China-Japan Relations in the 21st Century Lam Peng Er 2017-09-05 This new collection examines the paradox of Sino-Japanese relations and the rising diplomatic antagonism between both countries despite deepening economic interdependency. Offering a unique perspective on the history of bilateral ties since diplomatic normalization in 1972, it considers the growing interdependency between China and Japan in bilateral trade, investment, tourism and education, as well as the question of nationalism and Sino-Japanese rivalry in multilateral settings such as in ASEAN processes, the Mekong Basin and the South China Sea. Focusing on the power transition in East Asia, the lack of a common enemy in the post-Cold War era, the clash of Chinese and Japanese nationalism, and a lack of trust, shared values and common identity between China and Japan, this collection addresses the origins of a troubled bilateral relationship which could impact on the stability and prosperity of East Asia.

Oxford Handbook of the International Relations of Asia Saadia M. Pekkanen 2014 This handbook examines the theory and practice of international relations in Asia. Building on an investigation of how various theoretical approaches to international relations can elucidate Asia's empirical realities, authors examine the foreign relations and policies of major countries or sets of countries.

The Criminalization of Mental Illness Risdon N. Slate 2013-10-03 For a myriad of reasons the criminal justice system has become the de facto mental health system. This book explores how and why this is the case. Sensationalized cases

often drive criminal justice policies that can sometimes be impulsively enacted and misguided. While there are chapters that examine competency, insanity, and inpatient and outpatient commitment, the primary focus of the book is on the bulk of encounters that clog the criminal justice system with persons with mental illnesses (pwmi). Criminal justice practitioners are often ill-equipped for dealing with pwmi in crises. However, via application of therapeutic jurisprudence principles some agencies are better preparing their employees for such encounters and attempting to stop the inhumane and costly recycling of pwmi through the criminal justice system. Coverage runs the gamut from deinstitutionalization, to specialized law enforcement responses, to mental health courts, to jails and prisons, to discharge planning, diversion, and reentry. Also, criminal justice practitioners in their own words provide insight into and examples of the interface between the mental health and criminal justice systems. Throughout the book the balance between maintaining public safety and preserving civil liberties is examined as the state's police power and *parens patriae* roles are considered. Reasoned, collaborative approaches for influencing and informing policies that are often driven by crises are discussed; this book also reflects more psychological underpinnings than the 1st edition, as one of the co-authors new to this edition is a forensic clinical psychologist. The following Teaching Materials are available electronically on a CD or via email (Please contact Beth Hall at bhall@cap-press.com to request a copy, and specify what format is needed): -Teacher's Manual with notes and extensive test bank in Word/pdf formats -Test bank is also available in separate files by chapter in Word and Blackboard formats. Other LMS formats may be available; let me know what you need.) Upon adoption only, the following are also available: -3 Videos. Upon adoption only. One video illustrates Crisis Intervention Team scenarios, another explores PTSD and the third video is of a lecture author Risdon Slate gave to law enforcement in training that describes his own personal story. -PowerPoint slides will be available upon adoption. Email bhall@cap-press.com for more information. "I am so grateful that I have decided on this book and the resources are amazing." – Joseph C. Marinello, lecturer in the Department of Criminal Justice and Criminology, UNC Charlotte (on classroom adoption of second edition) "Notorious criminal cases tend to drive public opinion and policy when it comes to how our criminal justice system deals with persons with mental illnesses. Drs. Slate and Johnson's book is a far brighter star to steer by. By most accounts, including the US Department of Justice, our criminal justice system is in crisis. In *The Criminalization of Mental Illness* the authors explain how our justice system has failed persons with mental illnesses, the public and its own self-interests. But rather than place blame, the authors focus on illuminating the history and anatomy of the problem and offering real solutions. Because they are based on careful scholarship, their proposals are authoritative and make sense. But it is their informed empathy for all the players involved in the tragedy—not just persons with mental illnesses—that makes this book a must read for anyone involved in the criminal justice system or simply interested in knowing the truth of how it is broken and can be fixed." – Xavier F. Amador, Ph.D., Adjunct Professor, Columbia University, Author of the National Best Seller *I am Not Sick, I Don't Need Help!* and *I'm Right, You're Wrong, Now What?*

"The book confronts myths and social/political policy failures directly; and with great honor recognizes those advocates whose work has moved social justice and mental health policy forward. [Their] dedication and passion to the subject of promoting human rights and recovery is evident in every word. It is a masterful, relevant and inspiring work." – Ginger Lerner-Wren, the nation's first mental health court judge and member of the President's Commission on Mental Health "[This book] provides extraordinary insights into the manner by which people with mental illness are processed through the criminal justice system... I thoroughly enjoyed this work and would recommend it to anyone who has an interest in issues involving mental illness and the criminal justice system. I have seen a few books in this area, but have never found one quite as comprehensive and well-researched. It is, without exception, one of the best academic books that I have read in many years." – Penn State, Altoona, Professor Robert M. Worley in his book review for The Southwest Journal of Criminal Justice, Fall 2008 "This is a highly insightful and important book which corrections staff, academics, students, and the general public should know about." – Ken Kerle, Ph.D, American Jail Association "Overall this very readable book provides a good survey of the various sectors of the criminal justice system and their response to the substantive changes that have affected persons with mental illness during the recent past. These authors provide a valuable guide for mental health professionals interested in appropriate treatment and placement of persons with mental illness." – Frederick J. Frese, Ph.D., Psychiatric Services: A Journal of the American Psychiatric Association "Without a doubt, it is the most comprehensive explanation of what has happened between the two systems during the past 40 or so years. It explains not only the crisis that exists and how we got here, but some interesting and innovative ways that local governments are providing solutions... [M]ore important than the chronicling of the impact of this social crisis, it demonstrates with pointed examples how the two systems intertwine with well-intentioned judicial and treatment policies. No matter how you view the issue of the mentally ill in prison, the book demonstrates that the person left out of the discussion is the defendant/offender/patient." – Corrections Today

Central America International Monetary Fund 2006-05-09 Intraregional financial activity in Central America has grown substantially in the past decade, contributing to efficiency and economic development. At the same time, the expansion of activities by regional conglomerates has increased the challenges to supervisory authorities of containing the risks of contagion. Prepared as part of the Central America Financial Sector Regional Project by an IMF and World Bank staff team, this book outlines trends in the region's financial sector integration, supervisory responses, development of the insurance sector, payment and securities settlement arrangements, and worker remittances. It addresses the many common policy challenges facing Central American countries--

Asia-Pacific David Lai 2013 Dr. David Lai provides a timely assessment of the geostrategic significance of Asia-Pacific. His monograph is also a thought-provoking analysis of the U.S. strategic shift toward the region and its implications. Dr. Lai judiciously offers the following key points. First, Asia-Pacific, which covers China, Northeast Asia, and Southeast Asia, is a region with complex currents. On the one hand, there is an unabated region-wide drive for economic development that has been pushing Asia-Pacific forward for decades. On the other, this region is troubled with, aside from many other conflicts, unsettled maritime disputes that have the potential to trigger wars between and among Asia-Pacific nations. Second, on top of these mixed currents, China and the United States compete intensely over a wide range of vital interests in this region. For better or for worse, the U.S.-China relationship is becoming a defining factor in the relations among the Asia-Pacific nations. Third, the U.S. strategic shift toward Asia-Pacific is, as President Obama puts it, not a choice but a necessity. Although conflicts elsewhere, especially the ones in the Middle East, continue to draw U.S. attention and consume U.S. foreign policy resources, the United States is turning its focus toward China and Asia-Pacific. Fourth, in the mid-2000s, the United States and China made an unprecedented strategic goodwill exchange and agreed to blaze a new path out of the tragedy that often attends great power transition. Fifth, at this time of U.S. strategic reorientation and military rebalancing toward Asia-Pacific, the most dangerous consideration is that Asia-Pacific nations having disputes with China can misread U.S. strategic intentions and overplay the 'U.S. card' to pursue their territorial interests and challenge China. Finally, territorial dispute is becoming an urgent issue in the Asia-Pacific.

Global Trends 2040 National Intelligence Council 2021-03 "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) *Global Trends 2040-A More Contested World* (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Education in East and Central Africa Charl Wolhuter 2014-06-26 Education in East and Central Africa is a comprehensive critical reference guide to education in the region. The Oxford Handbook of the International Relations of Asia Saadia M. Pekkanen 2014-08-19 In the past quarter century, the importance of Asia in international relations has grown exponentially. This Handbook gathers the most important scholars in the field of Asia's international relations to address this momentous change in world politics. The editors and contributors focus on three basic themes: assessing appropriate theories for explaining the evolution of the international relations of Asian countries within the region and with the rest of the world; tracing the recent history of Asia in world politics; and focusing on emerging trends. The Handbook brings readers the latest scholarship on the bilateral, regional, and global relations of Asian countries in the fields of political economy, national security, and human security. Comprehensive in theme, breadth, and methodology, this Handbook is a timely addition to the existing literature on the changes currently underway in Asian countries that promise to have significant implications for world politics.

The Rise of China Douglas C. Lovelace, Jr. 2015-11-10 *Terrorism: Commentary on Security Documents* is a series that provides primary source documents and expert commentary on various topics relating to the worldwide effort to combat terrorism, as well as efforts by the United States and other nations to protect their national security interests. Volume 139, *The Rise of China*, examines the strategic implications of China's increasing economic and military power for the international community. Regional and global reactions to the growth of Chinese economic investment and property acquisitions are considered, along with responses to border disputes and other contentious regional issues. The documents in this volume include several reports and studies prepared by the U.S.-China Economic and Security Commission, examining such topics as: the evolving state of the overall military relationship between the U.S. and China; the development of China's Navy; China's establishment of an Air Defense Identification Zone (ADIZ); Chinese legal views on cyberspace and cybersecurity; general trends in U.S.-Chinese science and technology cooperation; and the impact of Chinese economic development on the United States.

Global China Tarun Chhabra 2021-06-22 The global implications of China's rise as a global actor In 2005, a senior official in the George W. Bush administration expressed the hope that China would emerge as a "responsible stakeholder" on the world stage. A dozen years later, the Trump administration dramatically shifted course, instead calling China a "strategic competitor" whose actions routinely threaten U.S. interests. Both assessments reflected an underlying truth: China is no longer just a "rising" power. It has emerged as a truly global actor, both economically and militarily. Every day its actions affect nearly every region and every major issue, from climate change to trade, from conflict in troubled lands to competition over rules that will govern the uses of emerging technologies. To better address the implications of China's new status, both for American policy and for the broader international order, Brookings scholars conducted research over the past two years, culminating in a project: *Global China: Assessing China's Growing Role in the World*. The project is intended to furnish policy makers and the public with hard facts and deep insights for understanding China's regional and global ambitions. The initiative draws not only on Brookings's deep bench of China and East Asia experts, but also on the tremendous breadth of the institution's security, strategy, regional studies, technological, and economic development experts. Areas of focus include the evolution of China's domestic institutions; great power relations; the emergence of critical technologies; Asian security; China's influence in key regions beyond Asia; and China's impact on global governance and norms. *Global China: Assessing China's Growing Role in the World* provides the most current, broad-scope, and fact-based assessment of the implications of China's rise for the United States and the rest of the world.

contributors provide a range of perspectives on the increasingly central issues of state reform, European integration and British regionalism in the 1990s. Using case material, the contributors examine: the effects of state reform and European integration on British regionalism and the devolution debate; and the nature of recent central responses to the re-emergence of regional and devolution issues, with a particular focus on the recent policies of the Major governments and the policies of the Opposition parties. They also present some evidence which suggests that state reform and EC/EU developments have determined and accentuated important new trends in British regionalism, and underpin the plausibility of far-reaching regional and devolution reforms.

Contentious Integration Chien-peng Chung 2016-05-13 The Asian-Pacific is now one of the most important regions in the global system, where the interplay of integrative economic, geo-political and sociocultural processes provide increasing scope for regional leadership to be exercised, particularly by China and Japan. This book studies the relationship between the People's Republic of China and Japan as the basis of the construction and maintenance of economic and security arrangements in this region. It explains how these arrangements have been challenged by the occasionally testy ties between these two major Asian powers and explores their dynamic interactions in promoting their own agenda and ambitions, and obstructing that of the other's in contending for leadership of East Asia. In so doing, it highlights the complex interdependence and competitiveness of China and Japan, with careful observation from the United States. This book provides practical guidance for foreign policymaking in China, Japan and the United States, and makes theoretical inferences for the study of Sino-Japanese relations, regional integration and international relations generally.

Energy Conflicts studies energy in the landscape across gas and oil, wind, transmission and nuclear waste disposal. The authors are particularly interested in the conflicts that emerge from specific sites and proposals as well as how this unique land use plays out in terms of conflict and resolution across scales and jurisdictions while touching on broader issues of policy and values. Resolving Land and Energy Conflicts briefly explains the general context around the energy type; the impacts and conflicts that have arisen given this context; the role laws, rules and jurisdictions play in mitigating, resolving or creating more conflict; and the ways in which communication, collaboration and conflict resolution have been or could be used to ameliorate the conflicts that inevitably arise.
