Urban Operations U. S. Department of the Army 2013-01-17 Doctrine provides a military organization with a common philosophy, a language, a purpose, and unity of effort. Rather than establishing a set of hard and fast rules, the objective of doctrine is to foster initiative and creative thinking. To this end, FM 3-06 discusses major Army operations in an urban environment. This environment, consisting of complex terrain, a concentrated population, and an infrastructure of systems, is an operational environment in which Army forces will operate. In the future, it may be the predominant operational environment. Each urban operation is unique and will differ because of the multitude of combinations presented by the threat, the urban area itself, the major operation of which it may be part (or the focus), and the fluidity of societal

and geopolitical considerations. Therefore, there will always exist an innate tension between Army doctrine, the actual context of the urban operation, and future realities. Commanders must strike the proper balance between maintaining the capability to respond to current threats and preparing for future challenges. This manual provides the analytical tools for evaluating an urban operation to determine if the operation is necessary for overall mission success. It also provides the means to understanding and determining the impacts of the urban environment on military operations and provides information on managing, taking advantage of, and mitigating the effects of those impacts as appropriate. As such, this manual demonstrates how to apply the doctrinal principles in FM 3-0 to this unique environment.

Report of the Fort Hood Independent Review Committee United States. Fort Hood Independent Review Committee 2020-12-22 The U. S. Secretary of the Army appointed the Fort Hood Independent Review Committee(FHIRC or Committee) and directed it to "conduct a comprehensive assessment of the Fort Hoodcommand climate and culture, and its impact, if any, on the safety, welfare and readiness of ourSoldiers and units." In addressing this mandate, the FHIRC determined that during the time periodcovered by the Review, the command climate relative to the Sexual Harassment/Assault Responseand Prevention (SHARP) Program at Fort Hood was ineffective, to the extent that there was apermissive environment for sexual assault and sexual harassment.As set forth in this Report, specific

Findings demonstrate that the implementation of the SHARP Program was ineffective. During the review period, no Commanding General or subordinate echelon commander chose to intervene proactively and mitigate known risks of high crime, sexual assault and sexual harassment. The result was a pervasive lack of confidence in the SHARP Program and an unacceptable lack of knowledge of core SHARP components regarding reporting and certain victim services. Under a structurally weak and under-resourced III Corps SHARP Program, the Sexual Assault Review Board (SARB) process was primarily utilized to address administrative and not the actual substantive aspects of the Program. While a powerful tool by design, the SARB process became a missed opportunity to develop and implement proactive strategies to create a respectful culture and prevent and reduce incidents of sexual assault and sexual harassment. From the III Corps level and below, the SHARP Program was chronically under-resourced, due to understaffing, lack of training, lack of credentialed SHARP professionals, and lack of funding. Most of all, it lacked command emphasis where it was needed the most: the enlisted ranks. A resonant symptom of the SHARP Program's ineffective implementation was significant underreporting of sexual harassment and sexual assault. Without intervention from the NCOs and officers entrusted with their health and safety, victims feared the inevitable consequences of reporting: ostracism, shunning and shaming, harsh treatment, and indelible damage to their career. Many have left the Army or plan to do so at the earliest opportunity. As part of the command climate, the issues of crime and Criminal Investigation Division (CID) operations were examined. The Committee determined that serious crime issues on and off Fort Hood were neither identified nor addressed. There was a conspicuous absence of an effective risk management approach to crime incident reduction and Soldier victimization. A military installation is essentially a large, gated community. The Commander of a military installation possesses a wide variety of options to proactively address and mitigate the spectrum of crime incidents. Despite having the capability, very few tools were employed at Fort Hood to do so. Both the Directorate of Emergency Services (DES) and the CID have a mandate and a role to play in crime reduction. Each contributed very little analysis, feedback and general situational awareness to the command toward facilitating and enabling such actions. This was another missed opportunity. The deficient climate also extended into the missing Soldier scenarios, where no one recognized the slippage in accountability procedures and unwillingness or lack of ability of noncommissioned officers (NCOs) to keep track of their subordinates. The absence of any formal protocols for Soldiers who fail to report resulted in an ad hoc approach by units and Military Police (MP) to

effectively address instances of missing Soldiers during the critical first 24 hours, again with adverse consequences. Consistent with the FHIRC Charter, this Report sets forth nine Findings and offers seventy Recommendations.

IT Ethics Handbook: Stephen Northcutt 2004-06-11 The target audience for this book is any IT professional responsible for designing, configuring, deploying or managing information systems. This audience understands that the purpose of ethics in information security is not just morally important; it equals the survival of their business. A perfect example of this is Enron. Enron's ultimate failure due to a glitch in the ethics systems of the business created the most infamous example of an ethics corporate breakdown resulting in disaster. Ethics is no longer a matter of morals anymore when it comes to information security; it is also a matter of success or failure for big business. * This groundbreaking book takes on the difficult ethical issues that IT professionals confront every day. * The book provides clear guidelines that can be readily translated into policies and procedures. * This is not a text book. Rather, it provides specific guidelines to System Administrators, Security Consultants and Programmers on how to apply ethical standards to day-to-day operations.

Diversity, Inclusion, and Equal Opportunity in the Armed Services Kristy N. Kamarck 2017-10-24 Diversity, inclusion, and equal opportunity are three terms that are often used interchangeably; however, there are

some differences in how they are interpreted and applied between the Department of Defense (DOD) and civilian organizations. In the past few decades there have been rapid changes to certain laws and policies regarding diversity, inclusion, and equal opportunity in the Armed Forces. Since 2009, DOD policy changes and congressional actions have allowed individuals who are gay to serve openly with recognition for their same-sex spouses as dependents for the purpose of military benefits and opened all combat assignments to women. On June 30, 2016, DOD announced the end of restrictions on service for those transgender troops already openly serving. However, in August of 2017, President Donald J. Trump directed DOD to (1) continue to prohibit new transgender recruits, (2) review policies on existing transgender servicemembers, and (3) restrict spending on surgical procedures related to gender transition. Military manpower requirements derive from National Military Strategy and are determined by the military services based on the workload required to deliver essential capabilities. Some argue that to effectively deliver these capabilities a workforce with a range of backgrounds, skills and knowledge is required. Those who support broader diversity and equal-opportunity initiatives in the military contend that a more diverse force is a better performing and more efficient force. They point out that the nature of modern warfare has been shifting, requiring a range of new skills and competencies, and that these skills may be found in a more diverse cross-section of American youth. Some argue that historically underrepresented demographic groups continue to be at a disadvantage within the military and that efforts should be intensified to ensure equal opportunity for individuals in those groups. Some also contend that if the military is to remain competitive with private-sector employers in recruiting a skilled workforce, DOD should offer the same equal-opportunity rights and protections that civilian employees have. Others oppose the expansion of diversity to include non-traditional gender identification because they fear it would undermine military cohesion and effectiveness, and would not accurately reflect American society as a whole.

Strengthening the Military Family Readiness System for a Changing American Society National Academies of Sciences, Engineering, and Medicine 2019-10-25 The U.S. military has been continuously engaged in foreign conflicts for over two decades. The strains that these deployments, the associated increases in

operational tempo, and the general challenges of military life affect not only service members but also the people who depend on them and who support them as they support the nation and their families. Family members provide support to service members while they serve or when they have difficulties; family problems can interfere with the ability of service members to deploy or remain in theater; and family members are central influences on whether members continue to serve. In addition, rising family diversity and complexity will likely increase the difficulty of creating military policies, programs and practices that adequately support families in the performance of military duties. Strengthening the Military Family Readiness System for a Changing American Society examines the challenges and opportunities facing military families and what is known about effective strategies for supporting and protecting military children and families, as well as lessons to be learned from these experiences. This report offers recommendations regarding what is needed to strengthen the support system for military families.

Raven One Kevin Miller 2015-06-02 UNARMED OVER HOSTILE TERRITORY...For a moment Wilson froze and looked at the white-helmeted pilot who sat high on the nose of the colossal fighter. Across the small void, he saw the pilot's eyes peer over his mask. Dark, chilling eyes...Wilson kicked right rudder to slide closer and jam any chance for a bandit gunshot. When the bandit pulled all the way over, almost on its back but in control, he cursed in frustration at what he knew was coming next. The hostile fighter reversed over the top in a negative-g maneuver, his nose tracking down on Wilson like a falling sledgehammer in slow motion. Horrified, Wilson realized he faced an imminent snapshot. With the little air speed he had, he inverted his Hornet to avoid the attack. His aircraft still rolling and ruddering, Wilson saw that the monster had another weapon at its disposal...

Commander's Legal Handbook Judge Advocate General's Legal Center and School (United States. Army) 2012-06-15 This Handbook is designed to assist Army Commanders in taking proper immediate action when faced with a variety of legal issues that might arise during your command. The purpose of your actions should be to preserve the legal situation until you can consult with your servicing Judge Advocate. However, like most aspects of your command responsibilities, you can fail if you just wait for things to come to you. You need to be proactive in preventing problems before they occur. In the legal arena, this means establishing and enforcing high standards, ensuring your Soldiers are fully aware of those

standards and properly trained to comply with them. You must also properly train your Soldiers on all Army policies and higher level command standards so that they also understand and comply with them. Soldiers must also be well-versed in the Army Values and be able to apply those values to real-world situations, which will usually keep them well within legal bounds. The Noncommissioned Officer and Petty Officer National Defense University Press 2013-12 Full color publication with photographs. A first of its kind, this book-of, by, and for the noncommissioned officer and petty officer-is a comprehensive explanation of the enlisted leader across the U.S. Armed Services. It complements *The Armed Forces Officer*, the latest edition of which was published by NDU Press in 2007, as well as the Services' NCO/PO manuals and handbooks. Written by a team of Active, Reserve, and retired senior enlisted leaders from all Service branches, this book defines and describes how NCOs/POs fit into an organization, centers them in the Profession of Arms, explains their dual roles of complementing the officer and enabling the force, and exposes their international engagement. As Chairman of the Joint Chiefs of Staff General Martin E. Dempsey writes in his foreword to the book, "We know noncommissioned officers and petty officers to have exceptional competence, professional character, and soldierly grit-they are exemplars of our Profession of Arms." Aspirational and fulfilling, this book helps prepare young men and women who strive to become NCOs/POs, re-inspires serving enlisted leaders, and stimulates reflection by those who have retired from or left active service. It also gives those who have never worn the uniform a better understanding of who these exceptional men and women are, and why they are properly known as the "Backbone of the Armed Forces."

Global Governance and the Emergence of Global Institutions for the 21st Century Augusto Lopez-Claros
2020-01-23 Is there any hope for those who despair at the state of the world and the powerlessness of governments to find a way forward? Global Governance and the Emergence of Global Institutions for the 21st Century provides ambitious but reasonable proposals to give our globalized world the institutions of international governance necessary to address effectively the catastrophic risks facing humanity that are beyond national control. The solution, the authors suggest, is to extend to the international level the same principles of sensible governance that exist in well-governed national systems: rule of law, legislation in

the common interest, an executive branch to implement such legislation, and courts to enforce it. The best protection is unified collective action, based on shared values and respect for diversity, to implement widely accepted international principles to advance universal human prosperity and well-being.
