Globalization and Language Teaching David Block 2002-06-01 This book considers the issues globalization raises for second language learning and teaching. Block and Cameron's collection shows how, in an economy based on services and information, the linguistic skills of workers becomes increasingly important. New technologies make possible new kinds of language teaching, and language becomes an economic commodity with a value in the global marketplace. This has implications for how and why people learn languages, and for which languages they learn. Drawing together the various strands of the globalization debate, this rich and varied collection of contributions explores issues such as: *The commodification of language(s) and language skills *The use of new media and new technologies in language learning and teaching *The effects of globalization on the language teaching industry *New forms of power and resistance.

Corpora and Language Teaching Karin Aijmer 2009-01-14 The articles in this edited volume
represent a broad coverage of areas. They discuss the role and effectiveness of corpora and
corpus-linguistic techniques for language teaching but also deal with broader issues such as
the relationship between corpora and second language teaching and how the different
perspectives of foreign language teachers and applied linguists can be reconciled. A number
of concrete examples are given of how authentic corpus material can be used for different
learning activities in the classroom. It is also shown how specific learner problems for
example in the area of phraseology can be studied on the basis of learner corpora and
textbook corpora. On the basis of learner corpora of speech and writing it is further shown
that even advanced learners of English are uncertain about stylistic and text type differences.
