**The Oxford Handbook of European Legal History** Heikki Pihlajamäki 2018-06-28 European law, including both civil law and common law, has gone through several major phases of expansion in the world. European legal history thus also is a history of legal transplants and cultural borrowings, which national legal histories as products of nineteenth-century historicism have until recently largely left unconsidered. The Handbook of European Legal History supplies its readers with an overview of the different phases of European legal history in the light of today's state-of-the-art research, by offering cutting-edge views on research questions currently emerging in international discussions. The Handbook takes a broad approach to its subject matter both nationally and systemically. Unlike traditional European legal histories, which tend to concentrate on "heartlands" of Europe (notably Italy and Germany), the Europe of the Handbook is more versatile and nuanced, taking into consideration the legal developments in Europe's geographical "fringes" such as Scandinavia and Eastern Europe. The Handbook covers all major time periods, from the ancient Greek law to the twenty-first century. Contributors include acknowledged leaders in the field as well as rising talents, representing a wide range of legal systems, methodologies, areas of expertise and research agendas.

**Amoris Laetitia** Pope Francis 2016-04-22 "All of us are called to keep striving towards something greater than ourselves and our families, and every family must feel this constant impulse. Let us make this journey as families, let us keep walking together." Pope Francis, Amoris Laetitia In his groundbreaking work on modern family life, Amoris Laetitia: On Love in the Family, Pope Francis continues to guide and lead the Church, calling us to be a sign of mercy and encouragement for families of all shapes and sizes. The Our Sunday Visitor edition includes exclusive reflection and discussion questions, to help Catholics grow in our understanding of this call, and act upon it. In Amoris Laetitia: On Love in the Family the Holy Father expands on the topics and considerations of the two Synods on the family, and adds his own considerations to help us provide pastoral guidance to support and strengthen today's families. On Love in the Family guides us through: Scripture – what we can

learn from Biblical families and relationships with God and each other Reality – the experiences and challenges we face in today's world Tradition – essential aspects of Church teaching on marriage and families Love – what it means for all our relationships Ministry – Pope Francis offers pastoral perspectives for helping build strong families Spirituality – the expression of the Gospel message in our relationships

**Arab Paper** Joseph von Karabacek 2001 Bibliophiles in Europe at the end of the nineteenth century began to take a serious interest in the manuscripts of the Middle East and the paper on which they were written. Perhaps the most important of these men were C.-M. Briquet working in Geneva, and J. Wiesner and J. von Karabacek working in Vienna. All three were concerned with the burning topic of the moment: Was oriental paper made of cotton? Within the space of two years these three writers published seminal articles for the European study of Arab paper. *Das Arabische Papier* is one of those articles. The late Don Baker's inspiration to set about the translation and interpretation of this work was 'simply the desire to know the contents of this much quoted article'. Students, historians, curators, collectors, conservators and all those interested in the historical development and spread of papermaking will realise why Don Baker wished to make this important text available to English readers. This Archetype edition is a revised edition of the volume, which Don Baker produced in 1991.

*Individuals and Materials in the Greco-Roman Cults of Isis* Valentino Gasparini 2019-11-07 In *Individuals and Materials in the Greco-Roman Cults of Isis* Valentino Gasparini and Richard Veymiers present 26 studies with a focus on the individuals and groups which animated the diffusion and reception of the cults of Isis and other Egyptian gods throughout the Hellenistic and Roman worlds.

**The Bader Collection** David De Witt 2014-03-30 For many decades the Agnes Etherington Art Centre has received European paintings from the Bader Collection from a wide range of periods and schools, from the German Renaissance to the Italian Rococo. This book features the centre's substantial group of over 50 remarkable paintings from European schools, notably Italy, Germany, France and England.

*The World in Venice* Bronwen Wilson 2005 Positing a dynamic relationship between print culture and social experience, Bronwen Wilson's *The World in Venice* focuses on the printed image during a century of profound transformation. City views, costume illustrations, events, and portraits of locals and foreigners are brought together to show how printmakers responded to an expanding image of the world in Renaissance Venice, and how, in turn, prints influenced the ways in which individuals thought about themselves. Woodcuts and engravings of cities and inhabitants of Europe, and those of distant lands, initiated a sudden and pervasive experience with alterity that redefined the relations of Europeans to the world. By condensing the world into pictures, print enabled a radically novel and vicarious experience of others. Wilson explores the overlapping and evolving relations between space, vision, print, and identity, and engages with current scholarly debates concerning ethnicities, gender and

geography, copies and originals, travel, nationhood, fashion, urban life, visuality, and the body. Venice was one of the largest cities in Renaissance Europe, a trading crossroads, and a centre of print. *The World in Venice* shows how Venetian identity came to be envisioned within the growing global context that print constructed for it.

*Hollywood Highbrow* Shyon Baumann 2018-06-05 Today's moviegoers and critics generally consider some Hollywood products--even some blockbusters--to be legitimate works of art. But during the first half century of motion pictures very few Americans would have thought to call an American movie "art." Up through the 1950s, American movies were regarded as a form of popular, even lower-class, entertainment. By the 1960s and 1970s, however, viewers were regularly judging Hollywood films by artistic criteria previously applied only to high art forms. In *Hollywood Highbrow*, Shyon Baumann for the first time tells how social and cultural forces radically changed the public's perceptions of American movies just as those forces were radically changing the movies themselves. The development in the United States of an appreciation of film as an art was, Baumann shows, the product of large changes in Hollywood and American society as a whole. With the postwar rise of television, American movie audiences shrank dramatically and Hollywood responded by appealing to richer and more educated viewers. Around the same time, European ideas about the director as artist, an easing of censorship, and the development of art-house cinemas, film festivals, and the academic field of film studies encouraged the idea that some American movies--and not just European ones--deserved to be considered art.

*The Rhaeto-Romance Languages* Paola Beninca 2005-12-20 The Rhaeto-Romance languages have been known as such to the linguistic community since the pioneering studies of Ascoli and Gartner over a century ago. There has never been a community of RR speakers based on a common history or polity and the

various dialects are mutually unintelligible, but a unity, based on a number of common features, has been advanced. This book is the first general description of the Rhaeto-Romance languages to be written in English. It provides a critical examination of the phonology, morphology, lexicon, and syntax of the modern Rhaeto-Romance dialects within the broader perspective of Romance comparative linguistics.

**Futurism** Giovanni Lista 2001 Born in Italy, the first avant-garde of the twentieth century - before Cubism, Dadaism and Surrealism -, Futurism is a major landmark in the history of art and of modern thought. Rather than a school of painting or literature, it was a revolutionary movement whose aim was to create a new awareness and a new approach to the world in general and to art in particular. It embodied the determination to perpetually regenerate man confronted with the progress of technology (electricity, mechanization, telecommunication ...). The Futurists' challenge was to combine all the aspects of modernism within aesthetic creation, re-considering them both in a single dynamic sweep. Ranging from plastic arts to culinary arts, they gave birth to amazing works that would become references for the following avant-gardes, and today, a legacy claimed by many artists. In this reference summing-up, the author reviews the different aesthetic stages of the movement, from "plastic dynamism" in the 1910s to aeropainting in the 1930s, and examines the relationship, long the object of controversy, between the movement and the Italian Fascist government.

*Europe and Empire* Massimo Cacciari 2016-01-04 The European Union and the single currency have given Europe more stability than it has known in the past thousand years, yet Europe seems to be in perpetual crisis about its global role. The many European empires are now reduced to a multiplicity of ethnicities, traditions, and civilizations. Europe will never be One, but to survive as a union it will have to become a federation of "islands" both distinct and connected. Though drawing on philosophers of Europe's past, Cacciari calls not to resist Europe's sunset but to embrace it. Europe will have to open up to the possibility that in few generations new exiles and an unpredictable cultural hybridism will again change all we know about the European legacy. Though scarcely alive in today's politics, the political unity of Europe is still a necessity, however impossible it seems to achieve.

Abolitionism and the Persistence of Slavery in Italian States, 1750-1850 Giulia

Bonazza 2018-12-13 This volume offers a pioneering study of slavery in the Italian states. Documenting previously unstudied cases of slavery in six Italian cities—Naples, Caserta, Rome, Palermo, Livorno and Genoa—Giulia Bonazza investigates why slavery survived into the middle of the nineteenth century, even as the abolitionist debate raged internationally and most states had abolished it. She contextualizes these cases of residual slavery from 1750–1850, focusing on two juridical and political watersheds: after the Napoleonic period, when the Italian states (with the exception of the Papal States) adopted constitutions outlawing slavery; and after the Congress of Vienna, when diplomatic relations between the Italian states, France and Great Britain intensified and slavery was condemned in terms that covered only the Atlantic slave trade. By excavating the lives of men and women who remained in slavery after abolition, this book sheds new light on the broader Mediterranean and transatlantic dimensions of slavery in the Italian states.

Tommaso Campanella Germana Ernst 2010-03-16 A friend of Galileo and author of the renowned utopia *The City of the Sun*, Tommaso Campanella (Stilo, Calabria, 1568- Paris, 1639) is one of the most significant and original thinkers of the early modern period. His philosophical project centred upon the idea of reconciling Renaissance philosophy with a radical reform of science and society. He produced a complex and articulate synthesis of all fields of knowledge – including magic and astrology. During his early formative years as a Dominican friar, he manifested a restless impatience towards Aristotelian philosophy and its followers. As a reaction, he enthusiastically embraced Bernardino Telesio's view that knowledge could only be acquired through the observation of things themselves, investigated through the senses and based on a correct understanding of the link between words and objects. Campanella's new natural philosophy rested on the principle that the books written by men needed to be compared with God's infinite book of nature, allowing them to correct the mistakes scattered throughout the human 'copies' which were always imperfect, partial and liable to revisions. It is in the light of these principles that he defended Galileo's right to read the book of nature while denouncing the mistake of those – be they Aristotelian philosophers or theologians – who wanted to stop him from carrying on his natural investigations. However, Campanella maintained that the book of nature, far from being written in mathematical characters, was a living organism in which each natural being was endowed with life and a degree of sensibility that was appropriate for its preservation and propagation. Nature as a whole was an organism in which each single part was directed towards the common good. This is the reason why Campanella thought that nature had to be regarded as an ideal model for any political organisation. Political structures were often ruled by injustice and violence precisely because they had departed from that natural model. This book charts Campanella's intellectual life by showing the origin, development and persistence of some of the fundamental tenets of his thought.

Fernand Braudel and Carlo Ginzburg, as the proponent of a new kind of history - in his case, not *longue durée* or micro-history, but 'connected history': connected cross-culturally, and spanning regions, subjects and archives that are conventionally treated alone. Not a research paradigm, he insists, it is more of an *oppositionswissenschaft*, a way of trying to constantly break the moulds of historical objects. The essays collected here, some quite polemical - as in the lead text on the notion of India-as-civilization, or another, assessing such a literary totem as V. S. Naipaul - illustrate the breadth of Subrahmanyam's concerns, as well as the quality of his writing. *Connected History* considers what, exactly, is an empire, the rise of 'the West' (less of a place than an idea or ideology, he insists), Churchill and the Great Man theory of history, the reception of world literature and the itinerary of subaltern studies, in addition to personal recollections of life and work in Delhi, Paris and Lisbon, and concluding remarks on the practice of early-modern history and the framing of historical enquiry.

*After Babel* George Steiner 2013-04-16 "A brilliant work . . . A dazzling meditation on the very nature of language itself" from the world-renowned scholar and author of *The Poetry of Thought* (Kirkus Reviews). In his classic work, literary critic and scholar George Steiner tackles what he considers the Babel "problem": Why, over the course of history, have humans developed thousands of different languages when the social, material, and economic advantages of a single tongue are obvious? Steiner argues that different cultures' desires for privacy and exclusivity led to each developing its own language. Translation, he believes, is at the very heart of human communication, and thus at the heart of human nature. From our everyday perception of the world around us, to creativity and the uninhibited imagination, to the often inexplicable poignancy of poetry, we are constantly translating—even from our native language.

*The Bilingual Text* Jan Walsh Hokenson 2014-06-03 Bilingual texts have been left outside the mainstream of both translation theory and literary history. Yet the tradition of the bilingual writer, moving between different sign systems and audiences to create a text in two languages, is a rich and venerable one, going back at least to the Middle Ages. The self-translated, bilingual text was commonplace in the multilingual world of medieval and early modern Europe, frequently bridging Latin and the vernaculars. While self-translation persisted among cultured elites, it diminished during the consolidation of the nation-states, in the long era of nationalistic monolingualism, only to resurge in the postcolonial era. *The Bilingual Text* makes a first step toward providing the fields of translation studies and comparative literature with a comprehensive account of literary self-translation in the West. It tracks the shifting paradigms of bilinguality across the centuries and addresses the urgent questions that the bilingual text raises for translation theorists today: Is each part of the bilingual text a separate, original creation or is each incomplete without the other? Is self-translation a unique genre? Can either version be split off into a single language or literary tradition? How can two linguistic versions of a text be fitted into standard models of foreign and domestic texts and cultures? Because such texts defeat standard categories of analysis, *The Bilingual Text* reverses the usual critical gaze, highlighting not dissimilarities but continuities across versions, allowing for dissimilarities within orders of correspondence, and englobing the literary as well as linguistic and cultural dimensions of the text. Emphasizing the arcs of historical change in concepts of language and translation that inform each case study, *The Bilingual Text* examines the perdurance of this phenomenon in Western societies and literatures.

The War of the Fists Robert Charles Davis 1994 "The War of the Fists" is a study of 17th-century worker culture in the city of Venice, focusing on the mock battles, or "battagliole", which the town's two popular factions waged on public bridges. Their importance in the city's plebeian life makes bridge battles an extremely valuable point of entry for exploring structures of Venetian popular culture, a task which Robert Davis attempts at several levels.

**Tommaso Campanella and the Transformation of the World** John M. Headley 2019-01-15 Tommaso Campanella (1568-1639) is one of the most fascinating, if hitherto inaccessible, intellectuals of the Italian Renaissance. His work ranges across many of the intellectual, ecclesiastical, and political concerns of that tumultuous era. John Headley uses Campanella's life and works to open a window into this complex period. He not only explicates the frequently contradictory texts of a prolific author but also situates Campanella's

writings amidst the larger currents of European thought. For all its obscurely magical and astrolgocial intricacies, Campanella's entire intellectual endeavor expresses an effort to impose a distinctive order and direction upon the major issues and forces of the age different from that which was shortly to prevail with the new Galilean science and the Leviathan state. In the process of identifying and engaging these issues and imparting in some instances something of his own, he managed to mobilize and deploy many of the salient principles of late medieval and Renaissance culture, often cast in a curiously modern hue and aligned with the new forces of the age. Indeed, modern and antique, new and old juxtapose violently in the person of this reformer who combines an encyclopedic comprehensiveness of intellect with an appalling intensity of will. He is a man who strove to destabilize the regnant forces of what he identified as tyranny, sophistry, and hypocrisy and to shake the world into a new order. In this book, Headley invites readers to look anew at this mercurial figure and at the turbulent times in which he lived. John M. Headley is Professor of History at the University of North Carolina at Chapel Hill. He has authored studies of Luther, Thomas More, the Emperor Charles V, and San Carlo Borromeo. Originally published in 1997. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Nathalie - Tome 9 - Le nombril du monde 2010-03-26 Dans ce bas monde, chacun pense à soi... On est tous égoïstes, non ? Mais Nathalie, son bonheur elle le voit sous les cocotiers. Ailleurs, quoi !.. Elle sait très bien que le sable blanc et la mère turquoise, c'est des clichés. Elle aurait plutôt envie de se rendre utile. Le truc humanitaire en quelque sorte parce que dans ces pays où tout le monde rêve d'aller, les gens sont plus ou moins dans la misère, avec typhons et politiciens véreux. On est loin de la carte postale! Pendant que ses pauvres parents se débattent toujours dans leurs petits tracassés, délais, factures, et autres bobos de la vie quotidienne, Nathalie est déjà ailleurs. Elle fait des rencontres : Migr le petit gitan de passage, Madame pipi qui travaille dans les toilettes de l'aéroport et puis y a les copines à tonton. La dernière, Vanille, elle vient des îles. C'est un comble ça ! C'est Nat' qui veut partir et c'est l'exotisme qui débarque à domicile ! N'empêche qu'un jour, elle les prendra les avions qui l'emmèneront soulager (juste un peu) les misères du monde. Et, comme dit son tonton, chômeur rigolo et philosophe, "Faut arrêter de se regarder le nombril et montrer enfin ce qu'on a dans le ventre !" Fin de citation.

**The World Map, 1300–1492** Evelyn Edson 2007-07-15 A history of the development of world maps during the later medieval period in the centuries leading up to Columbus's journey. In the two centuries before Columbus, mapmaking was transformed. The World Map, 1300–1492 investigates this important, transitional period of mapmaking. Beginning with a 1436 atlas of ten maps produced by

Venetian Andrea Bianco, Evelyn Edson uses maps of the fourteenth and fifteenth centuries to examine how the discoveries of missionaries and merchants affected the content and configuration of world maps. She finds that both the makers and users of maps struggled with changes brought about by technological innovation?the compass, quadrant, and astrolabe?rediscovery of classical mapmaking approaches, and increased travel. To reconcile the tensions between the conservative and progressive worldviews, mapmakers used a careful blend of the old and the new to depict a world that was changing?and growing?before their eyes. This engaging and informative study reveals how the ingenuity, creativity, and adaptability of these craftsmen helped pave the way for an age of discovery. "A comprehensive and complex picture of the changing face of medieval geography. With the mastery of a formidable palette of historiographic knowledge and well-reasoned discussions of the sources, *The World Map, 1300–1492* will certainly remain an important work to consult for both medieval and early modern scholars for many years to come." –Ian J. *Reading Dante in Renaissance Italy* Simon Gilson 2018-02-15 Simon Gilson's new volume provides the first in-depth account of the critical and editorial reception in Renaissance Italy, particularly Florence, Venice and Padua, of the work of Dante Alighieri (1265–1321). Gilson investigates a range of textual frameworks and related contexts that influenced the way in which Dante's work was produced and circulated, from editing and translation to commentaries, criticism and public lectures. In so doing he modifies the received notion that Dante and his work were eclipsed during the Renaissance. Central themes of investigation include the contestation of Dante's authority as a 'classic' writer and the various forms of attack and defence employed by his detractors and partisans. The book pays close attention not only to the *Divine Comedy* but also to the *Convivio* and other of Dante's writings, and explores the ways in which the reception of these works was affected by contemporary developments in philology, literary theory, philosophy, theology, science and printing.
