How to Read a Nautical Chart Nigel Calder 2002-08-05 The best handbook on chart usage, from one of the most trusted names in boating In 2000, the U.S. government ceased publication of Chart No. 1, the invaluable little book that generations of mariners have consulted to make sense of the complex system of signs, symbols, and graphic elements used in nautical charts. Now Chart No. 1 is not just reborn but expanded and improved in *How to Read a Nautical Chart*. The demand for a book like this has never been greater. Arranged and edited by Nigel Calder, one of today's most respected boating authors, --and containing four-color illustrations throughout,-- *How to Read a Nautical Chart* presents a number of original features that help readers make optimum use of the data found in Chart No. 1, including a more intuitive format, crucial background information, international chart symbol equivalents, electronic chart symbology, and thorough explanations of the practical aspects of nautical chart reading.

**Best Boats to Build Or Buy** Ferenc Maté 1982 Lovingly written and beautifully photographed, Best Boats is an evaluation of the most elegantly designed and best-built sailboats in stages—from a bare hull to a finished yacht. In addition to evaluating overall design, performance and layout, this book, like no other, analyses how and how well the boats are built. Ranging from the ageless Herreshoff day-sailer to the ultra-light Santa Cruz flyers, the book features some of the finest works of designers such as German Frers, Chuck Paine, Bill Crealock, Doug Peterson, Lyle Hess, and others. Even more importantly, it contains interviews with legendary builders such as Tom Morris, the Cherubinis, Cecil Lange, and Tom Dreyfus. Using the surveyed boats as examples, Maté; shows what to look for when contemplating the purchase of any sailboat. For the boatbuilder, it points out the weaknesses and strengths of all aspects of construction, using hundreds of photographs and illustrations to clarify.

*Sea Kayaking* John Dowd 2015-04-20 Still regarded as "the bible" for both new and experienced kayakers after more than thirty years in print, *Sea Kayaking* covers the basics of equipment and technique, including types of paddles and strokes, as well as such essential skills as how to read the weather and the water, how to navigate with and without GPS and how to travel with a group. Drawing on his many years of experience paddling in all climates, John Dowd presents practical advice on dealing with potential hazards (from surf to sea ice to sharks), carrying out rescues and planning for long-distance expeditions. New for this edition are hints about digital technologies for planning and navigating while kayak touring as well as lots of tips for outfitting boats, adapting equipment and finessing fishing technique while kayak angling—whether casting and jigging for fun on a day trip or trolling for dinner on a longer expedition. Also fully updated are the sections on managing risk and the inspiring stories of adventure, including Freya Hoffmeister's record-breaking circumnavigation of Australia and Japanese paddlers' increasingly challenging trips around the islands and beyond. As a sport, sea kayaking continues to evolve. Once the sport of a very few long-distance paddlers embarking on international expeditions, then the recreational pursuit of many weekend tourers, sea kayaking is now popular with many day trippers as well. As more and more paddlers take to the water—for the day, the weekend or many months, this classic guide continues to be required reading for those seeking adventure on the open ocean.

**The Boat Galley Cookbook: 800 Everyday Recipes and Essential Tips for Cooking Aboard** Carolyn Shearlock 2012-09-28 No matter what anyone tells you, boat cooking IS different from cooking ashore. The space is smaller, there's no grocery store 5 minutes away, you have fewer prepared foods and electric appliances, and food storage is much different. Despite cruising different oceans, we--Jan and Carolyn--both faced the same challenges: eating well while having time to enjoy all the other great aspects of cruising. We love to snorkel, swim, kayak, explore--and just sit and admire the view. We learned with the cookbooks we both had aboard, and wished for information that wasn't available--like when Jan ended up with a frozen chicken complete with head and feet and no instructions on how to cut it up. When we couldn't get foods such as sour cream, English muffins, spaghetti sauce or yogurt, we adapted recipes to make our own. Other times, we experimented with substituting ingredients--maybe the result wasn't identical, but it was still tasty. We ended up with over 150 substitutions and dozens of "make it yourself" options. As we traded recipes and knowledge with each other, we realized we were compiling

information that became *The Boat Galley Cookbook*: 800+ recipes made from readily-obtainable ingredients with hand utensils, including numerous choices to suit every taste: not just one cake but 20, 16 ways to prepare fish, 10 regional barbeque sauces, and so on. Step-by-step directions to give even "non-cooks" the confidence they can turn out tasty meals without prepared foods. Detailed instructions on unfamiliar things like making yogurt and bread, grilling virtually every food imaginable, preparing and cooking freshly-caught fish and seafood, cutting up and boning meat, cooking in a Thermos and baking on the stove top, as well as lots of tips on how to do things more easily in a tiny, moving kitchen. All this in an easy-to-navigate format including side tabs on the Contents to help you find your way and extensive cross reference lists at the end of each chapter. Quick Reference Lists provide idea starters: suggestions of included recipes for such categories as Mexican, Asian, and Potluck. *The Boat Galley Cookbook* is designed to help you every step of the way. We hope it becomes a trusted reference on your boat, and a source of many enjoyable meals.

*Cruising Guide to the Leeward Islands* Chris Doyle 1998 Fair winds and fine cruising is author Chris Doyle's wish for readers of this popular, newly updated guide to the 10 island nations of this enchanting Caribbean chain. Doyle's background in research makes this volume rich in practical details; yet its tone is conversational. His is also an intimate knowledge, gathered from more than 20 years of live-aboard Caribbean cruising on his Carib 41 Helos, a former charterboat. The Leewards are a cultural and topographic mix, and Doyle addresses them by geographical grouping. The Renaissance Islands (St. Martin, St. Barts and Anguilla), an economically strong bareboating enclave, offer short cruising passages and a wide choice of anchorages. The Islands That Brush the Clouds - a volcanic chain strung between Saba and Montserrat - present cruisers with a variety of channels and terrain. Most broadly strewn are the Islands of Mountains and Mangroves, a patchwork chiefly of rugged rainforest and exotic fauna, guarded in spots by spectacular reefs. The southern Leewards in particular have cried for reliable charting. Doyle provides aid throughout, using GPS coordinates, a trove of charts and color maps. All are cross-referenced with the newly released Caribbean Yachting Charts, exactly detailed and available through Cruising Guide Publications. Spectacular photographs add a visual feast. Onshore accommodations, transportation, communications, entertainment and provisioning are also addressed throughout the guide, and in an exhaustive directory by island and service type.

Computers have only existed for the last 60 years and computer networks for 40. Today, we find an industry with rich tradition, colliding with new types of threats, vulnerabilities, and exposures. This book explores cybersecurity aspects of the maritime transportation sector and the threat landscape that seeks to do it harm.
