdown in its international relations. In the immediate aftermath of World War II it suffered crippling material losses, from which it recovered slowly in the post-war era. In 1953, shortly after taking the name of its founding director, the institute joined the fledgling Max Planck Society. During the 1950s and 60s, the institute supported diverse researches into the structure of matter and electron microscopy in a territorially insular and politically precarious West-Berlin. In subsequent decades, as both Berlin and the Max Planck Society underwent significant changes, the institute reorganized around a board of coequal scientific directors and a renewed focus on the investigation of elementary processes on surfaces and interfaces, topics of research that had been central to the work of Fritz Haber and the first "Golden Era" of the institute.

and his passion for art and nature encouraged an artistic flowering that rivaled European art during the rule of the Medicis. Jahangir's memoirs provide not only the history of his reign, but also his reflections on art, politics, and life, including the suicide of one of his wives, and selections of poetry written by members of his harem.

The Darker Side of Travel Richard Sharpley 2009 The Darker Side of Travel is a contemporary and comprehensive analysis of dark tourism. Drawing on existing literature, numerous examples and introducing new conceptual perspectives, it develops a theoretically informed foundation for examining the demand for and supply of dark tourism experiences. It also explores issues relevant to the development, management and interpretation of visitor sites and attractions associated with death, disaster and suffering.

Father Ed Dowling Glenn F. Chesnut 2015-07-17 The story of Father Ed Dowling, S.J., the Jesuit priest who served for twenty years as sponsor and spiritual guide to Bill Wilson, the co-founder of Alcoholics Anonymous. An icy evening in December 1940 saw the first meeting of two extraordinary spiritual leaders. Father Ed said that the graces he received from meeting Bill Wilson were as great as those he had received from his ordination as a priest, and Bill in turn described encountering the Jesuit as being like a second conversion experience, where he could feel the transcendent presence of God filling the entire room with grace. The good priest taught Wilson about St. Ignatius Loyolas Spiritual Exercises, about the eternal battle between good and evil which the Spanish saint described in that book, and explained the Jesuit understanding of the way we can use our deepest emotions to receive guidance from God while serving on that battlefield. The co-founder of the twelve step movement in turn supplied Father Ed with some of the most valuable tools he possessed for carrying out small group therapy on a wide range of different kinds of troubled people. Together the two men discussed Poulains Graces of Interior Prayer and Bills attempts to make spiritual contact with both spooks and saints, and explored the world of LSD experiences and the teachings of the Catholic, Hindu, and Buddhist mystics in Aldous Huxleys Perennial Philosophy. And we will see how Father Ed, with his deep social conscience, helped Bill W. turn his book on the Twelve Traditions into a Bill of Rights for the twelve step movement, and how he laid out his own spiritual vision of Alcoholics Anonymous at the A.A. International in St. Louis in 1955.

Pinson Mounds Robert C. Mainfort Jr. 2013-10-01 Pinson Mounds: Middle Woodland Ceremonialism in the Midsouth is a comprehensive overview and reinterpretation of the largest Middle Woodland mound complex in the Southeast. Located in west Tennessee about ten miles south of Jackson, the Pinson Mounds complex includes at least thirteen mounds, a geometric earthen embankment, and contemporary short-term occupation areas within an area of about four hundred acres. A unique feature of Pinson Mounds is the presence of five large, rectangular platform mounds from eight to seventy-two feet in height. Around A.D. 100, Pinson Mounds was a pilgrimage center that drew visitors from well beyond the local population and accommodated many distinct cultural groups and people of varied social stations. Stylistically nonlocal ceramics have been found in virtually every excavated locality, all together representing a large portion of the Southeast. Along with an overview of this important and unique mound complex, Pinson Mounds also provides a reassessment of roughly contemporary centers in the greater Midsouth and Lower Mississippi Valley and challenges past interpretations of the Hopewell phenomenon in the region.

American Psychiatric Association Practice Guidelines American Psychiatric Association 1996 The aim of the American Psychiatric Association Practice Guideline series is to improve patient care. Guidelines provide a comprehensive synthesis of all available information relevant to the clinical topic. Practice guidelines can be vehicles for educating psychiatrists, other medical and mental health professionals, and the general public about appropriate and inappropriate treatments. The series also will identify those areas in which critical information is lacking and in which research could be expected to improve clinical decisions. The Practice Guidelines are also designed to help those charged with overseeing the utilization and reimbursement of psychiatric services to develop more scientifically based and clinically sensitive criteria.

Freedom in the World 2016 Freedom House 2016-12-24 Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 195 countries and fifteen territories are used by policymakers, the media, international corporations, civic activists, and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.

Opioid Reckoning Amy C. Sullivan 2021-10-19 Examines the complexity and the humanity of the opioid epidemic America's opioid epidemic continues to ravage families and communities, despite intense media coverage, federal legislation, criminal prosecutions, and harm reduction efforts to prevent overdose deaths. More than 450,000 Americans have died from opioid overdoses since the late 1990s. In *Opioid Reckoning*, Amy C. Sullivan explores the complexity of the crisis through firsthand accounts of people grappling with the reverberating effects of stigma, treatment, and recovery. Nearly everyone in the United States has been touched in some way by the opioid epidemic, including the author and her family. Sullivan uses her own story as a launching point to learn how the opioid epidemic challenged longstanding recovery protocols in Minnesota, a state internationally recognized for pioneering addiction treatment. By centering the voices of many people who have experienced opioid use, treatment, recovery, and loss, Sullivan exposes the devastating effects of a one-size-fits-all approach toward treatment of opioid dependency. Taking a clear-eyed, nonjudgmental perspective of every aspect of these issues—drug use, parenting, harm reduction, medication, abstinence, and stigma—*Opioid Reckoning* questions current treatment models, healthcare inequities, and the criminal justice system. Sullivan also imagines a future where anyone suffering an opioid-use disorder has access to the

individualized care, without judgment, available to those with other health problems. *Opioid Reckoning* presents a captivating look at how the state that invented “rehab” addresses the challenges of the opioid epidemic and its overdose deaths while also taking readers into the intimate lives of families, medical and social work professionals, grassroots activists, and many others impacted by the crisis who contribute their insights and potential solutions. In sharing these stories and chronicling their lessons, Sullivan offers a path forward that cultivates empathy, love, and hope for anyone affected by chaotic drug use and its harms.

The Impaired Physician Stephen Scheiber 2013-11-11 The Oath of Hippocrates, administered to generations of physicians as they embark on their profession, begins: "I will look upon him who shall have taught me this art even as one of my parents. I will share my substance with him, and I will supply his necessities, if he be in need. " Despite that solemn promise, we have too often ignored or neglected the physician in trouble. Even if we could put aside the human concerns of one physician for an impaired colleague (can our profession truly permit that?), we must concede that our society can ill afford it. This book, which has been assembled and edited by Stephen C. Scheiber and Brian B. Doyle, may be a lifesaver for the doctor in trouble and will be a health saver for the population of our country. A land which decried the lack of physicians a quarter century ago and spent the vast resources to double the number of graduates in medicine, cannot permit a tenth of all doctors to be out of commission. That would be a large, and for the most part preventable, addition to the cost of health care in America. In this book, Scheiber and Doyle have gathered the expertise of many psychiatrists who are knowledgeable about the impaired physician.
