learn new ways to motivate your spouse to take your needs for more physical closeness to heart. If you're the spouse with a lagging libido, you're far from alone. You'll learn about the physiological and psychological factors, including unresolved relationship issues, that may contribute to the chill in your bedroom and what you can do to melt the ice. And if you're a man, you'll be surprised to learn that staggering numbers of men, even men whose sexual machinery works just fine, "get headaches" too! The Sex-Starved Marriage will give you and your spouse the inspiration, encouragement, and answers you need.

An Atlas of Geographical Wonders Gilles Palsky 2019-09-24 This is the first book to catalog comparative maps and tableaux that visualize the heights and lengths of the world's mountains and rivers. Produced predominantly in the nineteenth century, these beautifully rendered maps emerged out of the tide of exploration and scientific developments in measuring techniques. Beginning with the work of explorer Alexander von Humboldt, these historic drawings reveal a world of artistic and imaginative difference. Many of them give way—and with visible joy—to the power of fantasy in a mesmerizing array of realistic and imaginary forms. Most of the maps are from the David Rumsey Historical Map Collection at Stanford University.

The Outer Hebrides Paul Webster 2013-06-25 The Outer Hebrides are a place apart, an island chain stretching almost 200km from the Butt of Lewis to Barra Head with some of Britain's most mesmerising beaches, dramatic mountain ranges, wonderful wildlife, a long and fascinating history and a rich and vibrant Gaelic culture. This book features 40 mostly moderate walks, with many ideal for families, which take in magnificent sweeps of sand, soaring sea cliffs and memorable hill ascents, as well as celebrated cultural sights.

Cartographic Humanism Katharina N. Piechocki 2021-02-15 Piechocki calls for an examination of the idea of Europe as a geographical concept, tracing its development in the 15th and 16th centuries. What is "Europe," and when did it come to be? In the Renaissance, the term "Europe" circulated widely. But as Katharina N. Piechocki argues in this compelling book, the continent itself was only in the making in the fifteenth and sixteenth centuries. *Cartographic Humanism* sheds new light on how humanists negotiated and defined Europe's boundaries at a momentous shift in the continent's formation: when a new imagining of Europe was driven by the rise of cartography. As Piechocki shows, this tool of geography, philosophy, and philology was used not only to represent but, more importantly, also to shape and promote an image of Europe quite unparalleled in previous centuries. Engaging with poets, historians, and mapmakers, Piechocki resists an easy categorization of the continent, scrutinizing Europe as an unexamined category that demands a much more careful and nuanced investigation than scholars of early modernity have hitherto undertaken. Unprecedented in its geographic scope, *Cartographic Humanism* is the first book to chart new itineraries across Europe as it brings France, Germany, Italy, Poland, and Portugal into a lively, interdisciplinary dialogue.

Sakura's Cherry Blossoms Robert Paul Weston 2018-02-20 A warm, gorgeous exploration of a little girl's experience immigrating to a new country and missing her home and her grandmother, who still lives far away. Sakura's dad gets a new job in America, so she and her parents make the move from their home in Japan. When she arrives in the States, most of all she misses her grandmother and the cherry blossom trees, under which she and her grandmother used to play and picnic. She wonders how she'll ever feel at home in this new place, with its unfamiliar language and landscape. One day, she meets her neighbor, a boy named Luke, and begins to feel a little more settled. When her grandmother becomes ill, though, her family takes a trip back to Japan. Sakura is sad when she returns to the States and once again reflects on all she misses. Luke does his best to cheer her up -- and tells her about a surprise he knows she'll love, but she'll have to wait till spring. In the meantime, Sakura and Luke's friendship blooms and finally, when spring comes, Luke takes her to see the cherry blossom trees flowering right there in her new neighborhood. *Sakura's Cherry Blossoms* captures the beauty of the healing power of friendship through Weston's Japanese poetry-inspired text and Saburi's breathtaking illustrations.

Martin Waldseemüller's 'Carta Marina' of 1516 Chet Van Duzer 2020-10-09 This open access book presents the first detailed study of one of the most important masterpieces of Renaissance cartography, Martin Waldseemüller's Carta marina of 1516. By transcribing, translating into English, and detailing the sources of all of the descriptive texts on the map, as well as the sources of many of the images, the book makes the map available to scholars in a wholly unprecedented way. In addition, the book provides revealing insights into how Waldseemüller went about making the map -- information that can't be found in any other source. The Carta marina is the result of Waldseemüller's radical re-evaluation of what a world map should be; he essentially started from scratch when he created it, rejecting the Ptolemaic model and other sources he had used in creating his 1507 map, and added more descriptive texts and a wealth of illustrations. Given its content, the book offers an essential reference work not only on this map, but also for anyone working in sixteenth-century European cartography. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. Gran Canaria Izabella Gawin 2021-12-02 Gran Canary not only enjoys a fabulous reputation as a paradise of sunshine and beaches; it can also be described as one of the most versatile hiking islands of the Canary Archipelago. Connoisseurs praise it as a miniature continent because of its diversity of landscapes: shimmering dunes in contrast with luscious subtropical valleys, deep ravines with palm tree oases and glittering reservoirs, next to which are extensive pine tree forests and green slopes with grazing sheep and goats. To the North West cliffs drop down 800 m deep into the ocean, while in the centre of the island serrated, almost 2000 metre high ridges and bizarre rock monoliths emerge, which the Spanish writer Miguel de Unamuno once interpreted as "fossilised storms of fire and lava". This Rother walking guide - following

La Palma and Tenerife - is now the third featuring the Canary Islands: excursions to beaches and spectacular cave villages, walks through pine forests and atmospheric ridge paths. Due to the increased significance of hiking tourism, parts of what at times are more than 500 year old rocks have been carefully restored over the last years. These Caminos Reales (royal paths) stretch across the entire island and used to link remote mountain villages with coastal territory. Many proposed tours follow these mainly stone-paved hiking paths and are therefore also ideal for less experienced hikers. Experienced mountain hikers who are not afraid of "dramatic walks" will also find a rich offer of tours. The first comprehensive hiking guide on Gran Canary leaves nothing to desire! Coloured illustrations and excellent hiking maps at an ideal scale of 1:50,000/1:75,000 round off the picture and awaken the curiosity for ever new excursions into the charmingly bizarre world of the mountains.

Using Historical Maps in Scientific Studies Yao-Yi Chiang 2019-11-26 This book illustrates the first connection between the map user community and the developers of digital map processing technologies by providing several applications, challenges, and best practices in working with historical maps. After the introduction chapter, in this book, Chapter 2 presents a variety of existing applications of historical maps to demonstrate varying needs for processing historical maps in scientific studies (e.g., thousands of historical maps from a map series vs. a few historical maps from various publishers and with different cartographic styles). Chapter 2 also describes case studies introducing typical types of semi-automatic and automatic digital map processing technologies. The case studies showcase the strengths and weaknesses of semi-automatic and automatic approaches by testing them in a symbol recognition task on the same scanned map. Chapter 3 presents the technical challenges and trends in building a map processing, modeling, linking, and publishing framework. The framework will enable querying historical map collections as a unified and structured spatiotemporal source in which individual geographic phenomena (extracted from maps) are modeled (described) with semantic descriptions and linked to other data sources (e.g., DBpedia, a structured version of Wikipedia). Chapter 4 dives into the recent advancement in deep learning technologies and their applications on digital map processing. The chapter reviews existing deep learning models for their capabilities on geographic feature extraction from historical maps and compares different types of training strategies. A comprehensive experiment is described to compare different models and their performance. Historical maps are fascinating to look at and contain valuable retrospective place information difficult to find elsewhere. However, the full potential of historical maps has not been realized because the users of scanned historical maps and the developers of digital map processing technologies are from a wide range of disciplines and often work in silos. Each chapter in this book can be read individually, but the order of chapters in this book helps the reader to first understand the “product requirements” of a successful digital map processing system, then review the existing challenges and technologies, and finally follow the more recent trend of deep learning applications for processing historical maps. The primary audience for this book includes scientists and researchers whose work requires long-term historical geographic data as well as librarians. The secondary audience includes anyone who loves maps!

Albania Gillian Gloyer 2008 Written by an insider and Albania enthusiast, the Bradt guide to Albania takes a fresh look at how and where to explore the heritage of this hidden corner of eastern Europe. The guide includes cycling routes and hikers' trails to help independent travelers make the most of the Mediterranean countryside and there are up-to-date details on outdoor activities, wildlife and history. Albania's archaeological treasures are well covered, including the ancient city of Butrint and hilltop site of Byllis.

The Peaks of the Balkans Trail Rudolf Abraham 2018-03-15 A guidebook to the Peaks of the Balkans Trail, a circular route through the wild and rugged borderlands of Montenegro, Albania and Kosovo. The 192km trail winds its way through the spectacular scenery of the Prokletije Mountains (the southernmost range of the Dinaric Alps), taking in high passes, sweeping valleys and striking limestone peaks. It can be completed in around two weeks: the walking itself is not difficult though the route passes through some remote areas and

demands a moderate level of fitness. The guide presents the trail in 10 daily stages and also includes suggestions for excursions to bag neighbouring peaks and visit local sites of interest. Comprehensive route description is accompanied by mapping and colour photos. Welcoming guesthouses and homestays offer accommodation and delicious local cuisine on route, though camping is also a possibility. You will find everything you need to plan a successful trip: guidance on how to get to the route, advice on when to go, where to start your trek and what to take, and information on cross-border permits. Appendices include accommodation listings, useful contacts and an English-Albanian-Montenegrin glossary.
