An Anarchy of Families Alfred W. McCoy 2009 Winner of the Philippine National Book Award, this pioneering volume reveals how the power of the country's family-based oligarchy both derives from and contributes to a weak Philippine state. From provincial warlords to modern managers, prominent Filipino leaders have fused family, politics, and business to compromise public institutions and amass private wealth—a historic pattern that persists to the present day. Edited by Alfred W. McCoy, *An Anarchy of Families* explores the pervasive influence of the modern dynasties that have led the Philippines during the past century. Exemplified by the Osmeñas and Lopezes, elite Filipino families have formed a powerful oligarchy—controlling capital, dominating national politics, and often owning the media. Beyond Manila, strong men such as Ramon Durano, Ali Dimaporo, and Justiniano Montano have used “guns, goons, and gold” to accumulate wealth and power in far-flung islands and provinces. In a new preface for this revised edition, the editor shows how this pattern of oligarchic control has continued into the twenty-first century, despite dramatic socio-economic change that has supplanted the classic “three g's” of Philippine politics with the contemporary “four c's”—continuity, Chinese, criminality, and celebrity.

Family Ambiguity and Domestic Violence in Asia Maznah Mohamad 2013-06-06 This book revisits the issue of Domestic Violence (DV) in Asia by exploring the question of family ambiguity, and interrogating DV's relationship between concept, law and strategy. Comparative experiences in the Asian context enable an examination of the effectiveness of family regulations and laws in diverse national, cultural and religious settings. Key questions relate to the limits and relevance of the human rights discourse in resolving family conflicts; the extent to which power and control in intimate relationships can actually be

regulated by a set of inanimate, homogeneous and uniform policies and legislations; and how the state relates to the family as an "ambiguous" unit given state rules of governance that perpetuate unequal gender relations. Many of the difficulties in understanding DV have sprung from the fact that the family unit is ambiguous. When the state intervenes (e.g. reproductive health) the family is treated as a public concern; yet with respect to individual human/multicultural rights, the family is considered a private domain. Complications and contradictions arise with regard to different legislative/religious practices across Asia: for example, the enforcement of Sharia; technocratic imperatives with regard to demographic goals of marriage and reproduction; and state interference of gender imbalances and inequality. The politics and culture around DV is thus a mirror of modern-day Family-State collusion, which sustains rather than curtails discrimination based on sexuality and gender. This book views gender inequality for instance in relation to heteronormativity as the fundamental basis of intimate violence, rather than violence as a generic and neutral phenomenon, requiring generic solutions. It offers new theoretical insights to the conceptualisation of the family, culture and law with respect to DV. And it provides reasoned new perspectives on the effectiveness/inadequacy of present policies, laws and enforcement strategies against domestic violence in Asia.

Women's Human Rights Susan Deller Ross 2011-01-01 According to Susan Deller Ross, many human rights advocates still do not see women's rights as human rights. Yet women in many countries suffer from laws, practices, customs, and cultural and religious norms that consign them to a deeply inferior status. Advocates might conceive of human rights as involving torture, extrajudicial killings, or cruel and degrading treatment—all clearly in violation of international human rights—and think those issues irrelevant to women. Yet is female genital mutilation, practiced on millions of young girls and even infants, not a gross violation of human rights? When a family decides to murder a daughter in the name of "honor," is that not an extrajudicial killing? When a husband rapes or savagely beats his wife, knowing the legal authorities will take no action on her behalf, is that not cruel and degrading treatment? *Women's Human Rights* is the first human rights casebook to focus specifically on women's human rights. Rich with interdisciplinary material, the book advances the study of the deprivation and violence women suffer due to

discriminatory laws, religions, and customs that deny them their most fundamental freedoms. It also provides present and future lawyers the legal tools for change, demonstrating how human rights treaties can be used to obtain new laws and court decisions that protect women against discrimination with respect to employment, land ownership, inheritance, subordination in marriage, domestic violence, female genital mutilation, polygamy, child marriage, and the denial of reproductive rights. Ross examines international and regional human rights treaties in depth, including treaty language and the jurisprudence and general interpretive guidelines developed by human rights bodies. By studying how international human rights law has been and can be implemented at the domestic level through local courts and legislatures, readers will understand how to call upon these newly articulated human rights to help bring about legislation, court decisions, and executive action that protect women from human rights violations.

Family Law James Dwyer 2014-12-09 Family Law emphasizes the issues and skills most relevant to domestic relations practice. The text employs a novel and dramatic organization with three substantive units that compare the legal treatment of the parent-child relationship vs. adult intimate relationships at stages of formation, regulation, and dissolution. In keeping with the modern reorientation of the field, Family Law reflects the transition "From Partners to Parents" beginning with the creation of parent-child relationship rather than marriage. Its geographical breadth delivers more comparative materials than other texts, using examples from a variety of cultures to provoke "why don't we do this?" considerations. Each student-friendly chapter and section begins with a clear summary of current law that orients the reader before examining legal texts in detail. This structure invites theoretical critique only after a solid foundation is laid. Statutes are core to the text which gives proper emphasis to the vital skill of statutory interpretation in today's practice. Up-to-date material provides more recent cases than any other textbook. With an empirical emphasis, Family Law draws from the significant literature in sociology, psychology, anthropology and other fields so that legal analysis is grounded in real-life application. Focused questions direct students to the heart of the analysis, often using headings before questions to alert readers to the type of analysis required, for example: statutory interpretation, policy, client counseling, and moral theory. The Status of Women in Law Ng Shui Meng 1977 In this paper, an attempt is made to examine and compare the legal status of women in the Republic of China, Malaysia, the Philippines and Thailand, with special focus on laws which discriminate against women. In view of differences in the cultural background of these four countries - Confucianism in China, Islam in Malaysia, Catholicism and the Spanish influence in the in the Philippines and Buddhism in Thailand - it is likely that laws in these countries also differ. This paper also tries to relate the legal status of women in these countries to other aspect of their status, in particular, the social, economic and political aspects.

Children of Global Migration Rhacel Parreñas 2005-03-25 In the Philippines, a dramatic increase in labor migration has created a large population of transnational migrant families. Thousands of children now grow up apart from one or both parents, as the parents are forced to work outside the country in order to send their children to school, give them access to quality health care, or, in some cases, just provide them with enough food. While the issue of

transnational families has already generated much interest, this book is the first to offer a close look at the lives of the children in these families. Drawing on in-depth interviews with the family members left behind, the author examines two dimensions of the transnational family. First, she looks at the impact of distance on the intergenerational relationships, specifically from the children's perspective. She then analyzes gender norms in these families, both their reifications and transgressions in transnational households. Acknowledging that geographical separation unavoidably strains family intimacy, Parreñas argues that the maintenance of traditional gender ideologies exacerbates and sometimes even creates the tensions that plague many Filipino migrant families.

Women-Headed Households S. Chant 1997-01-31 Households headed by women are a growing presence worldwide. This is the first book to focus on their diversity and dynamics in developing countries. Set within the context of global trends and debates on female household headship, and using case-study material based on interviews with low-income women in Mexico, Costa Rica and the Philippines, the analysis explores the reasons for the formation and increase in women-headed households in different parts of the world, and their capacity for survival in societies where male-headed households are both the norm and ideal.

Islam, Gender, & Social Change Yvonne Yazbeck Haddad 1998 The essays collected in this book place this issue in its historical context and offer case studies of Muslim societies from North Africa to Southeast Asia. These fascinating studies shed light on the impact of the Islamic resurgence on gender issues in Iran, Egypt, Jordan, Pakistan, Oman, Bahrain, the Philippines, and Kuwait. Taken together, the essays reveal the wide variety that exists among Muslim societies and believers, and the complexity of the issues under consideration.

Gender and Globalization in Asia and the Pacific Kathy E. Ferguson 2008-08-01 What is globalization? How is it gendered? How does it work in Asia and the Pacific? The authors of the sixteen original and innovative essays presented here take fresh stock of globalization's complexities. They pursue critical feminist inquiry about women, gender, and sexualities and produce original insights into changing life patterns in Asian and Pacific Island societies. Each essay puts the lives and struggles of women at the center of its examination while weaving examples of global circuits in Asian and Pacific societies into a world frame of analysis. The work is generated from within Asian and Pacific spaces, bringing to the fore local voices and claims to knowledge. The geographic emphasis on Asia/Pacific highlights the complexity of

globalizing practices among specific people whose dilemmas come alive on these pages. Although the book focuses on global, gendered flows, it expands its investigation to include the media and the arts, intellectual resources, activist agendas, and individual life stories. First-rate ethnographies and interviews reach beyond generalizations and bring Pacific and Asian women and men alive in their struggles against globalization. Globalization cannot be summed up in a neat political agenda but must be actively contested and creatively negotiated. Taking feminist political thinking beyond simple oppositions, the authors ask specific questions about how global practices work, how they come to be, who benefits, and what is at stake. Cultural Sociology of Divorce Robert E. Emery 2013-01-24 While the formal definition of divorce may be concise and straightforward (legal termination of a marital union, dissolving bonds of matrimony between parties), the effects are anything but, particularly when children are involved. The Americans for Divorce Reform estimates that "40 or possibly even 50 percent of marriages will end in divorce if current trends continue." Outside the U.S., divorce rates have markedly increased across developed countries. Divorce and its effects are a significant social factor in our culture and others. It might be said that a whole "divorce industry" has been constructed, with divorce lawyers and mediators, family counselors, support groups, etc. As King Henry VIII's divorces showed, divorce has not always been easy or accepted. In some countries, divorce is not permitted and even in Europe, countries such as Spain, Italy, Portugal, and the Republic of Ireland legalized divorce only in the latter quarter of the 20th century. This multi-disciplinary encyclopedia covers curricular subjects related to divorce as examined by disciplines ranging from marriage and the family to anthropology, social and legal history, developmental and clinical psychology, and religion, all through a lens of cultural sociology. Features: 550 signed entries, A-to-Z, fill 3 volumes (1,500 pages) in print and electronic formats, offering the most detailed reference work available on issues related to divorce, both in the U.S. and globally. Cross-References and Further Readings guide readers to additional resources. A Chronology provides students with context via a historical perspective of divorce. In the electronic version, the comprehensive Index combines with Cross-References and thematic Reader's Guide themes to provide convenient search-and-browse capabilities. For state and nation entries, uniform entry structure combined with an abundance of statistics facilitates comparison between and across states and nations. Appendices provide further annotated sources of data and statistics.

The Oxford Handbook of International Law in Asia and the Pacific Simon Chesterman 2019-04-28 The growing economic and political significance of Asia has exposed a tension in the modern international order. Despite expanding power and influence, Asian states have played a minimal role in creating the norms and institutions of international law; today they are the least likely to be parties to international agreements or to be represented in international organizations. That is changing. There is widespread scholarly and practitioner interest in international law at present in the Asia-Pacific region, as well as developments in the practice of states. The change has been driven by threats as well as opportunities. Transnational issues such as climate change and occasional flashpoints like the territorial disputes of the South China and the East China Seas pose challenges while economic integration and the proliferation of specialized branches of law and dispute settlement mechanisms have also encouraged greater domestic implementation of international norms across Asia. These evolutions join the long-standing interest in parts of Asia (notably South Asia) in post-colonial theory and the history of international law. The Oxford Handbook of International Law in Asia and the Pacific brings together pre-eminent and emerging specialists to analyse the approach to and influence of key states of the region, as well as whether truly 'Asian' trends can be identified and what this might mean for international order.
