Wild Animal Neighbors Ann Downer 2017-01-01 What would you do if you found an alligator in your garage? Or if you spotted a mountain lion downtown? In cities and suburbs around the world, wild creatures are showing up where we least expect them. Not all of them arrive by accident, and some are here to stay. As the human population tops seven billion, animals are running out of space. Their natural habitats are surrounded—and sometimes even replaced—by highways, shopping centers, office parks, and subdivisions. The result? A wildlife invasion of our urban neighborhoods. What kinds of animals are making cities their new home? How can they survive in our ecosystem of concrete, steel, and glass? And what does their presence there mean for their future and ours? Join scientists, activists, and the folks next door on a journey around the globe to track down our newest wild animal neighbors. Discover what is bringing these creatures to our backyards—and how we can create spaces for people and animals to live side by side.

The Photo Ark Joel Sartore 2017 This lush book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals—especially those that are endangered. His powerful message, conveyed with humor, compassion, and art— to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits— from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the eloquent prose of veteran wildlife writer Douglas Chadwick, this book presents

a thought-provoking argument for saving all the species of our planet.

Tiger Attack Lisa Owings 2011-08-01 Tigers retract their claws but never their fury. Surprise them when they are eating or sleeping, and you'll likely become the meal and be put to sleep permanently! When it comes to the orange and black beast that is the tiger, it's best to show respect by keeping your distance. You sure don't want to be part of an attack story like those described in this book.

Lions on the Hunt Alicia Klepeis 2017-11 "How do lions hunt? How do they interact with other lions? Discover the answers to these questions and learn other fascinating facts about lions' habitat, physical characteristics, and behavior."

National Geographic Kids Everything Big Cats Elizabeth Carney 2011 Photographs and easy-to-follow text introduce students to different types of big cats, including tigers, lions, and leopards.

Exploring the World of Cougars Tracy C. Read 2011 Introduces the physical characteristics, behaviors, and family life of cougars.

Mission: Wolf Rescue Kitson Jazyanka 2014-04-08 A latest entry in the series that includes Lion Rescue shares real-life adventure stories, hands-on activities and engaging wolf facts while revealing what everyday kids can do to support wolf conservation efforts. Simultaneous.

The Prairie Dog's Town Miriam Aronin 2009-08-01 "Look inside to enter the subterranean world of the prairie dog's town. You'll discover how these small furry animals communicate, find food, and raise their young. Perhaps most interesting of all, you'll find out how they work together to build their perfect hideaways under the ground"--P. [4] of cover.

National Geographic Readers: Great Migrations Elephants Laura Marsh 2012-07-24 This exciting reader follows the story of the longest and the most demanding elephant migration on the planet. Living at the furthest corners of the hot and dry Sahara Desert, the very margins of where elephants can survive, hundreds of these great creatures make a dangerous but necessary journey as their main source of food and water dries up and they must go in search of more. Battling 120-degree heat, sandstorms, and fierce thunderstorms, these amazing animals travel 35 miles a day in a race against time in search of the bare essentials of life. National Geographic supports K-12 educators with ELA Common Core Resources. Visit www.natgeoed.org/commoncore for more information.

Polar Bears Laura Marsh 2013 Presents an introduction to polar bears, describing their habitat, physical characteristics, life cycle, eating habits, and behaviors, and looks at the life of a polar bear cub.

Snake Attack Lisa Owings 2011-08-01 Sometimes danger creeps at your feet, especially in the case of snakes. Many are completely harmless, but others can deliver a lethal bite or suffocating squeeze. Once a slithering serpent has a hold on you, it's nearly impossible to escape. Hear a couple gripping stories of survival while you sink your fangs into this title.

Mountain Lion Attack Lisa Owings 2011-08-01 Trespassing in mountain lion habitat is a dangerous idea. Mountain lions do not share their territory, and they will not hesitate to stalk, pounce, and bite to defend it. Read about people who are lucky to be alive after brutal battles with mountain lions.

Endangered Tigers Bobbie Kalman 2004 Introduces the anatomy, behavior, and life cycle of the five species of tigers, and discusses the cat family, the reasons they are endangered, and conservation efforts.

The Skull in the Rock Marc Aronson 2012 A collaboration by an award-winning author and the paleontologist renowned for the discovery of *Australopithecus sidiba* chronicles the riveting story behind one of the most significant archaeological discoveries of all time, explaining its significance for understanding human evolution and how it is shaping the thinking of the scientific community.

Thirteen Lessons that Saved Thirteen Lives John Volanthen 2021-06-01 Diver John Volanthen reveals how he pushed the limits of human endurance in the life-or-death mission to rescue the Thai youth soccer team trapped for over a week in a flooded cave. The world held its breath in 2018 when the Wild Boars soccer team and their coach went missing deep underground in the Tham Luang cave complex in northern Thailand. They had been stranded by sudden, continuous monsoon rains while exploring the caves after practice. As the torrential rain persisted and the waters continued to rise, an army of rescue teams and equipment was deployed, including Thai Navy SEALs, a US Air Force special tactics squadron, police sniffer dogs, drones and robots. But it was British cave diver John Volanthen and his partner, Rick Stanton, who were first to reach the stranded team and who played a key role in their ultimate rescue. The picture of them alive on a ledge in a flooded cave made front page news worldwide. As John's light flickered from one boy to another, he called out, 'How many of you?' 'Thirteen,' a boy answered. 'Brilliant,' he said. After 10 days trapped in desperate blackness, the boys and their coach were all alive. Each chapter of *Thirteen Lessons that Saved Thirteen Lives* tells one part of the edge-of-your-seat mission from Tham Luang but also imparts a life lesson, gleaned from John's previous rescues and record-breaking cave dives, that can be applied to everyday obstacles and challenges. In this story of breathtaking courage and mental mastery, John reveals how responding positively to the statement, 'But I can't...' by stating, 'I can,' led to one of the most incredible rescues in history. He hopes that his story will inspire the superhero in you.

National Geographic Kids Ruth Musgrave 2011 "In Everything Sharks, exciting photos depict great whites, hammerheads, and more. Scientists tell hair-raising

tales about encounters. With its awesome facts and action-packed images, this book brings kids close to the mysterious lives of sharks."--Amazon.com.

Polar Bears Norbert Rosing 2010 Photographs and captions present the life of polar bears across the four seasons of the year. Topics covered include habitat activities, diet, anatomy, and survival.

The Pudding Problem Joe Berger 2017-05-09 A boy must untangle the web of lies he's created in order to prove his innocence in this humorous and cheeky illustrated middle grade novel that's perfect for "fans of Timmy Failure and Big Nate" (Kirkus Reviews). Sam Lyttle is prone to stretching the truth. Most of his lies are harmless; tall tales and the product of an overactive imagination. So when Sam is summoned to explain a strange discovery—a ping-pong ball in a jar of peanut butter—and denies involvement, no one believes him. Then more seemingly unrelated peculiarities emerge, and Sam categorically denies any knowledge of those, too. In between these mysterious accusations, and with evidence mounting against him, Sam ruminates on the different sorts of lies he has told using examples from his past. Meanwhile, two pounds of potatoes wind up in the washing machine. Sam comes to a decision: he decides it is time to come clean about this latest tangled web. He gathers his family to hear the truth. The whole truth. Or is it? Could it be that this final "truth" is, in fact, another lie?

Bengal Tigers Lyn A. Sirota 2010-01-01 "Simple text and photographs present Bengal tigers, how they look, where they live, and what they do"--Provided by publisher.

Top 10: Dads Virginia Loh-Hagan 2016-08-01 Dive into the Wild Wicked Wonderful world of the animal kingdom with the Top 10: Dads. Written with a high interest level to appeal to a more mature audience and a lower level of complexity with clear visuals to help struggling readers along. Considerate text includes tons of fascinating information and wild facts that will hold the readers' interest, allowing for successful mastery and comprehension. A table of contents, glossary with simplified pronunciations, and index all enhance comprehension.

Dinosaurs Kathleen Weidner Zoehfeld 2011 Introduces dinosaurs, including how scientists know they existed, what they ate, how they cared for their young, and what the descendants of dinosaurs may look like today.
