Natural Hazards and Disaster Management R. B. Singh 2006 "Disaster management is a multidisciplinary area, covering a wide range of issues such as monitoring, forecasting, evacuation, search and rescue, relief, reconstruction and rehabilitation. It also requires multi-sectoral governance as scientists, planners, volunteers and communities all have important roles to play. These roles and activities span the pre-, during and post-disaster phases. Besides, shift of emphasis from disaster response to risk reduction has opened up areas of exploratory research in the subject. Vulnerability refers to the susceptibility of a community to a hazard. Vulnerability analysis seeks to predict disasters by ensuring timely preparedness on the part of people and institutions and concerned government agencies. The emerging arena of disaster mitigation is also becoming an integral aspect of development planning, policy formulation and implementation. This is where this book comes in. It contains 22 chapters in the form of conceptual and empirical case studies from India and

other developed countries. The blend of theory, research and policy makes this book eminently worthwhile for anyone interested in disaster vulnerability and mitigation together with monitoring and forecasting and policy perspectives. It would be useful for students, researchers and teachers of geography, environmental studies, disaster management, civil engineering and policy science."

Preparing for the Psychological Consequences of Terrorism Institute of Medicine 2003-08-26 The Oklahoma City bombing, intentional crashing of airliners on September 11, 2001, and anthrax attacks in the fall of 2001 have made Americans acutely aware of the impacts of terrorism. These events and continued threats of terrorism have raised questions about the impact on the psychological health of the nation and how well the public health infrastructure is able to meet the psychological needs that will likely result. *Preparing for the Psychological Consequences of Terrorism* highlights some of the critical issues in responding to the psychological needs that result from terrorism and provides possible options for intervention. The committee offers an example for a public health strategy that may serve as a base from which plans to prevent and respond to the psychological consequences of a variety of terrorism events can be formulated. The report includes recommendations for the training and education of service providers, ensuring appropriate guidelines for the protection of service providers, and developing public health surveillance for preevent, event, and postevent factors related to psychological consequences.

Nursing Management of Pediatric Disaster Catherine J. Goodhue 2020-05-13 This textbook describes what nurses need to know about pediatric disaster nursing, including public policy, and addresses preparedness for all types of disasters (natural and man-made) and strategies for hospital, school and community preparedness. The book opens with a brief history of disaster nursing and explains the key differences between pediatric and adult disaster nursing. Recent years have been marked by numerous man-made and natural disasters, which have led nurses to seek new resources to be better prepared, in their role as nurses, for all types of disasters. Responding to this lack of resources, the book focuses on the unique needs of babies and children. It is the first and only textbook on pediatric disaster preparedness to include both the physical and psychological effects of disaster. Key aspects covered include: the psychosocial differences in and how to approach children; family reunification; medications, supplies and equipment; and decontamination. Given its breadth of coverage, the book is well suited as a textbook for nursing classes, while also offering a valuable resource for nurses working in the field.
