The Evolution of U.S. Military Policy from the Constitution to the Present, Volume IV M Wade Markel 2020-06-23 Tracing the evolution of the U.S. Army throughout American history, the authors of this four-volume series show that there is no such thing as a “traditional” U.S. military policy. Rather, the laws that authorize, empower, and govern the U.S. armed forces emerged from long-standing debates and a series of legislative compromises between 1903 and 1940. Volume IV traces how Total Force Policy has been implemented since 1970.

Index to Proceedings of the Security Council: Seventy-fourth Year, 2019 Department of Global Communications 2020-10-17 The Index to Proceedings of the Security Council is a bibliographic guide to the proceedings and documentation of the Security Council. This issue covers the seventy-fourth year of the Council including its commissions, committees and ad hoc committees. The Index is prepared by the Dag Hammarskjöld Library, Department of Global Communications, as one of the products of the United Nations Bibliographic Information System (UNBIS).

Rhetoric and Reality on the U.S.-Mexico Border K. Jill Fleuriet 2021-04-03 Stemming from four years of ethnographic research, media analysis of over 750 national news articles published in the 2010s, and decades of the author’s professional and personal immersion in the Rio Grande Valley of south Texas, Rhetoric and Reality illuminates a place at the heart of our national conversation: the U.S.-Mexico border. K. Jill Fleuriet contrasts the rhetoric of national political and media discourse with that of local border leaders in economics, health care, politics, education, law enforcement, philanthropy, and activism. As she deconstructs the common narrative of a border in need of external intervention to control corruption, poverty, sickness, and violence, Fleuriet engagingly illustrates the range of regional organizing, local development strategies, and community responses in the borderlands that ultimately situate the Rio Grande Valley as the “true North” of the U.S. national compass—where the Valley goes, the rest of the country soon will follow. Rhetoric and Reality asks us to question our own assumptions, especially about those areas that drive national decisions about resource allocation, economic development and national security. “Rhetoric and Reality is an important ethnographic study of the deeply misunderstood, increasingly vilified, Rio Grande Valley located on the Texas-Mexico border. Fleuriet presents a balanced counter-narrative that that shows the region as one of growth, innovation, complexity, and rich with meaning. Rhetoric and Reality is an excellent example of place-based, reflexive scholarship appropriate for use

in courses on border theory, applied anthropology, and research methods. Written clearly and crisply with a wide readership in mind, Rhetoric and Reality is mandatory reading for those wanting to better understand the US-Mexico border region and the people who live there." --Margaret A. Graham, Professor and Chair, The University of Texas Rio Grande Valley, USA "This is an important book, as it describes life in the Rio Grande Valley rather than 'on the border.' The notion of 'the border' as an open range in need of external help is challenged, as the author illustrates the wide range of leadership and programmatic change occurring in the Rio Grande Valley." --Roberto R. Alvarez, Professor Emeritus of Ethnic Studies, University of California, San Diego, USA

**Fidelis** Teresa Fazio 2020-09-01 In 1998 Teresa Fazio signed up for the Marine Corps' ROTC program to pay her way through MIT. After the United States was attacked on September 11, 2001, leading to the War on Terror, she graduated with a physics degree into a very different world, owing the Marines four years of active duty. At twenty-three years old and five foot one, Fazio was the youngest and smallest officer in her battalion; the combined effect of her short hair, glasses, and baggy camo was less Hurt Locker than Harry Potter Goes to War. She cut an incongruous figure commanding more experienced troops in an active war zone, where vulnerability was not only taboo but potentially lethal. In this coming-of-age story set in the early days of Operation Iraqi Freedom, Fazio struggles with her past, her sense of authority, and her womanhood. Anger stifles her fear and uncertainty. A forbidden affair placates her need for love and security. But emptiness, guilt, and nightmares plague Fazio through her deployment—and follow her back home.

The Afghanistan Papers Craig Whitlock 2021-08-31 A Washington Post Best Book of 2021 The #1 New York Times bestselling investigative story of how three successive presidents and their military commanders deceived the public year after year about America's longest war, foreshadowing the Taliban's recapture of Afghanistan, by Washington Post reporter and three-time Pulitzer Prize finalist Craig Whitlock. Unlike the wars in Vietnam and Iraq, the US invasion of Afghanistan in 2001 had near-unanimous public support. At first, the goals were straightforward and clear: defeat al-Qaeda and prevent a repeat of 9/11. Yet soon after the United States and its allies removed the Taliban from power, the mission veered off course and US officials lost sight of their original objectives. Distracted by the war in Iraq, the US military become mired in an unwinnable guerrilla conflict in a country it did not understand. But no president wanted to admit failure, especially in a war that began as a just cause. Instead, the Bush, Obama, and Trump administrations sent more and more troops to Afghanistan and repeatedly said they were making progress, even though they knew there was no realistic prospect for an outright victory. Just as the Pentagon Papers changed the public's understanding of Vietnam, The Afghanistan Papers contains "fast-paced and vivid" (The New York Times Book Review) revelation after revelation from people who played a direct role in the war from leaders in the White House and the Pentagon to soldiers and aid workers on the front lines. In unvarnished language, they admit that the US government's strategies were a mess, that the nation-building project was a colossal failure, and that drugs and corruption gained a stranglehold over their allies in the Afghan government. All told, the account is based on interviews with more than 1,000 people who knew that the US government was

presenting a distorted, and sometimes entirely fabricated, version of the facts on the ground. Documents unearthed by The Washington Post reveal that President Bush didn't know the name of his Afghanistan war commander—and didn't want to meet with him. Secretary of Defense Donald Rumsfeld admitted that he had “no visibility into who the bad guys are.” His successor, Robert Gates, said: “We didn't know jack shit about al-Qaeda.” The Afghanistan Papers is a “searing indictment of the deceit, blunders, and hubris of senior military and civilian officials” (Tom Bowman, NRP Pentagon Correspondent) that will supercharge a long-overdue reckoning over what went wrong and forever change the way the conflict is remembered.

**Assessment of the Department of Veterans Affairs Airborne Hazards and Open Burn Pit Registry** National Academies of Sciences, Engineering, and Medicine 2017-03-28 Military operations produce a great deal of trash in an environment where standard waste management practices may be subordinated to more pressing concerns. As a result, ground forces have long relied on incineration in open-air pits as a means of getting rid of refuse. Concerns over possible adverse effects of exposure to smoke from trash burning in the theater were first expressed in the wake of the 1990–1991 Gulf War and stimulated a series of studies that indicated that exposures to smoke from oil-well fires and from other combustion sources, including waste burning, were stressors for troops. In January 2013, Congress directed the Department of Veterans Affairs (VA) to establish and maintain a registry for service members who may have been exposed to toxic airborne chemicals and fumes generated by open burn pits. Assessment of the Department of Veterans Affairs Airborne Hazards and Open Burn Pit Registry analyzes the initial months of data collected by the registry and offers recommendations on ways to improve the instrument and best use the information it collects. This report assesses the effectiveness of the VA's information gathering efforts and provides recommendations for addressing the future medical needs of the affected groups, and provides recommendations on collecting, maintaining, and monitoring information collected by the VA's Airborne Hazards and Open Burn Pit Registry.

Mandated Benefits Compliance Guide 2015 Balser Group 2014-12-01 Mandated Benefits 2015 Compliance Guide is a comprehensive and practical reference manual covering key federal regulatory issues that must be addressed by human resources managers, benefits specialists, and company executives in all industries. *Parent-Child Separation* Jennifer E. Glick 2021-11-26 This book examines the similarities in children's short- and long-term development and adjustment when they have been separated from their parents because of larger institutional forces. It addresses the unique circumstances and the similarities faced by parents and children under three different institutional contexts of separation: parental migration and deportation, parental incarceration, and parental military deployment. Chapters describe the difficulties faced by families in each of these circumstances, along with the challenges in conducting research under the multidimensional and dynamic complexities of parent-child separation. Finally, the volume offers recommendations for creating supportive structures and interventions for families facing separation that can bolster youth well-being in childhood and beyond. Featured areas of coverage include: · Parental migration. · Parental incarceration. · Parental military deployment. · Undocumented migration and deportation. · Child-parent relationship and child resilience and adjustment. *Parent-Child Separation* is a must-have resource for researchers, professors, clinicians, professionals, and graduate students in developmental psychology, family studies, public health, clinical social work, educational policy, and migration studies as well as all interrelated disciplines, including sociology, criminology, demography, prevention science, political science, and economics.

*Battle Focused Training (FM 7-1)* Department of the Army 2012-09-30 *Battle Focused Training, FM 7-1*, is the Army's doctrinal foundation for how to train, and it is applicable to all units and organizations of the Army. It explains how the Army assesses, plans, prepares, and executes training and leader development; it is critical to all the Army does. The goal of this manual is to create leaders who know how to think and apply enduring training principles to their units and organizations. FM 7-0 introduces the training cycle, the

linkage of Army training and leader development, and the three domains where training occurs—the operational, institutional, and self-development domains. FM 7-1 defines The Army Training System, outlines who is responsible for training and training support, and describes how to conduct training. This top-to-bottom understanding of training—ranging from policy and resources allocation at Headquarters, Department of the Army to unit and organization methods—is critical to executing training successfully and to linking the three domains where training occurs. The training doctrine in this manual will shape Army training regulations and support unit and organization training plans. The emphasis is on teaching leaders to think through the training process, as opposed to simply following a prescribed method. There is no training model or strategy that can achieve warfighting readiness in a unit without intensive leadership to build both competence and confidence. FM 7-1 builds on task, condition, and standards-based training. Knowing the task, assessing the level of proficiency against the standard, and developing a sustaining or improving training plan is the essence of all Army training and development. But warfighting readiness is about more than just technical competence. It is about developing confidence through trust—soldier-to-soldier, leader-to-led, and unit-to-unit—and the will to succeed. It is about leadership. Understanding how to conduct tough, realistic training at every echelon of the Army sets the foundation for successful multi echelon, joint, interagency, and coalition operations. Leaders train the unit and organizational capabilities required to fight and win across the full spectrum of operations. This manual provides leaders with the doctrinal guidelines for how to train, and is the basis for successful training and operations. Soldiers have never let the nation fail—it is essential to train soldiers and units to uphold the Army's nonnegotiable contract with the American people—to fight and win the nation's wars, decisively.

**Respiratory Health Effects of Airborne Hazards Exposures in the Southwest Asia Theater of Military Operations** National Academies of Sciences, Engineering, and Medicine 2020-10-23 More than 3.7 million U.S. service members have participated in operations taking place in the Southwest Asia Theater of Military Operations since 1990. These operations include the 1990-1991 Persian Gulf War, a post-war stabilization period spanning 1992 through September 2001, and the campaigns undertaken in the wake of the September 11, 2001, attacks. Deployment to Iraq, Kuwait, Saudi Arabia, Bahrain, Gulf of Aden, Gulf of Oman, Oman, Qatar, the United Arab Emirates, and Afghanistan exposed service members to a number of airborne hazards, including oil-well fire smoke, emissions from open burn pits, dust and sand suspended in the air, and exhaust from diesel vehicles. The effects of these were compounded by stressors like excessive heat and noise that are inevitable attributes of service in a combat environment. **Respiratory Health Effects of Airborne Hazards Exposures in the Southwest Asia Theater of Military Operations** reviews the scientific evidence regarding respiratory health outcomes in veterans of the Southwest Asia conflicts and identifies research that could feasibly be conducted to address outstanding questions and generate answers, newly emerging technologies that could aid in these efforts, and organizations that the Veterans Administration might partner with to accomplish this work.

**Strengthening the Military Family Readiness System for a Changing American Society** National Academies of Sciences, Engineering, and Medicine 2019-10-25 The U.S. military has been continuously engaged in foreign conflicts for over

two decades. The strains that these deployments, the associated increases in operational tempo, and the general challenges of military life affect not only service members but also the people who depend on them and who support them as they support the nation " their families. Family members provide support to service members while they serve or when they have difficulties; family problems can interfere with the ability of service members to deploy or remain in theater; and family members are central influences on whether members continue to serve. In addition, rising family diversity and complexity will likely increase the difficulty of creating military policies, programs and practices that adequately support families in the performance of military duties. Strengthening the Military Family Readiness System for a Changing American Society examines the challenges and opportunities facing military families and what is known about effective strategies for supporting and protecting military children and families, as well as lessons to be learned from these experiences. This report offers recommendations regarding what is needed to strengthen the support system for military families.

American Military Life in the 21st Century: Social, Cultural, and Economic Issues and Trends [2 volumes] Eugenia L. Weiss 2018-11-30 A comprehensive guide to the lives and experiences of military service members, veterans, and their families in the United States today, with special emphasis given to those of the post-9/11 era. • Provides readers with a current understanding of the experiences of U.S. service members, veterans, and their families in the post-9/11 era of combat operations in Iraq and Afghanistan • Examines issues pertinent to minority populations in the military and delineates health and mental health issues that affect all combat service members, summarizing evidence-based interventions and access to care • Provides firsthand perspectives and experiences of military-connected families and children • Analyzes societal costs and supports for building military-civilian community connections, including in the transition

**Twelve O'Clock Haiku** Randy Brown 2022-09-18 In a cheeky critique of the classic American airpower narrative "Twelve O'Clock High," award-winning soldier-poet, essayist, and humorist Randy Brown explores what it means to be a leader or follower at war—morally, physically, and psychologically. The book is packed full of insights into military life, as viewed through the lenses of war movies, history, and the author's experiences as a one-time U.S. Army-trained "lessons-learned analyst." "I started out to write 12 haiku poems about a favorite old war movie," says the author, "but my 'whimsical experiment in minimalist war poetry' mutated into a 'maximum effort' mix of memory, media, and military culture!" TWELVE O'CLOCK HAIKU: Life-Lessons in Leadership from War Poems & Films now comprises poems both old and new, a lyric essay about the film, and a list of resources for enthusiasts of World War II bomber poetry, history, and movies. Brown first encountered the 1949 movie when on temporary duty as a U.S. Army citizen-soldier. Whether as a novel, film, or late-1960s television series, the "Twelve O'Clock High" franchise continues to be a touchstone in 21st century Professional Military Education (PME) and business-class discussions about transformative leadership, management techniques, moral injury, and veterans' healing.

**Handbook on Human Security, Borders and Migration** Natalia Ribas-Mateos 2021-02-26 Drawing on the concept of the 'politics of compassion', this Handbook interrogates the political, geopolitical, social and anthropological

processes which produce and govern borders and give rise to contemporary border violence.

Returning Home from Iraq and Afghanistan Institute of Medicine 2010-03-31  
Nearly 1.9 million U.S. troops have been deployed to Afghanistan and Iraq since October 2001. Many service members and veterans face serious challenges in readjusting to normal life after returning home. This initial book presents findings on the most critical challenges, and lays out the blueprint for the second phase of the study to determine how best to meet the needs of returning troops and their families.

#### **Indiana Guardsman** 1991

The Civilian Lives of U.S. Veterans: Issues and Identities [2 volumes] Louis Hicks 2016-12-05 In this book, 50 experts study the lives of U.S. veterans at work, at home, and in American society as they navigate issues regarding health, gender, public service, substance abuse, and homelessness. • Considers the changing demographics of U.S. veterans as compared to previous generations of military personnel • Shows the impact that veterans are having on federal, state, and local government organizations • Describes how servicemembers transition from active duty to veteran status • Includes cross references for ease of use

**Childhood Development and Behavior, An Issue of Pediatric Clinics of North America, E-Book** Kathy Davis 2016-08-26 Pediatricians care for children and families from all walks of life. Some are children known from neighborhoods. Others are children from distant lands. Pediatric focus does not stop with the physical care of children but extends to include their mental and social-emotional health and concern about their families. Pediatricians care about how children are doing at home, at school, and in their communities. In this era, children and their families are impacted by social and political changes in their homes (social media and screen time), in their communities (refugee populations and children requiring palliative supports at school), in their health care networks (EMR in every tertiary pediatric center), and in the larger world (multiple military deployments of fathers and mothers). This issue explores the impact of contemporary public health challenges for pediatric care, promising models for caring for chronically ill children, and state of the art therapies for complex childhood conditions.

**Parenting and Children's Resilience in Military Families** Abigail H. Gewirtz 2016-06-10 This reference examines the wide-ranging impact of military life on families, parenting, and child development. It examines the complex family needs of this diverse population, especially as familiar issues such as trauma, domestic violence, and child abuse manifest differently than in civilian life. Expert contributors review findings on deployed mothers, active-duty fathers, and other military parents while offering evidence for interventions and prevention programs to enhance children's healthy adjustment in this highly structured yet uncertain context. Its emphasis on resource and policy improvements keeps the book focused on the evolution of military families in the face of future change and challenges. Included in the coverage: Impacts of military life on young children and their parents. Parenting school-age children and adolescents through military deployments. Parenting in military families faced with combat-related injury, illness, or death. The special case of civilian service members: supporting parents in the National Guard and Reserves. Interventions to support and strengthen parenting in military

families: state of the evidence. Military parenting in the digital age: existing practices, new possibilities. Addressing a major need in family and parenting studies, *Parenting and Children's Resilience in Military Families* is necessary reading for scholars and practitioners interested in parenting and military family research.

**Growing Up in Armyville** Deborah Harrison 2016-10-29 It was 2006, and eight hundred soldiers from the Canadian Armed Forces (CAF) base in pseudonymous "Armyville," Canada, were scheduled to deploy to Kandahar. Many students in the Armyville school district were destined to be affected by this and several subsequent deployments. These deployments, however, represented such a new and volatile situation that the school district lacked—as indeed most Canadians lacked—the understanding required for an optimum organizational response. *Growing Up in Armyville* provides a close-up look at the adolescents who attended Armyville High School (AHS) between 2006 and 2010. How did their mental health compare with that of their peers elsewhere in Canada? How were their lives affected by the Afghanistan mission—at home, at school, among their friends, and when their parents returned with post-traumatic stress disorder? How did the youngsters cope with the stress? What did their efforts cost them? Based on questions from the National Longitudinal Survey of Children and Youth, administered to all youth attending AHS in 2008, and on in-depth interviews with sixty-one of the youth from CAF families, this book provides some answers. It also documents the partnership that occurred between the school district and the authors' research team. Beyond its research findings, this pioneering book considers the past, present, and potential role of schools in supporting children who have been affected by military deployments. It also assesses the broader human costs to CAF families of their enforced participation in the volatile overseas missions of the twenty-first century.

**Parenting from Afar and the Reconfiguration of Family Across Distance** Maria Rosario T. De Guzman 2018 An increasing number of families around the world are now living apart from one another, subsequently causing the defining and redefining of their relationships, roles within the family unit, and how to effectively maintain a sense of familial cohesion through distance. Edited by Maria Rosario T. de Guzman, Jill Brown, and Carolyn Pope Edwards, *Parenting From Afar and the Reconfiguration of Family Across Distance* uniquely highlights how families—both in times of crisis and within normative cultural practices—organize and configure themselves and their parenting through physical separation. In this volume, readers are given a unique look into the lives of families around the world that are affected by separation due to a wide range of circumstances including economic migration, fosterage, divorce, military deployment, education, and orphanhood. Contributing authors from the fields of psychology, anthropology, sociology, education, and geography all delve deep into the daily realities of these families and share insight on why they live apart from one another, how families are redefined across long distances, and the impact absence has on various members within the unit. An especially timely volume, *Parenting From Afar and the Reconfiguration of Family Across Distance* offers readers an important understanding and examination of family life in response to social change and shifts in the caregiving context.

*Police Psychology and Its Growing Impact on Modern Law Enforcement* Mitchell, Cary L. 2016-09-12 Police psychology has become an integral part of present-day police agencies, providing support in the areas of personnel assessment, individual and organizational intervention, consultation, and operational assistance. Research-based resources contribute to those efforts by shedding

light on best practices, identifying recent research and developments, and calling attention to important challenges and growth areas that remain. *Police Psychology and Its Growing Impact on Modern Law Enforcement* emphasizes key elements of police psychology as it relates to current issues and challenges in law enforcement and police agencies. Focusing on topics relevant to assessment and evaluation of applicants and incumbent officers, clinical intervention and prevention, employee wellness and support, operational consultation, and emerging trends and developments, this edited publication is an essential reference source for practicing police psychologists, researchers, graduate-level students, and law enforcement executives.

Mercenaries and War National Defense University Press 2019-12-18 Mercenaries are more powerful than experts realize, a grave oversight. Those who assume they are cheap imitations of national armed forces invite disaster because for-profit warriors are a wholly different genus and species of fighter. Private military companies such as the Wagner Group are more like heavily armed multinational corporations than the Marine Corps. Their employees are recruited from different countries, and profitability is everything. Patriotism is unimportant, and sometimes a liability. Unsurprisingly, mercenaries do not fight conventionally, and traditional war strategies used against them may backfire.

**So Frag & So Bold** Randy Brown 2021-11 "Every poet," warns Randy Brown, "has a heart filled / with shrapnel." In his new chapbook "So Frag & So Bold," the former U.S. Army "brigade staff jester" takes aim at endless wars, parent traps, social media, and stodgy religions. It's an iconoclastic cluster-munition that's bursting with more than 60 haiku, aphorisms, and typographic gadgets. Brown's careful constructions of line-breaks and language are intended to variously provoke chuckles, surprise, and expansive thoughts. "Any poem is a device," he writes, "improvised to explode with meaning [...] ignited by a trigger / word." Prepare for amusement, bemusement, and plenty of pyrotechnics!

*The Routledge Handbook of Family Communication* Anita L. Vangelisti 2021-12-28 This third edition again brings together interdisciplinary contributions to provide a comprehensive and multifaceted resource that reflects the breadth and depth of research on family communication and family relationships. Chapters continue to address theoretical and methodological issues influencing current conceptions of family and cover communication occurring in a variety of family forms and across social, cultural, and physical contexts. This third edition includes key updates, such as: The use and influence of social media and technology in families Parenting and communication in culturally and structurally diverse families Communication and physical health of family members Managing personal information about difficult topics in families The influence of the COVID-19 pandemic on family members This handbook is ideal for students and researchers interested in interpersonal and family communication, relationships, and family therapy within the disciplines of communication, social psychology, clinical psychology, sociology, and family studies.

**The Whirlwind War** Frank N. Schubert 1995 CMH Publication 70-30. Edited by Frank N. Schubert and Theresa L. Kraus. Discusses the United States Army's role in the Persian Gulf War from August 1990 to February 1991. Shows the various strands that came together to produce the army of the 1990s and how that army in turn performed under fire and in the glare of world attention. Retains a sense of immediacy in its approach. Contains maps which were carefully researched and compiled as original documents in their own right. Includes an index.

**Long-Term Health Consequences of Exposure to Burn Pits in Iraq and Afghanistan**  
Institute of Medicine 2011-10-31 Many veterans returning from the conflicts in Iraq and Afghanistan have health problems they believe are related to their exposure to the smoke from the burning of waste in open-air "burn pits" on military bases. Particular controversy surrounds the burn pit used to dispose of solid waste at Joint Base Balad in Iraq, which burned up to 200 tons of waste per day in 2007. The Department of Veterans Affairs asked the IOM to form a committee to determine the long-term health effects from exposure to these burn pits. Insufficient evidence prevented the IOM committee from developing firm conclusions. This report, therefore, recommends that, along with more efficient data-gathering methods, a study be conducted that would evaluate the health status of service members from their time of deployment over many years to determine their incidence of chronic diseases.

**Welcome to FOB Haiku** Randy Brown 2015-11-13 "Sherpatude no. 26: 'Humor is a combat multiplier ...' Has your war become workaday? Does life on the Forward Operating Base (FOB) now seem commonplace? Armed with deadpan snark and poker-faced patriotism -- and rooted in the coffee-black soil and plain-spoken voice of the American Midwest -- journalist-turned-poet Randy Brown reveals behind-the-scenes stories of U.S. soldier-citizenship. From Boot Camp to Bagram, Afghanistan. And back home again." --

Handbook of Parenting Marc H. Bornstein 2019-02-01 This highly anticipated third edition of the Handbook of Parenting brings together an array of field-leading experts who have worked in different ways toward understanding the many diverse aspects of parenting. Contributors to the Handbook look to the most recent research and thinking to shed light on topics every parent, professional, and policymaker wonders about. Parenting is a perennially "hot" topic. After all, everyone who has ever lived has been parented, and the vast majority of people become parents themselves. No wonder bookstores house shelves of "how-to" parenting books, and magazine racks in pharmacies and airports overflow with periodicals that feature parenting advice. However, almost none of these is evidence-based. The Handbook of Parenting is. Period. Each chapter has been written to be read and absorbed in a single sitting, and includes historical considerations of the topic, a discussion of central issues and theory, a review of classical and modern research, and forecasts of future directions of theory and research. Together, the five volumes in the Handbook cover Children and Parenting, the Biology and Ecology of Parenting, Being and Becoming a Parent, Social Conditions and Applied Parenting, and the Practice of Parenting. Volume 3, Being and Becoming a Parent, considers a large cast of characters responsible for parenting, each with her or his own customs and agenda, and examines what the psychological characteristics and social interests of those individuals reveal about what parenting is. Chapters in Part I, on The Parent, show just how rich and multifaceted is the constellation of children's caregivers. Considered first are family systems and then successively mothers and fathers, coparenting and gatekeeping between parents, adolescent parenting, grandparenting, and single parenthood, divorced and remarried parenting, lesbian and gay parents and, finally, sibling caregivers and nonparental caregiving. Parenting also draws on transient and enduring physical, personality, and intellectual characteristics of the individual. The chapters in Part II, on Becoming and Being a Parent, consider the intergenerational transmission of parenting, parenting and contemporary reproductive technologies, the transition to parenthood, and stages of parental development, and then chapters turn to parents' well-being, emotions, self-efficacy, cognitions, and attributions as well as socialization, personality in

parenting, and psychoanalytic theory. These features of parents serve many functions: they generate and shape parental practices, mediate the effectiveness of parenting, and help to organize parenting.

**Bristol's Bastards** Nick Maurstad 2008-11-15 DIV Minnesotaâ€™s toughest farm boys take on Iraqi insurgents in one of the most irreverent and outrageous memoirs to come out of the war Bravo Company, 2nd Battalion, 136th Infantry Regiment of the Minnesota National Guard, composed in large part of farm kids from the Midwest who could replace a tank track on the side of the road using nothing but a crescent wrench, Zippo lighter, and a two-by-four, fought alongside the Marine Corps in Anbar province through the deadliest period of Operation Iraqi Freedom. Bravo Company earned the nickname â€œBristolâ€™s Bastardsâ€ after USMC Colonel George Bristol, commanding officer of the I MEF Headquarters Group, adopted this band of fierce warriors as one of his own. Specialist Nick Maurstad, a member of Bristolâ€™s Bastards, brings to life the experience of fighting in Iraq, kicking down doors, dodging IEDs, battling insurgents in the small towns surrounding Fallujah, and trying to help one another survive in the deadliest place on earth. Maurstad lost three friends in Iraq, and a friendly demeanor belies his own frustrations. He has intense memories, such as disarming an insurgent who was raising a handgun to shoot while in bed with his wife and children. . . . His mental hurdle for now is visiting the graves of the friends he lost. â€”St. Paul Pioneer Press, October 28, 2007 /div

*Success in the Shadows* Combat Studies Institute Press 2019-07-08 Written by a reserve officer who spent a tour in the Philippines producing a classified history for US Special Operations Command, this first-ever publicly available history of OEF-P provides both a detailed accounting of the operation's successes and a model for trainers and advisers providing assistance to host-nation security forces around the globe. Stentiford emphasizes that what made OEF-P a success was an adherence to time-honored principles of counterinsurgency: insisting that host-nation forces take the lead and conducting operations with a minimal footprint that bought the essential time for the mission to succeed. *Success in the Shadows* is both a fitting tribute to the operators who performed this vital mission and a primer for those who will be called upon to do so in the future.

**Private Soldiers** Benjamin Buchholz 2007 "Private Soldiers chronicles the 2-127th's year-long deployment from the unique perspective of the soldiers themselves. Written and photographed by three battalion members, the book provides a rare first-hand account of war and life in Iraq. Fascinating soldier interviews reveal the effects of deployment on the troops and on their families back home, and interviews with Iraqi civilians describe the Iraqis' perceptions of life, war, and working alongside Wisconsin troops. Brilliant photography illuminates the 2-127th's year, from training to "boots on the ground" to their return home. And candid photos taken by battalion members capture the soldiers' day-to-day lives and camaraderie."--BOOK JACKET.
